Interim Instructions for Starting a Building Permit Application
For a Project Using the 2019 Chicago Construction Codes
Tents and Other Temporary Structures—Self-Certification

Background
In April 2019, the city council adopted an ordinance creating the 2019 Chicago Construction Codes. Unlike the pre-2019 Chicago Building Code, the Chicago Construction Codes are aligned with the widely adopted model building codes (I-Codes) published by the International Code Council, resulting in some significant changes in terminology. The 2019 Chicago Building Code (Title 14B) and 2019 Chicago Building Rehabilitation Code (Title 14R) became optional for most project types on December 1, 2019, and mandatory for all permit applications started on or after August 1, 2020 (with limited exceptions).

The City of Chicago is currently in the process of upgrading its online building permit interface (the Hansen Dynamic Portal). Unfortunately, the new system was not ready to launch at the same time as the new Chicago Construction Codes.

These interim instructions will guide you through the steps needed to begin a building permit application using the Hansen Dynamic Portal, which does not currently reflect the terminology used in the 2019 Chicago Construction Codes, until that system is replaced in 2021.

By following these instructions, you will avoid unnecessary data entry on your part and help city staff to review and process your permit application more efficiently.

Thank you for your patience and cooperation during this transitional period.

These Instructions
These instructions were written specifically for the following type of building permit application:

Scope of Work: Tents and Other Temporary Structures (Special Construction)
Review Program: Self-Certification Permit Program

Separate instructions are available on the Department of Buildings website if the scope of work is a permanent building or if you are using Standard Plan Review. Please use the appropriate instructions for your application type to avoid mistakes and extra work.

The Dynamic Portal and PDF Building Permit Application
To start a new building permit application, visit http://ipiweb.cityofchicago.org/DynamicPortal/ and log in using your unique account.

To start this type of permit application, you must be an Illinois-licensed architect or structural engineer enrolled in the City’s Self-Certification Permit Program and your license and registration must be associated with your user account.
Once you have logged in to the Dynamic Portal, on the main page click “Apply for a permit.”

Several pieces of information that you will be required to provide in the Dynamic Portal portion of the application process will also be required when you fill out the PDF Building Permit Application (Form 400) during a later step of the permit application process. Form 400 reflects the new terminology and requirements of the 2019 Chicago Construction Codes.

**It may be helpful if you begin filling out Form 400 before you log in to the Dynamic Portal.**

Permit forms, including Form 400, are available at:

Note: Many of these duplicate steps will be eliminated when the City’s new permitting system comes online in 2021. We appreciate your patience in the interim.

**Begin the Online Permit Application**

The Dynamic Portal will guide you through several pages to gather basic information about your permit application. As noted above, some of this information must match the information you provide on the PDF Building Permit Application (Form 400) later in the process, so it may be helpful if you begin filling out Form 400 before you log in to the Dynamic Portal.

Note: Many options in the Dynamic Portal are tied to your license type. If you do not see the options described in these instructions, your account may not be configured correctly. Please contact eplan@cityofchicago.org for assistance. When requesting assistance with the Dynamic Portal, it is helpful if you include screenshots of the problem you are encountering.

**Job Type**

Select “New Construction with Plans” as the permit application type.

In the “Workbenches” section, select “Tent/Canopy/Stage/Platform” only. **Do not select any other choices.**

Click “Next Page.”
Job Location
Enter the address where the temporary structure will be installed.

If the temporary structure will be erected on a public street or sidewalk, provide the address of the nearest building. (You will also need to obtain a public way use permit from the Department of Business Affairs and Consumer Protection (BACP) or special events permit from the Department of Cultural Affairs and Special Events (DCASE)).

If the temporary structure will be erected in a park, use the park's official address. For Lincoln Park and Grant Park, provide the address of the nearest building in the park, such as a fieldhouse or museum. (Addresses are available on the Chicago Park District web site.)

You may provide partial address information.

Click “Next Page.”

Address List
The system will attempt to validate the address you provide against the City's address records. If the system identifies multiple possible addresses, please select the correct address from the list.

If the address cannot be validated (for example, because the address is on a newly-created street), you may continue with the process to obtain an application number, but you will need to contact the Department of Buildings before you will be able to pay the building permit deposit fee.

Do not pick an incorrect address that is “close enough.” It is very difficult to change the address after you start a permit application by paying the deposit fee, and this could delay processing of your permit application.

Click “Next Page.”
**Job Description**

You will not be able to change the “Review Program” but you must indicate the application is being self-certified in the description of work (see below).

For “Type of Permit” select “Commercial Construction,” even if your project involves a different type of occupancy.

For “Estimated Cost” provide the estimated cost of materials and labor for work to be performed under this permit.

For “Description of the construction/proposed job” see the detailed instructions and examples on the last page of this document.

![Application Details](image)

Click “Next Page.”

**Application Detail: Building Information**

For “Occupancy Code,” click “Display Add Item Form” and select “J-Misc Buildings/Structures” regardless of the actual occupancy. Click “Save.”

For “Existing Occupancy Code,” click “Display Add Item Form” and select “J-Misc Buildings/Structures” regardless of the actual occupancy. Click “Save.”

For “Building/Tent Area” enter the area of work, in square feet, calculated in accordance with Section 14A-4-412.2.2.1 of the Chicago Construction Codes Administrative Provisions:

> The permit fee is based on: “The gross floor area of all construction, demolition or rehabilitation work to be permitted [under this application], including the floor area of [work in] basements that are excluded from building area, in square feet.”

For “Building Height in Feet” enter the building height measured in accordance with Section 14B-2-203 of the 2019 Chicago Building Code, rounded to the nearest whole foot. (Note: this will usually be different than the building height measured for zoning purposes.)

Leave all other fields in the “Building Information” section blank.
Application Detail: Tent
Provide the date that the tent or other temporary structure will be installed and the date it will be removed by:

<table>
<thead>
<tr>
<th>Erection Starts*</th>
<th>Removed by*</th>
</tr>
</thead>
<tbody>
<tr>
<td>8/1/2020</td>
<td>10/1/2020</td>
</tr>
</tbody>
</table>

For most temporary structures, installation is limited to 60 days without written pre-approval from the Department of Buildings, however the system will accept any range of dates.

Self-certified applications must be started, and drawings uploaded two weeks before the erection start date to allow adequate time for processing.

Application Detail: Application Standard Submission Detail
For “Construction Class” select “4B – Combistible Frame Construction” regardless of the actual construction type.

Leave all other fields in the “Application Standard Submission Detail” section blank.
### Submissions Items

<table>
<thead>
<tr>
<th>ID#</th>
<th>Submission Item</th>
</tr>
</thead>

- **Existing Sprinkler Coverage**: [ ] Yes [ ] No
- **Airport Type**: 
- **Airport Area**: 
- **Residential De-Conversion**: [ ] Yes [ ] No

### Application Detail: Zoning Information

Because zoning review is not required for temporary structures, you may place an “x” in each required field.

### Zoning Details

- **What is the current zoning use of the building?**
- **What is the proposed zoning use of the building?**
- **Is the proposed zoning use being expanded by area?**

Note: After completing the required fields on this page, you may save your application and return to it later. If you wish to do this, click “Save Application.”

To continue with the application, click “Next Page.”
**Contractors and Contacts**

On this page, you will be required to provide information about the permit applicant, property owner, design professional of record, and expediter (if applicable), as well as the general contractor who will install the tent or temporary structure.

The system will use your credentials to identify your association with the permit application, either as an “Architect” or “Expediter.” This will be displayed on the initial page.

**Contractors and Contacts: Add Contractor**

Click “Add Contractor” in the first section to add the design professional of record, any permit expediter involved with the application, and the general contractor who will install the tent or temporary structure.

On the page which appears, you will be able to search for licensed architects, expediters, and general contractors either by name or license number.

Mark the checkbox in the column labeled “Select” and then click “Add.”

Continue this process until you have added all contractors, then click “Return to main page.”

**Contractors and Contacts: Add Owners/Contacts**

Click “Add Individual Owner/Contact” in the second section to add the permit applicant.

You must indicate that the permit applicant is both the “Owner” and the “Tent Contractor.” (The General Contractor, entered in the previous section, will be responsible for installing the tent, and the project manager will not issue the permit unless a general contractor is provided.)

If the permit applicant is a corporation, company, or similar entity, enter the first part of the name in the “First Name” field and the second part of the name in the “Last Name” field. (See example.)
If the contact information that you enter appears to match a record that already exists in the system, the system will ask you to confirm if the contact is the same.

When you have finished entering all contacts, click “Return to main page.”

**Contractors and Contacts: Add Company Owner/Contract**

Do **not** use this section for temporary structure permits.

**Certification**

On this page, review and accept the statement and check each of the boxes.

---

**Standard Certificate of Responsibility**

By selecting "I accept", you are certifying that:

1. All information that you have provided in the Application is true and correct;
2. You have read and agree to be legally bound by all terms and conditions contained in this application and;

- I Accept  
- I Do Not Accept

**Required Documents**

- Aldermanic Acknowledgement Letter
- Event Letter
- Flame Spread Certificate
- Tent Wind Calculations
As of July 1, 2019, an “aldermanic acknowledgment letter” is no longer required and applications are no longer subject to a 10-day waiting period, however you must check the box.

Check the boxes for “Event Letter,” “Flame Spread Certificate,” and “Tent Wind Calculations” even if they do not apply to the type of temporary structure being permitted under this application.

Click “Next Page.”

**Application Summary**

Review the summary of information to verify that it is correct and complete.

You may click either “Previous Page” or “return to the beginning of the application process” if you need to change any of the data you entered.

The following information must match the information you provide on the PDF Building Permit Application (Form 400) which will be uploaded to ProjectDox:

- “Job Location” must match “Address” (Form 400, Page 1).
- “Estimated Cost” must match “Estimated cost of work” (Form 400, Page 1).
- “Description” must match “Description of work” (Form 400, Page 1).
- “Building/Tent Area” must match “Area of work” (Form 400, Page 1).
- “Erection Starts” must match “Installation start date” (Form 400, Page 3-SC).
- “Removed by” must match “Removed by date” (Form 400, Page 3-SC).
- “Building Height in Feet” must match “Proposed Building Height” (Form 400, Page 3-NC).
- Under “Contractors” the “Design Professional of Record” (Form 400, Page 6-DP), “General Contractor” (Form 400, Pages 5 and 6-GC), and “Expediter” (Page 6-EX), if applicable, must be listed.
- Under “Contacts” the “Permit Applicant” (Page 5) must be listed as “OWNER” and “TENTCONT.”

If you have not already started filling out a copy of the PDF Building Permit Application (Form 400), you should copy the information above to Form 400 before completing this step.

Click “Finish” if the information on the summary page is correct and complete.

**Warning:** You will not be able to make changes to the application data (other than listed contractors) after you click “Finish.”
Pay Initial Fees to Start Your Application

On the “Status” page, you will see that a zoning fee has been added to your application. You must pay this fee to “start” the application.

Click the “Add to Cart” button to add all unpaid fees to your cart.

Status

<table>
<thead>
<tr>
<th>Fee Description (Amount Due)</th>
<th>Status</th>
</tr>
</thead>
<tbody>
<tr>
<td>ZONING FEE - TENTS ($75.00)</td>
<td>Unpaid</td>
</tr>
</tbody>
</table>

Condition Description

<table>
<thead>
<tr>
<th>Condition Description</th>
<th>Status</th>
</tr>
</thead>
<tbody>
<tr>
<td>There is a Dep of Environment Thorium hold on subject property address. Contact the Department of Buildings for assistance.</td>
<td>No affect on stage</td>
</tr>
</tbody>
</table>

Review Description

<table>
<thead>
<tr>
<th>Review Description</th>
<th>Status</th>
</tr>
</thead>
<tbody>
<tr>
<td>A Zoning Review is required. PRELIMINARY INTAKE REVIEW REQUIRED</td>
<td>Incomplete Approved</td>
</tr>
</tbody>
</table>

Click “View Cart/Checkout” in the panel on the left side of the page to pay the fees.

Cart / Checkout

Click “Check Out” to be taken to the City of Chicago’s eCheckout system where you will be asked to pay for all items in your cart.

If there are fees in your cart that you do not want to pay for yet, click “Remove” before clicking “Check Out.” You will be able to return fees to your cart from the Status page.

<table>
<thead>
<tr>
<th>App #</th>
<th>Date</th>
<th>Type</th>
<th>Description</th>
<th>Fee</th>
<th>Remove</th>
</tr>
</thead>
<tbody>
<tr>
<td>100849849</td>
<td>8/2/2020</td>
<td>Building</td>
<td>337 E RANDOLPH ST 60601-</td>
<td>$75.00</td>
<td>Remove</td>
</tr>
</tbody>
</table>

Total: $75.00

After successfully completing payment using the eCheckout system, you will be returned to the Status Page, where you will be able to confirm that the fees have been paid.
Status Page
As your permit application is being reviewed, you may return to this page to add or change the General Contractor who will be installing the temporary structure. You must provide complete contractor information before the permit can be issued by the project manager.

Do not use the “Print Application” button.

You will need to visit the Department of Buildings' Permit Applications web page to download the new style of PDF Building Permit Application (Form 400). This form is available at: https://www.chicago.gov/city/en/depts/bldgs/supp_info/department_of_buildingsapplications.html

Continue Your Application Using ProjectDox
Invitation to Upload
Within one hour of your fee payment being processed, you will receive an email inviting you to continue the permit application process using the ProjectDox system. You may also log directly into the City of Chicago's ProjectDox system at http://planreview.cityofchicago.org/. Please contact eplan@cityofchicago.org for assistance if you do not receive an invitation or cannot see a record for your application number in ProjectDox after an hour.

Upload Drawings and Documents
To continue the application process, you must upload drawings and other documents, including a completed version of the PDF Building Permit Application (Form 400), using the ProjectDox system. Once you indicate that these documents are ready for review by completing the “applicant upload task,” city employees will examine your application for compliance with code requirements.

When Your Permit Is Ready
When your permit application has been approved and your permit is ready to issue, you will receive an email notification. You will be able to pay the balance of your permit fee either through the Hansen Dynamic Portal or at a Department of Finance in-person cashiering location. (If you are paying at an in-person location, make sure you know the 9-digit application number.) After you have paid the fee, you will be able to print a permit certificate from the Dynamic Portal (or receive one from the cashier, if you pay in person). You will also be able to download approved copies of your construction drawings from the ProjectDox system.

Before Work Begins
A copy of the permit certificate must be posted at the construction site and in a location visible from a public street or sidewalk before any work begins. A copy (either paper or electronic) of the approved construction drawings, downloaded from ProjectDox, must be on site at any time when work is occurring.

Before Occupancy
When temporary structures are issued through the Self-Certification Permit Program, the Self-Certification Professional (architect or structural engineer) must conduct a pre-occupancy inspection in accordance with Rule N of the Rules for the Self-Certification Permit Program.

If you are unwilling or unable to do this, please submit the application for Standard Plan Review.

More Information
For more information about further steps in the process, including permit-related inspections, please visit our website: http://www.chicago.gov/buildings

If you need technical assistance with the Dynamic Portal or ProjectDox, please contact eplan@cityofchicago.org.

If you have comments about these instructions or the transition to the 2019 Chicago Construction Codes, please contact DOBCommissioner@cityofchicago.org.
Description of Work: **Requirements and Examples**

Making sure your description of work includes key information, is accurate, and is concise is very important to ensuring the plan examination and inspection process will run smoothly.

For this type of work the description must:

- Begin with “SELF-CERT 2019 CBC:”
- Describe the type and dimensions of the temporary structure, for example: “8 X 20 SHIPPING CONTAINER,” “20 X 40 POLE TENT,” or “CUSTOM 800 SQFT STAGE”
- Describe the intended use of the temporary structure, for example “FOR ASSEMBLY” or “FOR COOKING” or “FOR STORAGE”
- Describe any event the temporary structure is associated with, for example “DURING TASTE OF CHICAGO,” “FOR SMITH WEDDING,” “FOR VOLLEYBALL TOURNEMENT,” or “FOR PRIVATE EVENT”
- If the temporary structure will be installed on a large site, such as Grant Park, describe the installation location, such as “LOCATION: BUCKINGHAM FOUNTAIN PLAZA”

**Note:** Self-certification should not be combined with reinstatement. Reinstatements will be processed as Standard Plan Review applications, with the plan examination waived if the location and dimensions match the previous permit.

**Examples**

SELF-CERT 2019 CBC: SIX 8 X 20 SHIPPING CONTAINERS FOR MERCANTILE/STORAGE USE CONNECTED WITH AT-GRADE WOOD DECKS FOR POP-UP RETAIL VILLAGE. INCLUDES SMALL STAGE AND FENCED-IN OUTDOOR SEATING AREA WITH TABLES AND CHAIRS.

SELF-CERT 2019 CBC: TWO 15 X 45 FRAME TENTS FOR BUILDING HEALTH / SECURITY SCREENING. LOCATION: DALEY CENTER PLAZA.

SELF-CERT 2019 CBC: ONE 30 X 50 STRUCTURE TENT FOR TEMPORARY MUSEUM EXHIBIT. LOCATION: MUSEUM OF SCIENCE AND INDUSTRY SOUTHWEST TERRACE.

SELF-CERT 2019 CBC: ONE 20 X 80 POLE TENT, ASSEMBLY-TYPE (TABLES AND CHAIRS) USE FOR 1-DAY PRIVATE EVENT IN ST. JOHN CHURCH PARKING LOT.

SELF-CERT 2019 CBC: CUSTOM 1,000 SQFT STAGE WITH TWO 30-FOOT LIGHTING TOWERS
