

Construction projects may continue as an essential service in Chicago as per Governor Pritzker's 'Stay at Home' Executive Order if management and workers comply with the following requirements:

- **Social Distancing**, make every effort possible to maintain 6-foot distance from other individuals.
- **Cover your mouth and nose with a tissue when you cough or sneeze.** If a tissue is not available, cough or sneeze into the bend of your arm (no hands).
- **Wash hands with soap and water for at least twenty seconds as frequently as possible.** If soap and water are not available, use hand sanitizer.
- **Regularly clean high-touch surfaces.**
- **Avoid shaking hands.**

Adhere to Chicago Department of Public Health guidelines for workers who are sick

If a construction worker is experiencing COVID-19 virus symptoms - including dry cough, fever, body aches and shortness of breath - they must stay home for at least seven days. CDPH also advises everyone must stay home as much as possible, consider themselves possibly exposed, and self-monitor for symptoms per the following guidelines:

- **if sick or positive for virus -> must stay home for at least 7 days**
- **if close contact/exposed -> must stay home for 14 days and monitor symptoms**
- **everyone -> must stay home as much as possible, consider themselves possibly exposed and self-monitor for symptoms**

Other ways to help reduce the impact of COVID-19

- Stagger shifts, pre-shift meetings and other meetings conducted in-person
- Give co-workers a reminder if you notice they forget to wash their hands, cover their mouths or wipe down their equipment.
- Provide workers with access to soap and water so they can wash their hands frequently, or hand sanitizer if soap and water are not available.
