

## **Getting to Zero Chicago: 2019 Chicago Department of Public Health HIV Services Portfolio Funding Summary**

November 4, 2019

This document provides an overview of changes made to the Chicago Department of Public Health (CDPH) HIV Services Portfolio. Details about the process and outcomes are outlined, including background, planning efforts, the procurement process, and funding outcomes.

### **Background**

#### Why did we change?

The HIV field has advanced over the last decade. Accordingly, federal and state priorities have changed. We now have tools – HIV treatment and pre-exposure prophylaxis (PrEP) – that lead to fewer HIV infections and support our commitment to ending of the HIV epidemic. When successfully treated (to the point of durable viral suppression), persons living with HIV cannot transmit HIV to their sexual partners. When used successfully, persons on PrEP are 99 percent protected from infection.

We have seen a reduction in new HIV diagnoses over the years, but it has not been equitable. While the annual number of new HIV diagnoses is dropping overall and for most groups, new diagnoses among Black and Latino gay, bisexual, and other men who have sex with men (MSM) have remained stable. Of particular concern, we continue to see lower rates of PrEP uptake and durable viral suppression among Black and Latinx communities when compared to whites.

Until this year, the Chicago Eligible Metropolitan Area (EMA) and State of Illinois had no comprehensive, coordinated plan to end the epidemic in our jurisdictions. With the Getting to Zero plan and the Chicago EMA's HIV Services Portfolio, we have a framework that will effectively align our collective efforts, promote the health of our communities, and accelerate progress toward the end of the HIV epidemic.

#### Current epidemic

In 2017, there were 1,164 new diagnoses in the Chicago EMA (752 in the City of Chicago), the fewest since the late 1980s. But, disparities exist.

- 84 percent of new diagnoses were in men.
- 63 percent of new diagnoses were in gay, bisexual, and other MSM.
- 50 percent of new diagnoses were in Blacks.
- 60 percent of new diagnoses were in persons ≤34 years of age.
- New diagnoses were highly concentrated in certain geographic areas.

In 2016, there were 29,508 people living with HIV in the Chicago EMA, the most ever, because people are living longer, healthier lives. More than 84 percent of people living with HIV were diagnosed and

linked to care within one month of diagnosis. However, only 38 percent of those diagnosed were retained in care, far below the national goal of 90 percent. Only 50 percent of those diagnosed were virally suppressed, far below the national goal of 80 percent. And, like new diagnoses, disparities exist among persons living with HIV.

- 81 percent of people living with HIV were men.
- 62 percent of people living with HIV were gay, bisexual, and other MSM.
- 47 percent of people living with HIV were Black.
- 57 percent of people living with HIV were ≥45 years of age, indicating an aging HIV epidemic.
- Persons living with HIV were highly concentrated in certain geographic areas.

For more information about Chicago's HIV epidemic, please see the [2018 Chicago HIV/STI Surveillance Report](#).

### Guiding Strategies

Changes to the CDPH HIV Services Portfolio were informed by national and state initiatives aimed at ending the HIV epidemic.

This year, the federal government launched the *Ending the HIV Epidemic 2030* initiative (EHE 2030). EHE 2030 supports a 90 percent reduction in new HIV infections by 2030 by focusing on four strategies:

- Diagnosing all people with HIV as early as possible;
- Treating infection rapidly and effectively to achieve sustained viral suppression;
- Preventing new HIV transmission by using proven interventions, including PrEP and syringe services programs; and
- Responding quickly to potential HIV outbreaks to get needed prevention and treatment services to people who need them.

Chicago, on behalf of Cook County, is one of EHE 2030 focus jurisdictions, along with 47 other high HIV burden counties, Washington, D.C., San Juan, Puerto Rico, and seven states.

Visit [here](#) to learn more about EHE 2030.

This year, the *Getting to Zero Illinois* (GTZ) plan was released. The plan was developed through an intensive three-year process that included hundreds of contributors. GTZ aims for a 20 percentage point increase in both viral suppression and PrEP use by focusing on six domains:

- Building the future workforce;
- Increasing access to healthcare;
- Improving health equity;
- Increasing efficiency through governmental coordination;
- Caring for linked co-occurring conditions; and
- Measuring our progress through surveillance and other data.

Visit [here](#) to read the Getting to Zero Illinois plan.

## **Planning**

### Planning and Stakeholder Engagement

Between 2016 and 2018, CDPH led a 25-month planning process to inform the development of its HIV Services Portfolio. CDPH worked closely with the Chicago Area HIV Integrated Services Council (CAHISC), our EMA's federally mandated advisory council that has the authority (through federal law) to make decisions about how HIV resources are allocated in the Chicagoland area. CAHISC has 35-40 members representing providers and the communities most impacted by HIV. Of CAHISC members:

- ~73% are Black or Latinx.
- ~35% are cisgender Black women.
- ~30% self-identify as gay, bisexual, and other MSM.
- ~35% are people living with HIV.

In partnership with CAHISC, CDPH developed and released its first proposal for enhancing HIV services in the Chicago EMA in November 2016. Stakeholders expressed serious concern in response to this first proposal, asking CDPH to provide more time to collect and integrate feedback into the model. CDPH agreed and extended the planning process an additional 12 months. To make this possible, CDPH worked with the city's Office of Budget and Management (OBM) to extend all 2016 HIV contracts through the end of 2017. (Subsequently, CDPH and OBM extended some contracts for additional time in 2018 to stagger the release of requests for proposals (RFPs)).

To honor stakeholders' requests for additional opportunities to provide input, CDPH and CAHISC convened numerous community forums and focus groups in 2017. Participation was diverse and inclusive, and over 230 residents participated in these meetings. Focus group participants represented communities disproportionately impacted by HIV: Black and Latino gay, bisexual, and other MSM; Black and Latina transgender women; and cisgender Black heterosexual women. See Attachment 1 for a detailed summary of these activities.

### Helping Organizations Prepare for Funding

In addition to these community-oriented engagements, CDPH offered several opportunities to existing delegate agencies and other providers to help them to prepare for, inform, and influence the final HIV Services Portfolio.

- Community organizations, including CDPH delegate agencies, attended and provided feedback at monthly CAHISC meetings. CAHISC meetings are open to the public and advertised widely.
- CDPH held in-person meetings with existing coalitions and groups in Chicago, including the Westside Health Advocacy Resource Providers, the Southside Health Advocacy Resource Providers, the Black Treatment AIDS Network, the Services Providers Council (SPC) (convened by the AIDS Foundation of Chicago (AFC)), and the AFC Medical Advisory Group.

- CDPH convened several large meetings with its Ryan White, HIV Prevention, and Housing delegate agencies to provide updates on the planning process, to gather input on the emerging HIV Services Portfolio, and to provide guidance on forthcoming funding changes.
- CDPH held one-on-one conversations with multiple delegate agencies to hear concerns and to discuss how organizations could prepare for forthcoming funding opportunities.
- CDPH hosted a day-long institute – *Collaborations to Enhance Comprehensive HIV Prevention, Care and Treatment Support* – facilitated by a CDC-funded capacity building assistance provider (07.25.2017). The institute was designed to help Chicagoland organizations explore collaboration and develop partnerships to increase the likelihood organizations would find a place in the new HIV Services Portfolio.
- In 2017, CDPH provided >\$800,000 in one-time funding to HIV prevention delegate agencies to support infrastructure and capacity development projects to help them prepare for the new HIV Services Portfolio.
- CDPH provided two grant-writing trainings (04.16-17.2018 and 04.19-20.2018) to help organizations develop skills to respond to forthcoming RFPs.

Following this extensive community and provider engagement process, CDPH finalized the new HIV funding portfolio in mid-2018. In July 2018, CAHISC voted overwhelmingly to approve the new portfolio’s funding allocations, as required by law. See Attachment 2 for a detailed timeline of the community engagement process.

### The HIV Services Portfolio

The final HIV Services Portfolio is organized into four categories.

- **Health Equity** – Resources are invested in projects that address root causes of health disparities, including systemic racism.
- **Housing** – Resources are invested in projects that increase access to safe, stable housing for people living with and vulnerable to HIV.
- **Healthcare** – Resources are invested in projects that increase access to HIV treatment and PrEP, including supportive services (e.g., behavioral health, psychosocial support) to help people stay engaged in healthcare.
- **How-to** – Resources are invested in projects that raise awareness, educate communities, and link communities to needed services.

All funded projects are guided by six principles.

- **Getting to Zero** – All projects will align with the State’s Getting to Zero plan.
- **Undetectable = Untransmittable (U=U)** – All projects will follow current science which tells us that people living with HIV who are durably virally suppressed cannot transmit HIV to sexual partners.

- **Deconstructing Racist Systems** – All projects will actively work to reframe and dismantle systems that perpetuate privilege, such as policies and practices that remove barriers to employment, retention, promotion, and staff development.
- **Trauma Prevention and Trauma-Informed Care** – All projects will work to ensure services are free from trauma.
- **Cultural Responsiveness** – All projects will ensure services are culturally and linguistically appropriate.
- **Health Equity** – All projects will allocate resources and services to people and areas with the greatest need.

The HIV Services Portfolio also follows federal priorities and/or requirements, since more than 90 percent of CDPH HIV funding comes from the federal government. All funded projects will be closely monitored to ensure they promote equitable achievement of outcomes related to viral suppression and PrEP use.

Together, newly funded projects will provide culturally appropriate and responsive care and treatment to more than 22,000 people living with HIV, primarily Black and Latinx individuals, and PrEP to more than 10,000 people, primarily Black and Latino gay, bisexual, and other MSM.

## **Procurement**

After the HIV Services Portfolio was approved by CAHISC, CDPH initiated the release of funding opportunities.

CDPH used two funding mechanisms to solicit applications for funding: RFP and Request for Qualifications (RFQ) + RFP. The RFQ + RFP process was a proactive step to level the playing field for smaller, community-based organizations by allowing them to qualify on their own merits, rather than being judged against other organizations. See Attachment 3 for a list of RFQs and RFPs.

CDPH provided several opportunities to prepare potential applicants for the procurement process.

- CDPH held webinars (01.11.2018, 02.01.2018, 05.24.2018, 01.10.2019) and in-person information sessions (02.26.2018 and 03.15.2018).
- CDPH outreached to all existing delegate agencies to discuss anticipated 2018-2019 funding opportunities and timeline.
- CDPH hosted bidders' conferences for all RFQs and RFPs.
- CDPH posted online responses to questions asked about all RFQs and RFPs.

Once received, every application went through a two-step evaluation process. First, applications were reviewed to ensure compliance with and adherence to requirements set forth in the RFQ or RFP. Second, applications were evaluated by review panels to determine the extent to which applicants answered questions related to specified RFQ and RFP requirements, including a demonstrated track record of serving priority communities. Review panels were diverse and included qualified subject matter experts. Review panel recommendations were submitted to CDPH leadership who made final

funding decisions that ensured geographic coverage of services across the Chicago EMA. In all cases, funding decisions followed review panel recommendations.

### **Funding Opportunity Outcomes**

RFQs – CDPH released seven RFQs in 2018 and received 82 RFQ applications. Sixty applications received a passing score, representing 32 unique organizations. These organizations were invited to submit applications to subsequent RFPs. Only six organizations were deemed not qualified across all RFQ categories for which they applied. Some of these organizations subsequently received funding under stand-alone RFPs or through sub-contracts.

RFPs – CDPH released 18 RFPs in 2018 and 2019 and received 87 RFP applications. Fifty-five applications received a passing score, representing 41 unique organizations. See Attachment 4 for a summary of RFP outcomes, including sub-contractors. Twelve organizations did not receive a passing score on any application. Two-thirds of these organizations subsequently received funding through sub-contract, as detailed below and summarized in Attachments 4 and 5.

Funding opportunity outcomes have not been finalized for Marketing. In total, CDPH is delegating approximately \$41M to external organizations to implement the HIV Services Portfolio.

### **Contracts**

CDPH has executed contracts with most delegate agencies. The remaining contracts are nearing completion.

All funded services focus on one or more of the following communities: people living with HIV, primarily Black and Latinx individuals; Black and Latino gay, bisexual, and other MSM; cisgender Black heterosexual women; and Black and Latina transgender women. Over 80 percent of HIV care/treatment clients and housing clients are Black and/or Latinx.

Of the funded organizations (not sub-contractors), approximately 60 percent are non-medical organizations, and many are population-specific (e.g., LGBT, Black, Latinx, youth/children, homeless/unstably housed, persons who use drugs).

Most funded projects are not limited to a specific geographic area to ensure we reach communities across the city. These projects are funded to provide services city wide.

Three projects are geographically oriented: Population Centered Health Homes, Essential Supportive Services, and Primary Care. Together, these three categories represent just under half of all delegated funding – about \$18M. Funding amounts for these projects were determined based on the number of people each organization proposed to serve, i.e., larger funding amounts require organizations to serve more people. The locations of service sites for these projects match HIV disease burden and will provide accessible care across the Chicagoland area. CDPH funding significantly expands the number of local service sites. Preliminary analysis shows:

- 34 (30%) sites are on the south side = \$6,252,268 (34%);
- 29 (25%) sites on the west side = \$4,260,176 (24%);
- 24 (21%) sites are on the north side = \$4,162,488 (23%); and
- 27 (24%) sites are in the suburbs = \$3,462,260 (19%).

See Attachment 6 for maps of service sites and Attachment 7 for a list of site locations.

### **Sub-contracts**

CDPH delegate agencies have proposed 75 sub-contracts with nearly 41 unique organizations, 23 of which are not funded elsewhere in the portfolio. See Attachment 5 for a list of anticipated sub-contractors.

Including sub-contracts, we estimate that four organizations who applied for funding will not receive any (directly or through sub-contract). One is located on the north side, one on the south side, and two offer citywide services.

### **Internal CDPH Changes**

The HIV Services Portfolio intentionally pushes CDPH delegate agencies and other community partners to strengthen practices that improve access to services and health outcomes, specifically durable viral suppression and PrEP use. Similarly, the portfolio pushed CDPH to change and improve our work to support delegates and community partners.

To start, the CDPH HIV/STI Bureau Community Health Services Division (CHS) has been redesigned to better match funding priorities, moving away from stand-alone programs, such as Ryan White and HIV Prevention. CHS team members are now organized into five teams:

- *Healthcare Access* – The Healthcare Access team supports projects that promote access to and use of antiretroviral medications (ARVs) for HIV treatment and PrEP. Projects include Population Centered Health Homes, Essential Support Services, and HIV Primary Care.
- *Community Development* – The Community Development team supports projects that address the intersections of HIV and social determinants of health, with the intention of creating systems-level change to support access to healthcare and wellbeing on a population-level. Projects include Community Development (focusing on Black and Latino gay, bisexual, and other MSM; Black and Latina transgender women; and cisgender Black heterosexual women), Services for Persons who Use Drugs, and Marketing.
- *Housing* – The Housing team supports projects that ensure individuals, regardless of HIV status, have access to safe and stable housing and to the services they need. Projects include tenant-based rental assistance and facility-based housing assistance for people living with HIV, housing for Black and Latino men who use PrEP, and HIV Resource Coordination.
- *Capacity Building and Technical Assistance (CBA/TA)* – The CBA/TA team provides organization development activities to support delegate agencies, including consultation, assessments,

resource coordination with external CBA/TA providers, and, when appropriate, direct CBA and TA to enhance organizations' people, processes, and planning.

- *Fiscal Compliance* – The Fiscal Compliance team is responsible for ensuring efficient delegate agency contracting and reimbursement.

## **Conclusion**

As CDPH concludes its funding process, we recognize the process has surfaced critical issues that we must work together to address, including longstanding injustices. These will take our collective efforts to overcome. The process also elevated many new ideas and actions that will allow us to make important strides over the next decade, including significantly increasing the number of people who receive high quality, responsive services and who successfully use ARVs for HIV treatment and PrEP. We are eager and excited to continue working with partners to end the HIV epidemic in the next decade.

	The Board of Trustees of University of IL	1,500,000	Alexian Brothers
	University of Chicago	1,450,000	Chicago Family Health Center, Haymarket Center, Heartland Alliance Health, Friend Family Health Center, Howard Brown Health, TCA Health
		Sub-total	16,153,804
Essential Supportive Services 5 applications; 4 awards	Center on Halsted	269,786	
	Chicago House and Social Service Agency	360,072	Heartland Alliance Health
	McDermott Center DBA Haymarket Center	360,072	
	South Side Help Center	360,072	AIDS Healthcare Foundation, CALOR, Universal Family Connection
		Sub-total	1,350,002
HIV Primary Care 4 applications; 3 awards	AIDS Healthcare Foundation	250,000	
	Loyola Medical Center	177,876	
	South Shore Hospital	205,510	Chicago Women's AIDS Project
		Sub-total	633,386
HIV Screening in Healthcare Settings 3 applications; 1 award	University of Chicago	1,500,000	Beloved Community Family Wellness Center, Chicago Family Health Center, Community Health, Friend Family Health Center, Holy Cross Hospital, Howard Brown Health, Lawndale Christian Community Health Center, Mercy Family Medical Center, Rush, Sinai Health System, TCA Health, The Board of Trustees of the University of IL
		Sub-total	1,500,000
Financial Assistance 3 applicants; 1 award	AIDS Foundation of Chicago	850,000	
		Sub-total	850,000
Foodbank and Home Delivered Meals 3 applicants; 3 awards	Catholic Charities-Archdiocese of Chicago	118,362	
	Heartland Health Outreach	716,638	
	Puerto Rican Cultural Center	115,000	
		Sub-total	950,000
Medical Case Management 2 applicants; 1 award	AIDS Foundation of Chicago	4,557,900	Agape Missions, CALOR, Catholic Charities of Lake County, Chicago House, Cook County Health, Healthcare Alternative Systems, Heartland Alliance Health, Howard Brown Health, Michael Reese Foundation, Open Door Health Center of IL, Puerto Rican Cultural Center, Sinai Health System, South Side Help Center, The Board of Trustees of University of IL, TPAN, University of Chicago
		Sub-total	4,557,900
Other Professional Services 3 applicants; 3 awards	Legal Assistance Foundation	284,000	
	Legal Council for Health Justice	394,000	
	Prairie State Legal	172,000	
		Sub-total	850,000

<sup>1</sup> Population Centered Health Home (PCHH) funding awards vary because awards are based on the total number of people served by each PCHH, i.e., PCHH receiving larger awards are required to serve more people.

Category	Agency	12-Month Award	Sub-Contracts
<b>HOW-TO</b>			
HIV Resource Coordination Hub <sup>2</sup>	AIDS Foundation of Chicago/Center on Halsted	1,800,000	Asian Human Services, Chicago House, Cook County Health, FOLA, Legal AID Chicago, Puerto Rican Cultural Center
	Sub-total	1,800,000	
	<b>TOTAL</b>	<b>40,421,075</b>	

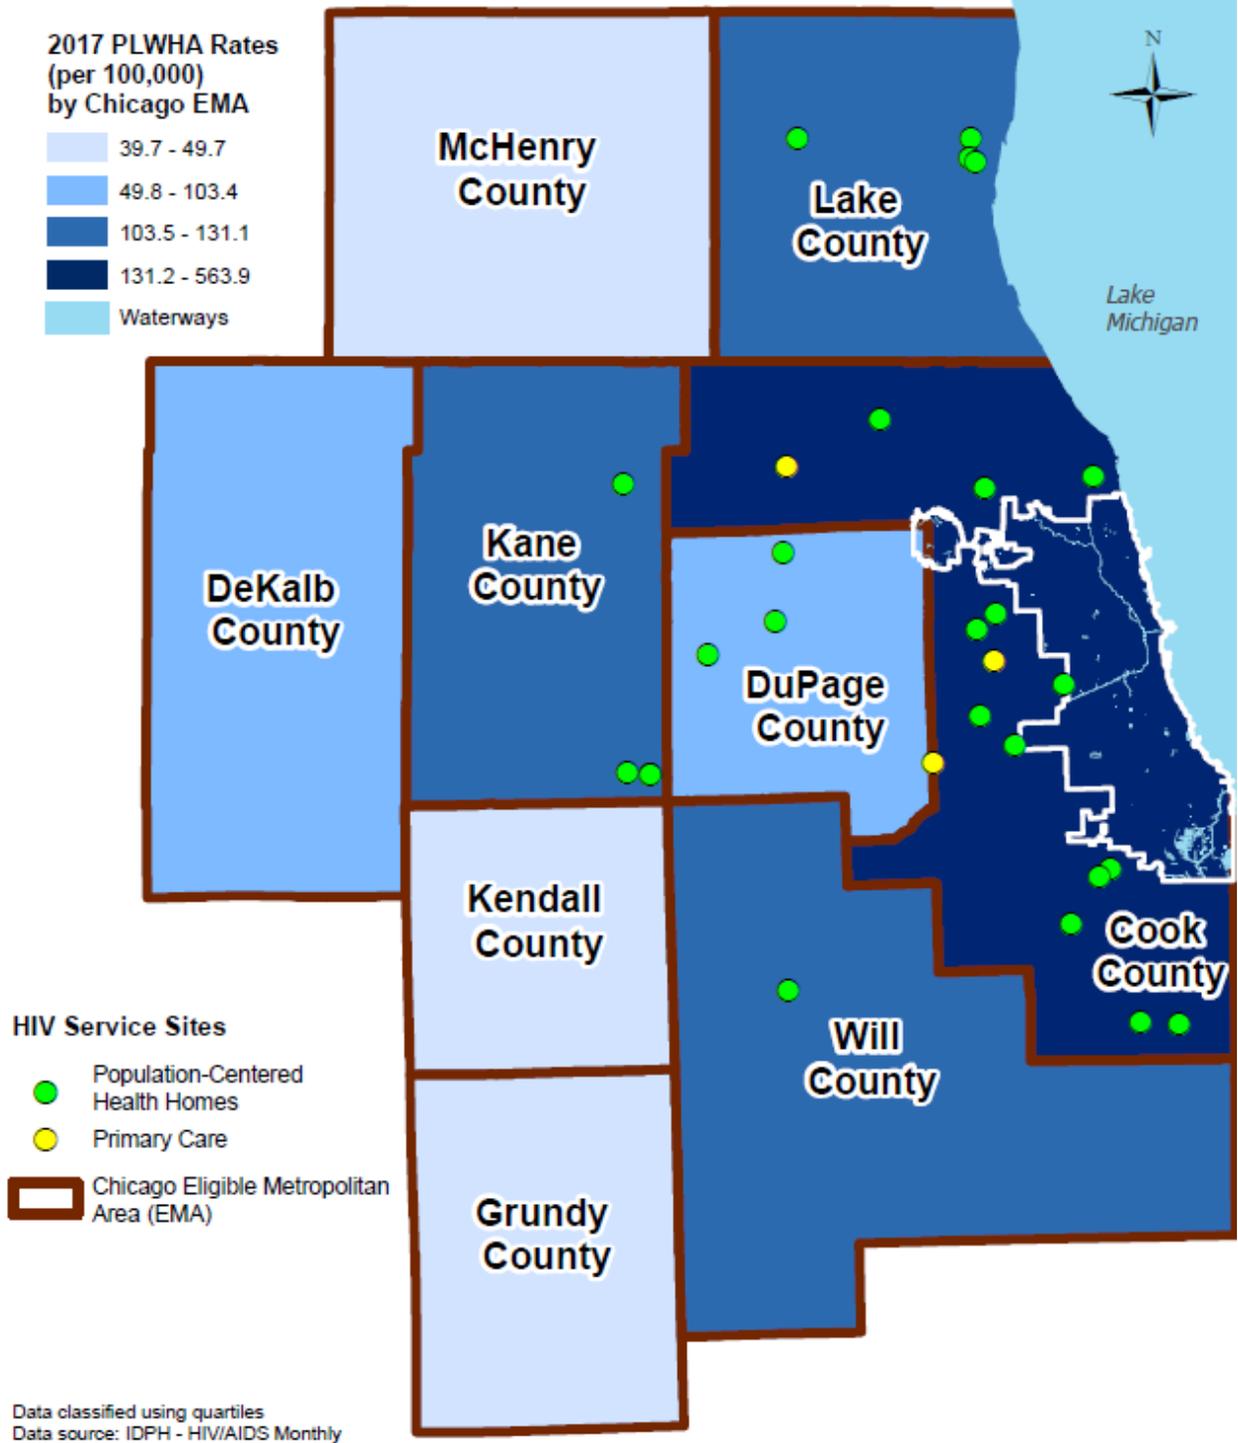

<sup>2</sup> The HIV Resource Coordination Hub was funded through a non-compete award. AIDS Foundation of Chicago (AFC) and Center on Halsted (COH) were the only organizations that qualified for the Hub through a competitive RFQ. AFC and COH expressed mutual interest in partnering in this endeavor. Since no other organizations were eligible for funding in this category, CDPH agreed. Accordingly, no competitive RFP was released.

Anticipated Sub-contractors (41)

**Local HIV Service Sites of Select CDPH-Funded Programs and 2017 HIV Prevalence Rate by Eligible Metropolitan Area (EMA) (as of 7/28/2019)**

## Local HIV Service Sites of Select CDPH-Funded Programs and 2016 HIV Prevalence Rate by Community Area, Chicago

Data source: CDPH, Enhanced HIV/AIDS Reporting System (as of 09/26/18), City of Chicago GIS Shapefiles, and U.S Census. This map represents 68% (16,270/23,880) of people living with HIV/AIDS. The economic hardship index utilizes multiple indicators to measure economic conditions of Chicago Community Areas. High hardship index scores indicate worse economic conditions.
