EQUIPMENT INFORMATION

TYPE OF MACHINE:

DRY TO DRY

TRANSFER

MAKE AND MODEL:

NUMBER OF UNITS:

TYPE OF CLEANING SOLVENT: PERCHLOROETHYLENE PETROLEUM DISTILLATE
 OTHER: _____

TYPE OF CONTROL DEVICE: REFRIGERATED CONDENSER

CARBON ADSORBER

GENERAL INFORMATION

1) DOES FACILITY HAVE A CURRENT IEPA OPERATING PERMIT? YES NO NA
 (IEPA Permit is required if 360 gallons or more of perchloroethylene is purchased per year)

2) IF YES, PERMIT NUMBER: _____ EXPIRATION DATE: _____

3 IF NO, HAS APPLICATION BEEN SUBMITTED TO IEPA? YES NO

4) If control devise is a refrigerated condenser, is the air -perc gas -vapor stream contained within each dry cleaning machine routed through the refrigerated condenser? YES NO NA

GENERAL INFORMATION CONTINUED

5) Is the refrigerated condenser operated so as to not vent or release the air-perc gas- vapor stream contained within the dry-cleaning machine to the atmosphere while the dry cleaning machine drum is rotating? YES NO NA

6) If the control device is a carbon adsorber, is the air-perc gas vapor stream contained within each dry cleaning machine routed through the carbon adsorber? YES NO NA

7) Are all perc and waste containing perc kept in covered containers with no leaks? YES NO

8) Are cartridge filters drained in their housing or sealed containers for 24 hours before removing them from the facility? YES NO NA

9) Are machine doors closed at all times except when loading or unloading machine? YES NO

10) Are machine components(hose and pipe connections, fittings, couplings, valves, door gaskets, filter gaskets, pump, solvent tanks and containers, water separators, etc, etc) inspected for leaks as required by the regulation (small area sources: biweekly; large area sources: weekly), that are obvious from sight, smell, or touch while the machine is operating? YES NO

11) Is a log of inspection dates, name and location of leaks and repairs done maintained? YES NO

12) For refrigerated condenser, is a log of the date and records of temperature monitoring results maintained? YES NO
