

Arboviral Surveillance Report

September 18, 2017

Surveillance

This report provides data on week 37 of surveillance for West Nile virus (WNV) in mosquitoes and includes data on other surveillance indicators. We have successfully placed gravid traps throughout the City of Chicago and continue to monitor them twice a week for the duration of the mosquito-breeding season. One (1) mosquito pool tested positive for WNV.

Mosquitoes (data from 80 traps)

Week 37 (09/10/17 – 09/16/17)	
Total Collections (Number of Traps X Frequency of Collection)	153
Number of Female <i>Culex</i> Trapped and Tested	570
Number of Pools Tested	94
Number of Pools Positive	1
Number of Community Areas with Positive Mosquito Pools	1
Cumulative Totals	
Total Collections (Number of Traps X Frequency of Collection)	2,194
Number of Female <i>Culex</i> Trapped and Tested	13,018
Number of Pools Tested	1,391
Number of Pools Positive	173
Number of Community Areas with Positive Mosquito Pools	26

Community Areas with Positive Mosquito Pools (Cumulative): Archer Heights, Austin, Avalon Park, Avondale, Belmont Cragin, Beverly, Chatham, Chicago Lawn, Dunning, East Garfield Park, Edison Park, Forest Glen, Gage Park, Greater Grand Crossing, Hegewisch, Lincoln Park, Lincoln Square, New City, O'Hare, Pullman, Riverdale, South Deering, South Lawndale, Washington Heights, West Pullman, West Town.
