

$$\text{Construction Factor} \times \text{Scope of Review} \times \text{Project Area} = \text{Permit Fee}$$

from code tables **by customer**

Construction Factor

- Reflects complexity of a building
- Distributes review costs based on:
 - Occupancy Type
 - Construction Type
- Construction Factor tables
 - New Construction – Table (A)
 - Alteration/Renovation – Table (B)

Scope of Review Factor

- Reflects time to review the project
- Distributes review costs based on:
 - Scope of work
- Scope of Review tables:
 - New Construction – Table (C)
 - Alteration/Renovation – Table (D)

Project Area/Area of Work

- Determined by square feet
- New Construction – actual area of construction
- Addition – actual area of the addition
- Renovation / alteration – area affected by the proposed work
