

PUBLIC HEALTH VENDING MACHINE PILOT PROGRAM

CDPH operates 5 Public Health Vending Machines in Chicago to extend harm reduction and overdose prevention supplies to people in Chicago at no cost. Individuals may request PIN codes to access materials.

OVERVIEW

- This is a one year pilot program. CDPH will evaluate the effectiveness and feasibility of operating this type of harm reduction program.
- All five machines have Narcan (naloxone), the medication that reverses an opioid overdose. The machines also contain a variety of harm reduction materials.
- PIN codes are used to access the machines.
- No individual PIN code is needed to access Narcan in the machines, simply key in "1234" and the item number. This information is also available on every machine.
- Visit chicago.gov/vendingmachines to learn more or request a PIN code. PIN codes are also available through select partner agencies.

LOCATIONS & TIMELINE

CDPH chose the five locations for the vending machines based on a series of focus groups and surveys with people who use drugs, providers, and community members, as well as data analysis related to overdose hotspots. The pilot program operates in the North, West, Central, and South parts of the city in order to understand access and engagement in these different areas.
