## I. Introduction

### A. Background

Chicago Department of Transportation (CDOT), Division of Infrastructure Management (DIM) charges permit fees for several different types of permits. The following document describes those permit fees. Permit fees cover the cost of processing the permit, including support and maintenance for the permitting website. Please be advised that permit fees may change year-to-year. It is incumbent upon permittees to review the Permit Fee Schedule prior to applying for a permit. By applying for a permit, permittees acknowledge and accept the fees posted in the Permit Fee Schedule. Furthermore, permittees must comply with all applicable rules and regulations related to public right of way activity including the Municipal Code of Chicago (MCC) and [Rules and Regulations for Construction in the Public Way](#). Please visit the [CDOT Permit Portal](#) for additional information.

### NOTES

- The permit fee for each driveway located within the Central Business District is doubled the amount listed above.
- See MCC § 9-4-010.
- In October 2020, CDOT migrated driveway permits to its permitting system of record—IPS 11. The migration offers permittees a more efficient way to apply for, manage, and pay for driveway permits. Specifically, commercial and residential driveway permittees can log into the permit portal and claim their driveway. Additionally, commercial driveway permittees must use the permit portal to pay all renewal driveway fees. Please visit the driveway website [cdotdriveways@cityofchicago.org](mailto:cdotdriveways@cityofchicago.org) or contact with questions.

## 5. Monthly Usage Fees (Type I, II, and III)

NOTES

- i. Activity Types (see MCC 10-28-281.3)
  - a. Type I activity “shall mean work on a building which involves alteration, repair of exterior facade, work conducted pursuant to the critical examination program, or demolition. This includes, but is not limited to, tuckpointing.”
  - b. Type II activity “shall mean work which involves the construction of a new building.”
  - c. Type III activity “shall mean any routine maintenance work on a building within the Central Business District, as defined in Section 9-4-010, which does not require the removal of any physical structures. This includes, but is not limited to, painting, cleaning and window washing.”
- ii. The fees for obstruction are based on the length of the obstruction and the number of days the obstruction occupies the public right of way. Obstruction permits have a minimum monthly fee.
- iii. All Occupy permits are issued for 30-day increments.
- iv. Length is calculated using each foot of frontage.
- v. Permittees will be charged for any metered spaces rendered unusable due to their occupation. See MCC § 9-68-080 for more information.

#### NOTES

- Please visit the CRC homepage at, [https://www.chicago.gov/city/en/depts/cdot/provdrs/construction\\_information/svcs/commercial\\_refusecontainerpermits.html](https://www.chicago.gov/city/en/depts/cdot/provdrs/construction_information/svcs/commercial_refusecontainerpermits.html).
- All CRC bills will include a technology surcharge as described below.
- See MCC § 7-28-215.

### 2. Technology Surcharge (NEW)

Beginning in 2021, CDOT will impose a “technology surcharge” of 10% on all CRC fees. Funds collected through the technology surcharge will be used to support the CRC program. See MCC § 7-28-215 for more information.

### 3. Permit Period

Permit Period	Payment Due Date
April 1 through July 31	July 15th
August 1 through November 30	November 15th
December 1 through March 31	March 15th

### III. Additional Fees

#### A. Degradation Fees

CDOT assess a *degradation fee* for any project involving cuts or trenches on a “Moratorium Street”—streets that require additional protection, including newly paved streets. CDOT approves permits on moratorium streets on a case-by-case basis upon request.

Degradation Fee Schedule					
For projects involving cuts or trenches in a public street when the pavement surface is less than five (5) years old (Moratorium street), the degradation fee shall be assessed in addition to the required permit fee. The degradation fee is calculated according to the formula as follows:					
$F = P \times (OL/200) \times BR$					
Where:					
F = Degradation fee					
P = Multiplier based on age of street (see below).					
BR = Base rate (set by City Council or Rules & Regs) of \$1000					
OL = Overall Length (set to 200 for all cuts)					
Age of Street	>0 - 6 months	>6 and ≤12 months	>12 and ≤18 months	>18 and ≤24 months	>24 months - ≤ 5 years
P	20	15	10	5	2.5
<b>Cuts</b>					
Example: A utility excavates a 6' x 6' opening (1) in a street that was paved 6 months ago.					
$F = P \times (200/200) \times BR$					
$F = 20 \times (1) \times \$1000 = \$20,000$					
F = \$20,000 (Degradation fee)					
<b>Trenches</b>					
A prorated degradation fee will be assessed for trenches based on a minimum of 200 LF increments.					
Example: A utility company excavates a 250' trench in a street that was paved 4½ years ago.					
$F = P \times (OL/200) \times BR$					
$F = 2.5 \times (250/200) \times \$1000$					
$F = 2.5 \times (1.25) \times \$1000 = \$3125$					
F = \$3125 (Degradation fee)					
* Residential homeowners are exempt on repairs to existing sewer and water services in the right-of-way.
