This plan, Healthy Chicago 2.0, is utilizing the “Mobilizing for Action through Planning and Partnerships (MAPP)” model, which was developed by the Centers of Disease Control and Prevention (CDC) and the National Association for County and City Health Officials (NACCHO). Healthy Chicago 2.0 is a four year plan that will outline goals and strategies for Chicago Department of Public Health (CDPH) and public health stakeholders to implement and work towards improving the health of Chicago residents and communities.

The plan development process and implementation will have a special health equity lens to address disparities and inequities among vulnerable populations and improve health status for all. Health equity is achieved when every person has the opportunity to “attain his or her full health potential” and no one is “disadvantaged from achieving this potential because of social position or other socially determined circumstances.” Health inequities are reflected in differences in length of life; quality of life; rates of disease, disability, and death; severity of disease; and access to treatment (Centers for Disease Control and Prevention).

The Partnership for Healthy Chicago (Partnership) is a public-private partnership of stakeholders working to strengthen the public health system. The Partnership first convened in 1998 as part of the National Turning Point Demonstration Project through the W.K. Kellogg and Robert Wood Johnson Foundations and has continued to meet since then, conducting several strategic plans and implementing the priorities identified within the plans.

Members of the Partnership represent entities that contribute to the health of the city residents, including: governmental agencies; provider, hospital, health center associations; schools and academia; research and policy organizations; faith and business communities; and community and social service organizations. The Partnership for Healthy Chicago is co-chaired by the CDPH and one partner organization. CDPH staffs the Partnership.

An analysis of community feedback on the strengths and areas for improvement in their community and Chicago. Data was collected through an online survey, focus groups and oral histories with marginalized populations, and community conversations. The CDPH Planning team in collaboration with the UIC School of Public Health completed this analysis. For the results of the Community Themes & Strengths Assessment, click here.

An analysis of forces and trends that will impact Chicagoans' health and the public health system, These data were collected from the Community Conversations, Partnership members, and other targeted stakeholder groups such as: CDPH management, violence prevention, substance abuse partners and EverThrive members. The CDPH Planning Team completed this analysis. For the assessment results click here.
**COMMUNITY HEALTH STATUS**

An analysis of community health data, including data on social determinants of health (education, income, demographics, housing, environment, etc). The CDPH Office of Epidemiology in partnership with the Partnership data committee completed this analysis.

*For the results of the Community Health Status Assessment, click here.*

---

**LOCAL PUBLIC HEALTH SYSTEM**

Local Public Health System Assessment: analysis of the capacity and functioning of the public health system. This assessment was completed by CDPH in partnership with over 70 public health stakeholders.

**HOW WILL PRIORITIES BE IDENTIFIED?**

The findings from the four assessments, along with the Healthy Chicago 2.0 vision, will be used to identify priority areas needed to reach health equity and improve community health and wellness. CDPH, Partnership members, the public, and subject matter experts gave feedback that resulted in the 10 Action Areas.

**HEALTHY CHICAGO 2.0 ACTION TEAMS**

CDPH released an online application for members of the Chicago community to apply to be part of the 10 action teams that will work to develop the specific goals, objectives and strategies. Over 200 people applied and nearly 130 people are working on the 10 Action Teams co-chaired by 1 CDPH staff person and 1 Community person. These teams will work May-July and submit a final product for review by July 31, 2015.

**WHAT’S NEXT?**

August: CDPH will share the draft plan online for feedback

September: CDPH and Partnership members will host a launch event

Action Teams will developed a detailed year one work plan

Partners and Funders will be engaged!

October: CDPH will share the plan across Chicago communities

January: Healthy Chicago 2.0 Plan implementation begins
