2850 S. Michigan Avenue
Chicago, Illinois 60616

November 13, 2020

EXECUTIVE SUMMARY

K-Plus Engineering Services, LLC (K-Plus) has completed a Phase I Environmental Site Assessment (ESA) of the commercial property located at 3401 West Ogden Avenue in Chicago, Illinois. This Phase I ESA was conducted in conformance with ASTM Practice E 1527-13, Standard Practice for Environmental Site Assessments. The purpose of this Phase I ESA was to determine whether any Recognized Environmental Conditions (RECs), as defined in ASTM 1527-13, exist on the Subject Property.

Visual Reconnaissance - The Subject Property was located within an PD-833 zoned area of Chicago, Illinois. At the time of our site reconnaissance, the Subject Property consisted of approximately 0.63 acres and was noted as undeveloped paved parking lot. The Subject Property appeared to be in fair overall condition, with no evidence of significant spills or staining noted on the asphalt/concrete paved areas.

Historical Information – Historical research indicated that the Subject Property was historically developed with retail/commercial buildings dating back to the 1920s, by the 1980s these historic commercial properties along Ogden Avenue were noted as cleared for larger style commercial developments, by the early 2000s the Subject Property was noted as undeveloped paved parking.

Database Information – The Subject Property was identified on the environmental databases historic business included: a rug cleaning, automotive repair facility, and a phonograph manufacturer, which included the use of underground storage tanks.

Evaluation – K-Plus Engineering Services, LLC has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM 1527-13 for the Subject Property located at 3401 West Ogden Avenue in Chicago, Illinois. This assessment has revealed evidence of the following recognized environmental conditions (RECs) in connection with the Subject Property:

- Historic uses of the Subject Property included: rug cleaning, automotive repair services, and a phonograph manufacturer; all of which are considered historic businesses which may have used hazardous substances and petroleum products.
- City of Chicago historic Department of Environment records confirm the installation of at least one underground storage tank on the Subject Property in 1951, removed in 2003.

Based on the information uncovered during the Phase I ESA, the only way to definitely determine if the historic operations on the Subject Property have had a negative impact on the subsurface soils would be to conduct a subsurface investigation. Details of our evaluation and recommendations are discussed in the following sections of this report. The Executive Summary, while an integral part of a Phase I ESA report, is not intended to be a stand alone report, and thus the entire report must be read to fully understand the findings and recommendations for the Subject Property.

1.0 INTRODUCTION

Authorization to perform this Phase I ESA was given by Eastlake Management and Development Corp. (Client) to K-Plus Engineering Services, LLC (K-Plus) on November 2, 2020.

1.1 Purpose

This Phase I ESA was completed to provide an objective, independent, and professional opinion of the possible presence of Recognized Environmental Conditions (RECs) or other possible environmental concerns (if any) associated with the Subject Property at the time of the site reconnaissance.

As defined in ASTM E 1527-13, the term *Recognized Environmental Condition* means "...the presence or likely presence of any hazardous substances or petroleum products in, on, or at the property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment." In addition, the term *Historical Recognized Environmental Condition* means "... a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls..." Lastly, the term *Controlled Recognized Environmental Condition* means "... a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required control." Performance of the Phase I ESA was intended to reduce, but not eliminate, uncertainty regarding the existence of Recognized Environmental Conditions in connection with the Subject Property.

The objective of this assessment is to perform a due-diligence and all appropriate inquiry regarding the environmental condition of, and assess potential liability for, any contamination on the site in order to satisfy Landowner Liability Protections (LLPs) requirements.

1.2 Scope of Services

The Phase I ESA was conducted in general conformance with the ASTM Designation: E 1527-13, *Standard Practice for Environmental Site Assessments Process*.

The scope of work for this Phase I ESA was structured to offer a phased, systematic approach to evaluating site conditions. It included inquiry by and/or under the direct supervision of an Environmental Professional (as defined in ASTM Standard Practice E1527-13) and it included the following tasks consistent with the AAI Rule, the revised ASTM Standard, and Illinois Phase I requirements:

- A review of reasonably ascertainable and practically reviewable standard and supplemental record sources associated with the Subject Property and adjoining properties including, but not limited to: historical resources (e.g., aerial photographs, topographic maps, fire insurance maps, geographical and geological maps, and city directories,) environmental databases (i.e., lists of known sites of contamination and regulated facilities), governmental records (e.g., Federal and State files, building department records, and local fire department records) and prior environmental and geotechnical reports (if provided);
- An inspection of the Subject Property and any improvements as well as visual observations of adjacent properties, and other sites and/or facilities in the vicinity of the Subject Property;
- Formal interviews with present and past (if any) owners, operators, and occupants of the Subject Property (as identified by the Client and/or record sources) and local government officials; and
- Evaluation of the information gathered and preparation of a written report that includes all supporting documentation and details all findings, conclusions, opinions, and any recommendations.

Additionally, as is deemed pertinent, the scope of work was expanded to include potential environmental concerns, such as the existence of asbestos-containing materials that are not required pursuant to the ASTM standards.

1.3 Significant Assumptions

No significant assumptions were made during the course of this Phase I ESA.

1.4 Limitations and Exceptions

K-Plus performed the Phase I ESA using the degree of care and skill ordinarily exercised under similar circumstances by reputable environmental consultants practicing in this or other localities. No other warranty is expressed or implied. Information presented in the Phase I ESA is deemed reliable; however, there cannot be a guarantee that all potential environmental conditions have been located or identified. The conditions observed and evaluated during the site inspection are representative of the date(s) stated. Materials and conditions that are concealed or are inaccessible may not be discovered.

The lack of visible evidence of potential USTs and/or the fact that individual and agencies identified in this report may not be aware of, or do not have records of, the current presence of USTs does not preclude the possibility that USTs could be present at the Subject Property. Visible evidence of USTs, such as fill ports or vent pipes may have been obscured from view, and USTs could have been used at the Subject Property without the knowledge of the current owner/operator, site contact, or government agencies.

The findings, conclusions, and opinions expressed herein are based on reasonably ascertainable and practically reviewable information disclosed through interviews and publicly available records at the time of the Phase I ESA. The statements contained herein, on which our observations, opinions, and conclusions were based, are deemed factual. The reported analyses, opinions, observations, and conclusions are unbiased, professional, and limited only by the reported assumptions, qualifications, and conditions stated herein. All information in this report is from sources deemed to be reliable; however, no representation or warranty is made as to the accuracy thereof. K-Plus cannot be responsible for the quality and content of information obtained from the external sources consulted or for conditions that are concealed, not fully disclosed, or not available at the time of the Phase I ESA.

1.5 Special Terms and Conditions

The Phase I ESA was completed in accordance with terms and conditions provided by the Client.

1.6 User Reliance

This assessment has been performed in conformance with all applicable legal requirements and accepted practices prevailing in the environmental assessment and asbestos consulting industries, including the U.S. Environmental Protection Agency's final "All Appropriate Inquiry" Rule (70 Fed. Reg. 66070) ("AAI Rule"), the 2013 update of the American Society for Testing and Materials (ASTM) Standard Practice for Phase I Environmental Site Assessments (E 1527-13) and the requirements of 415 ILCS 22.2(j)(6)(E), the "Illinois Phase I". The standard of care employed during this investigation should be sufficient to meet the definition of an "innocent landowner" under current environmental laws. If this Phase I ESA report is more than 180 days old, certain sections must be updated in order to maintain qualification for LLPs afforded under CERCLA.

The K-Plus professional(s) that prepared this assessment meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312 and have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Subject Property.

K-Plus, its officers, and its employees have no present or contemplated interest in the property or the parties involved. Our employment and compensation for preparing this report are not contingent upon any action or event resulting from the analyses, opinions, observations, or conclusions, in or from the use of, this report.

This report is confidential and has been prepared specifically for the use by our Client. No third party may use the information in this report without obtaining the permission of both K-Plus and the clients, for whom this report was prepared. In no event may this report be used in whole or in part in any public offering or security without the prior written consent of K-Plus. No abridgment, abstracting, or excerpting of this report may be made for any purpose whatsoever without obtaining the permission of K-Plus.

2.0 SITE RECONNAISSANCE

The site reconnaissance is conducted to assess the potential of a release or imminent threat of a release of a petroleum/hazardous substance and/or waste based on the current activities performed at the Subject Property.

The site reconnaissance was conducted on Friday, November 13, 2020 by Mr. Daniel Caplice, Environmental Inspector for K-Plus. Mr. Caplice was not accompanied during the site inspection since the property is vacant and thus there are no access restrictions in place. The weather conditions at the time of the visit were sunny with an approximate temperature of 45°F. As a tool in preparing this report and documenting the conditions encountered at the property, various photographs of the Subject Property, surrounding land use, and other relevant features were taken and are included in Appendix 1.

2.1 Site Location

The Subject Property was located on the south side of W. Ogden Avenue between its intersections with S. Homan and S. Trumbull Avenue; specifically at: 3401 West Ogden Avenue in Chicago, Illinois (Figure 1).

Figure 1 – Site Location Map

2.2 PIN & Legal Description

The Cook County Assessor's Parcel Identification Number (PIN) for the Subject Property was identified as:

16-23-418-001

16-23-418-002

16-23-418-003

16-23-418-004

16-23-418-005

16-23-418-006

16-23-418-007

The legal description for the property was not provided.

2.3 Site Features/Improvements

The Subject Property measured approximately 0.63 acres (27,711 square feet (ft²)) and was currently an undeveloped paved lot used for parking.

2.3.1 Exterior Observations

2.3.1.1 Pits, Ponds or Lagoons

K-Plus did not observe any pits, ponds or lagoons, stressed vegetation, noxious odors or other indications of improper use, storage and/or disposal of hazardous substances on the Subject Property.

2.3.1.2 Stained Soil or Pavement

K-Plus did not observe any evidence of any spills or releases of petroleum/hazardous substances, nor was fly dumping evident at the Subject Property.

2.3.1.3 Stressed Vegetation

K-Plus did not observe any obvious signs of environmental concerns, such as stressed vegetation, at the Subject Property.

2.3.1.4 Solid Waste

The site did not appear to be filled or graded by non-natural causes (or filled by fill of unknown origin) suggesting trash, construction debris, demolition debris, or other solid waste disposal, or mounds or depressions suggesting track or other solid waste disposal on the site.

2.3.1.5 Wastewater

No wastewater streams were noted at the Subject Property, other than storm water runoff. Generally, pavements were observed to be sloped towards sewers, curbs and/or drains.

2.3.2 Interior Observations

No interior spaces were observed.

2.3.2.1 Heating/Cooling

None were noted

2.3.2.2 Stains or Corrosion

None were noted

2.3.2.3 Drains and Sumps

None were noted

2.3.3 Utilities and Potable Water Supply

Natural gas is provided by People's Energy, electricity is provided by Commonwealth Edison, and the building is connected to the City of Chicago's water and sewer systems. K-Plus did not observe any signs that the Subject Property was connected to private drinking water wells and/or a private septic system.

2.4 Current Use of the Subject Property

At the time of the site reconnaissance the property was noted as an undeveloped/paved city lot.

2.5 Past Use/s of the Subject Property

Historical research indicated that the Subject Property was historically developed with retail/commercial buildings dating back to the 1920s, by the 1980s these historic commercial properties along Ogden Avenue were noted as cleared for larger style commercial developments, by the early 2000s the Subject Property was noted as undeveloped paved parking.

2.6 Current Use of Adjoining Properties

The Subject Property was located in a mixed use area. Specifically, the Subject Property was bounded on the **north** by W. Ogden Avenue; on the **east** by Homan Avenue, followed by residential properties and paved parking lot for the adjoining Police Department Headquarters; on the **west** by Thrumbull Avenue and then by commercial properties; and on the **south** by a residential neighborhood (Figure 2).

Figure 2 – Site and Surrounding Area (Aerial 2018)

2.7 Physical Setting

2.7.1 Area Geology

In order to categorize and assess the geologic conditions encountered at the Subject Property, K-Plus consulted various sources of information including geological maps constructed by the Illinois State Geological Survey. Specific geologic maps used during this investigation include *Potential for Contamination of Shallow Aquifers by Land Burial of Municipal Wastes*; and *Potential for Contamination of Shallow Aquifers by Surface and Near-Surface Waste Disposal* by Berg, Richard C. et al (Berg Map) which were constructed to describe and map geologic materials to a depth of 50 feet throughout the state. In these maps, various geologic materials were differentiated by thickness, texture, permeability, and stratigraphic position in order to rate their relative contamination potential for aquifers in any area of the state.

According to the Berg Map, the regional geologic materials in the area are designated as type as an “E”-type soil (Figure 3). An “E” classification is described as uniform, relatively impermeable silty and clayey diamictos greater than 50 feet in thickness, with no evidence of interbedded sand and gravel.

Figure 3 – Berg Map

2.7.2 Topography

In general, the topography of the Subject Property was relatively flat, with no discernible elevation changes. According to the United States Geological Survey 7.5 Minute Series Topographic Map of Englewood, Illinois Quadrangle (2012), the Subject Property lies at a relative surface elevation of approximately 596 feet above mean sea level. Surficial and near surface groundwater is expected to follow topography. Regional groundwater flow in the area, however, is expected to flow in a easterly direction, towards Lake Michigan, which is the nearest significant surface body of water (Figure 4).

Figure 4 – Topographic Map

2.8 Facility Operations & Wastes

As previously mentioned, the Subject Property is currently undeveloped paved land and as such, no hazardous substances or petroleum products are used, generated and/or stored at the Subject Property. K-Plus did not observe any 55-gallon drums or other unidentified/unlabeled containers, or suspicious pools of liquid at the Subject Property, nor did K-Plus note any noxious or suspicious odors.

2.9 Storage Tanks

During the site visit, K-Plus did not observe any visual indications (i.e. vent pipes, fill pipes, unidentified pipes, etc.) of underground storage tanks (USTs) on the Subject Property. K-Plus did not observe the presence of any aboveground storage tanks (ASTs).

Additionally, K-Plus reviewed the Office of the Illinois State Fire Marshal (OSFM) database of registered USTs and the Illinois Environmental Protection Agency (IEPA) database of leaking UST (LUST) sites. The Subject Property was identified on the SPILLS and LUST databases, more information is found in Section 5 of this report.

Lastly, K-Plus reviewed the City of Chicago's online building permit database and the City of Chicago's Department of Public Health's (CDPH) online Tank Asset Database. The Subject Property was identified on the historic Department of Environment database of tanks for the installation of an underground storage tank in 1951 at the 3415 W. Ogden address for the historic business "SS Automotive". More information regarding this UST listing can be found in Section 5 of this report.

2.10 PCBs

The K-Plus inspector attempted to locate and identify all transformers or capacitors and, if present, to determine the age and owner of this equipment as well as its condition. During the inspection, K-Plus observed power lines along the southern property boundary in the public alley; at the southwest corner of the property a three-pole mounted transformer was observed. During the inspection of the transformer, the inspector noted that it appeared to be in good operating condition with no signs of leaking or staining evident on the pole or ground surrounding the unit. Finally, the unit was not marked with any black and yellow PCB warning stickers. A warning sticker is required by federal regulations for equipment containing between 50 and 500ppm PCBs or greater. ComEd, as the owner of the transformers, is responsible for keeping the equipment in compliance with federal, state, and local regulations and the cleanup of contamination resulting from leaking equipment, as necessary.

3.0 PRIOR REPORT

No prior environmental report was provided by the Client, the Owner, or the Site Contact; therefore, no evaluation of prior environmental reports was completed as part of this evaluation.

4.0 Historical Use Review

Pursuant to Section 8.3 of the ASTM standard, K-Plus consulted various historical sources to provide a history into the prior uses of the Subject Property and surrounding area to identify any environmental issues that may constitute RECs. Where feasible, K-Plus obtained sources which either date back to at least 1940 or the Subject Property's first development; depending on which date was earlier. The specific sources utilized are documented in Section 9.0 of this report, in Appendices when possible and a description of the information provided by the various sources are also in the following subsections.

Historical research indicated that the Subject Property was historically developed with retail/commercial buildings dating back to the 1920s, by the 1980s these historic commercial properties along Ogden Avenue were noted as cleared for larger style commercial developments, by the early 2000s the Subject Property was noted as undeveloped paved parking.

4.1 Aerial photographs

K-Plus conducted a search for historic aerals through historicaerials.com K-Plus reviewed aerial photos dated: 1938, 1951, 1952, 1962, 1972, 1973, 1983, 1988, 1999, 2002, 2005, 2007, 2009, 2010, 2011, 2012, 2014, 2015 and 2017.

Year	Subject Property	Surrounding Area
1938-1973	Subject Property developed with multiple retail/commercial properties.	Retail/commercial properties noted developed along Ogden Avenue, with the residential neighborhood developed in the surrounding areas.
1983-1988	Approximately three buildings noted present on the east and west ends; with some vacant land in between.	Undeveloped lots present along Ogden Avenue, surrounding residential neighborhood present.
1999-2002	Majority of site is undeveloped grassland; approximately two buildings noted on the east end of the property	Undeveloped lots present along Ogden Avenue, surrounding residential neighborhood present.
2005-2017	Paved Parking lot.	Surrounding area developed with industrial/commercial properties same/similar to those present in 2020.

4.2 Sanborn Fire Insurance Maps

K-Plus conducted a search of Sanborn Fire Insurance Maps through EDR and reviewed Sanborn maps dated: 1896, 1923, 1950, 1975, 1988, 1991, 1994, 2002, and 2004.

Year	Subject Property	Surrounding Area
1896	Subject Property was noted as developed with multiple one and two story retail/commercial “shops”.	The surrounding area was noted as finished with sparse single family residential structures and undeveloped lots and a few sparse commercial properties along Ogden Avenue.
1923	Subject Property was noted as developed with multiple retail/commercial “shops” from east to west including: “rug cleaning, commercial space, garage with showroom, and Ogden Phonograph (varnish room/tanks).	Much of the surrounding area was noted as developed by this time. Most city lots were noted as developed with commercial structures along Ogden Avenue; and residential neighborhoods surrounding.
1950	Subject Property was noted as developed with multiple retail/commercial “shops” from east to west including: “rug cleaning, commercial space, Auto Repair/Radiator, and Furne Novelty Factory (varnish room/tanks).	No significant changes
1975-1988	Subject Property was noted as developed with multiple retail/commercial “shops” from east to west including: “rug cleaning, machine shop, Auto Radiator Manufacturing, and unoccupied or combined with adjoining business.	Commercial properties along Ogden were noted as cleared for larger building redevelopments. No changes noted to the residential neighborhood.
1991-1994	Subject Property was noted as half developed; east half was noted with same/similar retail/commercial businesses, west half was noted as undeveloped	No significant changes.
2002-2004	Vacant/undeveloped lot.	No significant changes; except the adjoining east property was developed for parking/police station by 2004. No significant changes to the residential neighborhood.

4.3 Property Tax Files

K-Plus consulted the Cook County Assessor's virtual office for information on the Subject Property, which confirmed the construction dates and approximate land square footage for the property.

4.4 Recorded Land Title Records

The current ASTM standards do not impose a duty upon the environmental professional to conduct a review of recorded land title records, nor did Client request such a search; thus no official 50-year chain of title or environmental lien search was conducted as part of this assessment.

4.5 USGS Topographic maps

K-Plus reviewed historic topographic maps from: 1889, 1891, 1900, 1901, 1904, 1909, 1913, 1929, 1939, 1956, 1965, 1973, 1981, 1993, 1999, 2012, 2015, and 2018 through historicaerials.com.

Given the dense population of the area, the Subject Property's specific building/structures are not depicted on the topographic maps; the site is only noted as located in an area of development from 1889 through 2018.

4.6 Local Street Directories

K-Plus conducted a search for historic City Directories through EDR. The following table identifies the specific occupants for the Subject Property:

Date of Directory	Address:	Street:	Listed Occupant:
1994	3401	W OGDEN AVE	MONROE LIVERY DAY & NITE SVC

4.7 Building Department Records

K-Plus consulted the City of Chicago Department of Building's online database of building code violations and their online database of building permits. No results for the Subject Property addresses (3401-3423) were found within the Data Portal.

4.8 Zoning/Land Use Records

According to the City of Chicago Department of Planning and Zoning website, the Subject Property was zoned PD 833 – Planned Development.

4.9 User Provided Information/Interview/Questionnaire

A current property owner contact was not provided. A site representative for the property was interviewed:

- Are you aware of any environmental cleanup liens that have been filed or recorded against the site under federal, tribal, state or local law? **Answer:** No
- Are you aware of any activity or land use limitations, such as engineering controls, land use restrictions, or institutional controls, that are in place at the site and/or have been filed or recorded against the site in a registry under federal, tribal, state or local law? **Answer:** No
- Do you have specialized knowledge or experience related to the site or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the site or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business? **Answer:** No
- Are you aware of commonly known or reasonably ascertainable information about the site that would help the environmental professional to identify conditions indicative of releases or threatened releases? **Answer:** No
- Do you know of past uses of the site? **Answer:** No
- Do you know of specific chemicals that are present or once were present at the site? **Answer:** No
- Do you know of spills or other chemical releases that have occurred at the site? **Answer:** No
- Do you know of any environmental cleanups that have occurred at the site? **Answer:** No

Phase I Environmental Site Assessment

Grace Manor Apartments

3401 W. Ogden Avenue

Chicago, Cook County, Illinois

- Do you know of any pending, threatened or past litigation relevant to hazardous substances or petroleum products in, on or from the site? **Answer:** No
- Do you know of any pending, threatened or past administrative proceedings relevant to hazardous substances or petroleum products in, on or from the site? **Answer:** No
- Do you know of any notices from any government entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products? **Answer:** No
- Based on your knowledge and experience related to the site, are there any obvious indicators that point to the presence of likely presence of contamination at the site? **Answer:** No

5.0 FEDERAL/STATE ENVIRONMENTAL DATABASE REVIEW

Pursuant to Section 8.2 of the ASTM standard, K-Plus utilized Environmental Data Resources (EDR) to conduct a standard environmental record search. The purpose is to identify sites within a prescribed distance for the Subject Property, including the Subject Property itself, that are listed on the various environmental databases as they may have a potential impact on the Subject Property and thus constitute a REC. The specific databases consulted, the publication dates, and the search results are included in a database report included in Appendix 6.

The EDR database report identified the following sites within the standard ASTM search radius: two (2) RCRA generators; sixteen (16) LUST listings; eight (8) UST listings; nineteen (19) state IC/EC (institutional control/engineering control) listings; and thirteen (13) state SRP sites. Additional environmental records reviewed by EDR, but not required per ASTM standards, identified one (1) BROWNFIELDS listing; fifty-three (53) Tanks listings; two (2) Spills; four (4) RCRA Non generators; one (1) BOL listing; five (5) CHICAGO ENV listing; seven (7) EDR historic auto listings and six (6) EDR historic cleaners. No NPL, delisted NPL, or proposed NPL sites were identified within the search radii.

5.1 Subject Property

The Subject Property addresses were noted on the following environmental databases. **3401 Ogden** was identified on the Chicago ENV database; **3405 Ogden** was identified on the EDR historic cleaners database, which identifies properties on the city directories which are suspected to have included dry-cleaning operations based on the business name. City directories and historic Sanborn maps both identify a rug cleaning operations at this address which may have included dry-cleaning operations or simple laundry cleaning services; **3407 Ogden** was identified on the Chicago ENV database; **3411 Ogden** was identified on the Chicago ENV database; **3415 Ogden** was identified on the Chicago ENV database and on the TANKS database with the business name SS Automotive which registered installing a 1-2,000 gallon fuel oil tank in 1951 by the company “Water Tube Boiler and Tank”; **3423 Ogden** was identified on the Spills/BOL database for an incident number 20031815 reported to the LUST program at the IEPA. Further information in the database identifies this incident as a “leak or spill” of heating oil from a 2,000-gallon heating oil underground storage tank. The LUST incident information on the IEPA database notes the return of a 20 day and 45 day report for the incident. K-Plus consulted with the Illinois Environmental Protection Agency online document explorer and reviewed the 20 and 45 Day reports. According to the reports, during the development of the District 10 Police Headquarters (adjoining east property) one 2,500-gallon heating oil tank was discovered on December 9, 2003. The UST was removed by R.W. Collins and during excavation it was discovered the tank was surrounded by concrete walls/floor. It was surmised the tank was either located in a basement, or was vaulted; so while the tank had been damaged, and a leak reported to the appropriate agencies no samples of the surrounding soil/closure samples were collected at the time of the removal.

Heating oil releases are generally exempt from LUST regulations due to the relatively benign environmental concern. This incident can “elect not to proceed” and would be considered closed for all intents and purposes.

5.2 Adjacent/Nearby Properties

As part of this Phase I ESA, K-Plus conducted a limited drive-by investigation of the adjacent and nearby properties. No adjacent properties that appear to pose a significant environmental threat to the Subject Property were identified.

5.3 Surrounding Area Properties

Although some of the surrounding area properties are listed on the environmental databases, based on information obtained during this evaluation, the thick gray clay geology (which inhibits the migration of contaminants) in the area, and the likely direction of groundwater flow, it does not appear that any of the surrounding area properties pose a significant environmental threat to the Subject Property.

5.4 Vapor Encroachment Assessment

Per ASTM Standard E1527-13, impacts to the Subject Property from releases of hazardous/petroleum products is not limited to soil and groundwater, but includes vapor (gases). Thus, K-Plus conducted a Tier 1 for potential Vapor Encroachment Conditions (VECs) as defined by ASTM E2600 Vapor Encroachment Screen. More specifically, K-Plus evaluated the potential for on and/or off-site vapor migration by evaluating the current and historical usage of the Subject Property and surrounding area properties and by utilizing the regulatory agency database information that was summarized above to identify known plumes of contaminants on either the Subject Property and/or surrounding area properties.

The results of the limited Tier 1 screening indicated that no VECs exist that would constitute a REC because no known plumes of contamination exists at either the Subject Property or nearby properties, prior uses of the Subject Property and surrounding area do not include dry cleaners, gas stations or other environmentally risky operations, and the presumed ground water gradient (away from the Subject Property) and geologic conditions (low permeable silty clay) also limit vapor impacts to the Subject Property.

6.0 CONCLUSIONS AND RECOMMENDATIONS

Based on the information collected for the Subject Property during this Phase I ESA and pursuant to the requirements of ASTM Practice E 1527-13, K-Plus' conclusions and recommendations are as follows:

- The Subject Property was located within a mixed use area of Chicago, Illinois. The site was noted as paved parking lot at the time of the inspection.
- No evidence of current USTs ASTS was observed at the time of the site visit; however, the site appears on the databases and historic records confirm the former use of USTs/ASTs on the property.
- No adjacent or surrounding area properties were identified as posing a significant environmental risk to the Subject Property.
- No non-scope business environmental risks such as suspect asbestos-containing materials (ACMs), lead-based paint, and/or mold were noted at the Subject Property as the site is currently undeveloped.

In summary, this assessment has revealed evidence of the following RECs in connection with the Subject Property.

- Historic uses of the Subject Property included: rug cleaning, automotive repair services, and a phonograph manufacturer, which historically may have included the use of hazardous substances and petroleum products.
- City of Chicago historic Department of Environment records confirm the installation of at least one underground storage tank on the Subject Property in 1951; which was removed from the property in 2003.

Based on the information uncovered during the Phase I ESA, the only way to definitely determine if the historic operations on the Subject Property have had a negative impact on the subsurface soils would be to conduct a subsurface investigation.

7.0 DEVIATIONS

K-Plus has performed this Phase I ESA in conformance with the scope and limitations of ASTM Standard E 1527-13. This Report was prepared with the following limitations and exceptions:

1. While the historical use of the property was identified in every decade from 1889 to present time, the historical use was not always identified in 5 year intervals as required by the ASTM standard. Historical record reviewed indicates that the Subject Property use and development is as described herein. This data gap does not affect the ability of K-Plus to identify RECs at the property.
2. K-Plus hereby affirms that the city directory abstract and regulatory database searches for this Phase I ESA are subject to the limitations of Environmental Data Resources Inc. (EDR).
3. K-Plus was not provided with an environmental lien records search. However, a review of all standard environmental database searches did not reveal any evidence of environmental issues or liens for the Subject Property. In addition, site contacts were unaware of any environmental liens against the Subject Property.
4. No 50 year Chain-of-Title was provided by the client for evaluation. This data gap does not affect the ability of K-Plus to identify RECs at the property.
5. K-Plus was unable to conduct interviews of neighboring properties. Either the buildings were vacant or not open for business at the time of the inspection, or access/interviews were denied to neighboring properties. This data gap does not affect the ability of K-Plus to identify RECs at the property.
6. K-Plus did not conduct interviews of past owners, operators or occupants. K-Plus was able to interview the site representative familiar with the local area. This data gap does not affect the ability of K-Plus to identify RECs at the property.

8.0 NON-SCOPE ENVIRONMENTAL CONDITIONS

Per the request of the client, K-Plus evaluated the following non-scope considerations.

8.1 Asbestos

No assumptions regarding asbestos were made as the property is currently undeveloped.

8.2 Lead Paint

No assumptions regarding lead-based paint were made as the property is currently undeveloped.

8.3 Lead in Drinking Water

Municipal drinking water was supplied to residential and commercial properties in Chicago by the City of Chicago Water Department which received its drinking water from sources located one mile off-shore in Lake Michigan. According to the published 2019 Consumer Confidence Report, the reported lead concentrations were noted as 'not in violation' of drinking water standards.

8.4 Radon

According to the USEPA Map of Radon Zones in Illinois (1993), Cook County, the county in which the Subject Property lies, has been designated as Zone 2, which is deemed as having a moderate potential for radon. According to the Map, Zone 2 has a predicted average screening level of 2 to 4 pCi/L. As a comparison, the USEPA recommends that the radon level be under a concentration of 4 pCi/L. As the Subject Property is not currently being used for residential purposes, it is the opinion of K-Plus that radon is not currently an issue, and therefore no on-site radon testing was conducted.

8.5 Wetland & Flood Plain Review

The Subject Property was located within a developed area of Chicago, Illinois. No evidence of wetland resources were noted on the Subject Property. The area of the Subject Property was mapped on FEMA map 17031C0505J dated August 19, 2008, which is an unprinted panel. No determination regarding flood plain status was made.

8.6 Mold

K-Plus conducted a limited visual mold evaluation (i.e., visible mold growth, odor, and/or standing water) of readily accessible areas. K-Plus did not observe any mold in the building, nor were any areas of high moisture concentration or any evidence of water staining observed.

8.7 Other Non-Scope Considerations

No other non-scope considerations were made.

9.0 REFERENCES

1. Site Contact: K-Plus was unaccompanied during the site inspection since the Subject Property is vacant. The site contact answered questions appearing on the User Questionnaire regarding the Subject Property.
2. Aerial Photographs: An aerial photograph search was conducted through historicaerials.com. Information through this free website was noted as copywrite material and therefore was not included in the appendices. Aerial photographs dated: 1938, 1951, 1952, 1962, 1972, 1973, 1983, 1988, 1999, 2002, 2005, 2007, 2009, 2010, 2011, 2012, 2014, 2015 and 2017 were reviewed in conjunction with this investigation.
3. Sanborn Fire Insurance Maps: A Sanborn map search was conducted through Environmental Data Resources (EDR). Sanborn maps were available for the following dates: 1896, 1923, 1950, 1975, 1988, 1991, 1994, 2002, and 2004.
4. City Directory Search: Environmental Data Resources provided a City Directory Abstract for the Subject Property and surrounding addresses. A copy of the Abstract can be found in Appendix 4.
5. Zoning and Plat Maps: K-Plus conducted an online search through the City of Chicago and Cook County websites and was able to review zoning maps and plat information for the Subject Property.
6. Topographic Maps: Topographic maps from the United States Geological Survey 7.5 Minute Series, Englewood, Illinois Quadrangle were reviewed for the years: 1889, 1891, 1900, 1901, 1904, 1909, 1913, 1929, 1939, 1956, 1965, 1973, 1981, 1993, 1999, 2012, 2015, and 2018.
7. Building Department Records: K-Plus reviewed available building department records through the City of Chicago Data Portal.
8. Assessor Office: K-Plus consulted with the Cook County Assessor's office to obtain current information regarding the building on the Subject Property.
9. Storage Tank Search: K-Plus reviewed records regarding the presence of storage tanks from the City of Chicago Data Portal. Additionally, K-Plus reviewed the Office of the Illinois State Fire Marshal (OSFM) database of registered USTs and the Illinois Environmental Protection Agency (IEPA) database of leaking UST (LUST) sites.
10. Environmental Database Report: K-Plus reviewed an environmental database radius map search report prepared by Environmental Data Resources (EDR) for the Subject Property and surrounding area.

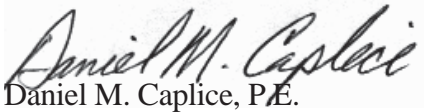

10.0 CERTIFICATION

The Phase I ESA was completed by Ms. Jessica Madsen, and was reviewed by Mr. Daniel M. Caplice, P.E.. Professional profiles are provided in Appendix 7.

I declare that to the best of our professional knowledge and belief, I/we meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312. I/We have the specific qualifications based on education, training, and experience to assess the Subject Property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312. Conformance with 40 CFR Part 312 was achieved through completion of the assessment in accordance with ASTM Standard Practice E 1527-13.

Jessica Madsen
Environmental Professional

Daniel M. Caplice, P.E.

APPENDIX 2

GLOSSARY OF TERMS

K - PLUS ENGINEERING SERVICES , LLC

GLOSSARY OF TERMS

ACM – Asbestos Containing Material

ACBM – Asbestos Containing Building Material

Adjoining or adjacent property – any real property or properties the border of which is contiguous or partially contiguous with that of the *Subject Property*, or that would be contiguous or partially contiguous with that of the *Subject Property* but for a street, road or other public thoroughfare separating them.

Aerial photograph – photographs taken from an airplane or helicopter of areas encompassing the property. Aerial photographs are often taken for government agencies or private collections unique to a local area.

All appropriate inquiry (AAI) – that inquiry into the previous ownership and uses of the *Subject Property* consistent with good commercial or customary practice.

APEC – area of potential environmental concern.

ASTM – American Society of Testing Materials or ASTM International

AST – Aboveground Storage Tank

BGS – Below Ground Surface

BTEX – Benzene, Toluene, Ethylbenzene and Xylene

Building department records – those records of the local government in which the property is located indicating permission of the local government to construct, alter, or demolish improvements on the property. Often building department records are located in the building department of a municipality or county.

Business environmental risk – a risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a Subject Property, not necessarily limited to those environmental issues required to be investigated by ASTM. Business environmental risks may involve addressing one or more non-scope considerations.

CERCLIS – *Comprehensive Environmental Response, Compensation and Liability Information System* the list of sites compiled by EPA that have investigated or are currently investigating for potential hazardous substance contamination for possible inclusion on the National Priorities List.

Construction debris – concrete, brick, asphalt and other such building material discarded in the construction of a building or other improvement to a property.

Contaminant source – the origin of the soil and groundwater contamination; may be a general property location (for example, a dry cleaner property address) or, if known, a specific location on a property (for example, the dumpster behind the dry cleaners where filters with perchloroethylene dry cleaning solvent were disposed).

Controlled recognized environmental condition – a recognized environmental condition resulting from a past release of hazardous substances of petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), or meeting risk-based criteria established by regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).

Data gap – a lack of or inability to obtain information required by this practice despite good faith efforts by the *environmental professional* to gather such information. *Data gaps* may result from incompleteness in any of the activities required by *ASTM*, including but not limited to site reconnaissance (for example, an inability to conduct the site visit), and interviews (for example, an inability to interview the key site manager, regulatory official, etc.).

Demolition debris – concrete, brick, asphalt and other such building material discarded in the construction of a building or other improvement to a property.

DNAPL – Dense non-aqueous phase liquids

Drum – a container (typically, but not necessarily holding 55 gallons (208 L) of liquid) that may be used to store hazardous substance or petroleum products.

Dry well – underground areas where soil has been removed and replaced with pea gravel, coarse sand, or large rocks. Dry wells are used for drainage, to control storm runoff, for the collection of spilled liquids (intentional and non-intentional) and wastewater disposal (often illegal).

Due diligence – the process of inquiring into the environmental characteristics of a parcel of commercial real estate or other conditions, usually in connection with a commercial real estate transaction. The degree and kind of due diligence vary for different properties and differing purposes.

Dwelling – structure or portion thereof used for residential habitation.

EDR – Environmental Data Resources Inc., the supplier of the environmental radius map report.

Environmental professional – a person meeting the education, training, and experience requirements as set forth in ASTM Practice E 1527.

Environmental Site Assessment (ESA) – the process by which a person or entity seeks to determine if a particular parcel of real property (including improvements) is subject to recognized environmental conditions. At the option of the user, an environmental site assessment may include more inquiry than that constituting appropriate inquiry or, if the user is not concerned about qualifying for the innocent landowner defense, less inquiry than that constituting appropriate inquiry.

Fill dirt – dirt, soil, sand or other earth, that is obtained off-site that is used to fill holes or depressions, create mounds, or otherwise artificially change the grade or elevation of real property. It does not include material that is used in limited quantities for normal landscaping activities.

Fire insurance maps – or *Sanborn maps* are maps produced for private fire insurance map companies that indicate uses of properties at specific dates and that encompass the property. These maps are often available at local libraries, historical societies, and private resellers or from the map companies who produced them.

FOIA – Freedom of Information Act request

GPR – Ground penetrating radar

Groundwater – the water contained in the pore spaces of saturated geologic media.

Hazardous materials/ substances – any solid, liquid or gas which is toxic, flammable, caustic, reactive/explosive, and/or radioactive.

Hazardous waste – a solid waste or combination of solid wastes, which because of its quantity, concentration or physical, chemical or infectious characteristics may (A) cause or significantly contribute to an increase in mortality or and increase in serious irreversible or incapacitating reversible illness; or (B) pose a substantial present or potential hazard to human health or the environment when improperly treated, stored, transported or disposed of, or otherwise managed.

IEPA – Illinois Environmental Protection Agency

Landfill – a place, location, track of land, area, or premises used for the disposal of solid wastes as defined by state solid waste regulations. The term is synonymous with the term solid waste disposal site and is also known as a garbage dump, trash dump, or similar term.

Local government agencies – those agencies of municipal or county government having jurisdiction over the property. Municipal and county government agencies include but are not limited to cities, parishes, townships, and similar entities.

Local street directories – directories published by private (or sometimes government) sources that show ownership, occupancy, and use of sites and/or by reference to street addresses. Often local street directories are available at libraries or local governments, colleges or universities, or historical societies.

Leaking Underground Storage Tank (LUST) sites – state lists of leaking underground storage tank sites. Section 9003 (h) of Subtitle I of RCRA gives EPA and states, under cooperative agreements with EPA, authority to clean up releases from UST systems or require owners and operators to do so.

Material safety data sheets (MSDS) – written or printed material concerning a hazardous substance which is prepared by chemical manufacturer's, importers, and employers for hazardous chemicals pursuant to OSHA's Hazard Communication Standard.

National Priorities List (NPL) – list compiled by EPA pursuant to CERCLA 42 USC § 9605(a)(8)(B) of properties with the highest priority for cleanup pursuant to EPA's hazard ranking system.

Non Scope factors -- ...Environmental issues or conditions at a property that parties may wish to assess in connection with commercial real estate that are outside the scope of this [ASTM] practice.

Occupants – those tenants, subtenants, or other persons or entities using the property or a portion of the property.

Orphaned site – EDR uses the term “orphaned site” to reference a site that, due to incomplete geographic location data, are not plotted on the EDR radius maps.

Owner – generally the fee owner of record of the property.

Petroleum products – petroleum, including crude oil distillates of crude oil or any fraction thereof which is not otherwise specifically listed or designated as a hazardous substance; natural gas, natural gas liquids, liquefied natural gas, and synthetic gas usable for fuel (or mixtures of natural gas and such synthetic gas). Including but not limited to gasoline, kerosene, diesel oil, jet fuels, and fuel oil.

Pits, ponds or lagoons – man-made or natural depressions in a ground surface that are likely to hold liquids or sludge containing *hazardous substances* or *petroleum products*. The likelihood of such liquids or sludge being present is determined by evidence of factors associated with the *pit, pond or lagoon*, including, but not limited to discolored water, distressed vegetation, or the presence of an obvious wastewater discharge.

Polychlorinated Biphenyl (PCB) – environmental contaminant commonly found in power transformers.

Polynucleic/Polycyclic Aromatic Hydrocarbon (PNA/PAH) – environmental contaminant commonly found in highly industrialized areas, or in areas that experienced a fire.

Property – the real property that is the subjects of the environmental site assessment described in this practice. Real property includes buildings and other fixtures and improvements located on the property and affixed to the land.

Publicly available – information that the source of the information allows access to the information by anyone upon request.

Potable water – water that is or can be used for consumption

Practically reviewable – information is provided by the source in a manner and in a form that, upon examination, yields information relevant to the property without the need for extraordinary analysis or irrelevant data. The form of the information shall be such that the user can review the records for a limited geographic area. Records that cannot be feasibly retrieved by reference to the location of the property or a geographic area in which the property is located are not generally *practically reviewable*.

Preferential pathway – the pathway that has the least amount of constraint on the migration of chemicals of concern.

REC -- As defined in ASTM E 1527-13, the term *Recognized Environmental Condition* means "...the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, groundwater, or surface water of the property." In addition, the term *Historic Recognized Environmental Condition* means ". . . an environmental condition which in the past would have been an REC, but which may or may not be considered a REC currently." Performance of the Phase I ESA was intended to reduce, but not eliminate, uncertainty regarding the existence of Recognized Environmental Conditions in connection with the Subject Property.

Site visit – the visit to the property during which observations are made constituting the site reconnaissance section of the Phase I Environmental Site Assessment in Practice E 1527 and the site visit requirements of the transaction screen process in this practice.

Solvent – a chemical compound that is capable of dissolving another substance and is itself a hazardous substance used in a number of manufacturing/industrial processes including, but not limited to, the manufacture of paints and coatings for industrial and household purposes, equipment clean-up , and surface degreasing in metal fabricating industries.

K - PLUS ENGINEERING SERVICES, LLC

GLOSSARY OF TERMS

Subject Property – The building or parcel on which the Phase I Environmental Site Assessment is the focus.

Sump – a pit, cistern, cesspool, or similar receptacle where liquids drain, collect or are stored.

USEPA – United States Environmental Protection Agency

Underground Storage Tank (UST) – any tank, including underground piping connected to the tank, that is or has been used to contain *hazardous substances* or *petroleum products* and the volume of which is 10% or more beneath the surface of the ground.

User – the party seeking to use the transaction screen process of this practice or the Phase I Environmental Site Assessment of Practice E 1527 to perform an environmental assessment of the property, a potential tenant of property, an owner of property, a lender, or a property manager.

USGS 7.5 Minute Topographic Map – the map (if any) available from or produced by the United States Geological Survey, entitled “USGS 7.5 Minute Topographic Map,” and showing the property.

Volatile organic compound (VOC) – a general term for an organic compound that has a high enough vapor pressure at standard temperatures and pressure to significantly vaporize and enter the atmosphere.

Waste water – water that is or has been used in an industrial or manufacturing process, conveys or has conveyed sewage, or is directly related to manufacturing, processing, or raw materials storage areas at an industrial plant. Wastewater does not include water originating on or passing through or adjacent to a site, such as stormwater flows, that has not been used in industrial or manufacturing, processing, or raw materials storage areas at an industrial plant.

Zoning/land use records – those records of the local government in which the property is located indicating the uses permitted by the local government in particular zones within its jurisdiction. The records may consist of maps and/or written records. They are often located in the planning department of a municipality or county.

SPECIAL FLOOD HAZARD AREAS

- Without Base Flood Elevation (BFE) Zone A, V, AE, AP
- With BFE or Depth Zone AE, AD, AH, VE, AP
- Regulatory Floodway

OTHER AREAS OF FLOOD HAZARD

- 0.2% Annual Chance Flood Hazard, Areas of 1% annual chance flood with average depth less than one foot or with drainage areas of less than one square mile Zone X
- Future Conditions 1% Annual Chance Flood Hazard Zone 1
- Area with Reduced Flood Risk due to Levee, See Notes, Zone 2
- Area with Flood Risk due to Levee Zone D

OTHER AREAS

- NO SCREEN Area of Minimal Flood Hazard Zone 3
- Effective LOMRs
- Area of Undetermined Flood Hazard Zone B
- GENERAL STRUCTURES
- Channel, Culvert, or Storm Sewer
- Levee, Dike, or Floodwall

OTHER FEATURES

- Cross Sections with 1% Annual Chance
- Water Surface Elevation
- Coastal Transect
- Base Flood Elevation Line (BFE)
- Limit of Study
- Jurisdiction Boundary
- Coastal Transect Baseline
- Profile Baseline
- Hydrographic Feature

MAP PANELS

- Digital Data Available
- No Digital Data Available
- Unmapped

The pin displayed on the map is an approximate point selected by the user and does not represent an authoritative property location.

This map complies with FEMA's standards for the use of digital flood maps. If it is not valid as described below. The basemap shown complies with FEMA's basemap accuracy standards.

The flood hazard information is derived directly from the authoritative NFHL web services provided by FEMA. This map was exported on 11/12/2020 at 11:59 AM and does not reflect changes or amendments subsequent to this date and time. The NFHL and effective information may change or become superseded by new data over time.

This map image is valid if the one or more of the following map elements do not appear: basemap imagery, flood zone labels, legend, scale bar, map creation date, community identifiers, FIRM panel number, and FIRM effective date. Map images for unmapped and unmodernized areas cannot be used for regulatory purposes.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by K-Plus Environmental, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1923 through 2017. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 200 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

Re: LPC #Not Yet Assigned -- Cook County
Chicago/Public Building Commission of Chicago
3423 West Ogden
LUST Incident No. 20031815
LUST Technical File

Dear Owner/Operator:

The Illinois Environmental Protection Agency (Illinois EPA) received notification from the Illinois Emergency Management Agency that a release from an underground storage tank system(s) has occurred at the above-referenced site. As a result of this release, the owner or operator of the underground storage tank(s) is required to comply with the Leaking Underground Storage Tank (LUST) Program requirements, including the submittal of applicable documentation on forms prescribed and provided by the Illinois EPA.

To obtain copies of the forms, as well as additional information regarding the Illinois EPA's LUST Program, please visit our Web page at <http://www.epa.state.il.us/land/lust/index.html>.

1. The direct link to the technical forms page is <http://www.epa.state.il.us/land/lust/forms/technical-forms/index.html>.
2. If you intend to seek reimbursement from the Illinois Underground Storage Tank Fund for costs incurred, the direct link to the budget and reimbursement forms page is: <http://www.epa.state.il.us/land/lust/forms/budget-forms/index.html>.

If you do not have access to the Internet and/or have questions about the LUST Program requirements, please contact the LUST Program project manager on call at 217/782-6762.

Sincerely,

Douglas W. Clay, P.E., Manager
Leaking Underground Storage Tank Section

The Agency is authorized to require this information under Section 4 and Title XVI of the Environmental Protection Act (415 ILCS 5/4, 5/57 - 57.17). Failure to disclose this information may result in a civil penalty of not to exceed \$50,000.00 for the violation and an additional civil penalty of not to exceed \$10,000.00 for each day during which the violation continues (415 ILCS 5/42). Any person who knowingly makes a false material statement or representation in any label, manifest, record, report, permit, or license, or other document filed, maintained or used for the purpose of compliance with Title XVI commits a Class 4 felony. Any second or subsequent offense after conviction hereunder is a Class 3 felony (415 ILCS 5/57.17). This form has been approved by the Forms Management Center.

B. Certification

IEPA/BOL

1. I am/we are the owner and operator of the underground storage tank system(s) from which a release was reported under the IEMA incident correctly identified above;
2. As much of the regulated substance as necessary to prevent further release to the environment has been removed;
3. There has been a visual inspection of any above ground releases or exposed below ground releases;
4. Further migration of the released substance into surrounding soils and groundwater has been prevented;
5. Monitoring of any fire and safety hazards posed by vapors or free product that have migrated from the UST excavation zone and entered subsurface structures (such as sewers or basements) will continue;
6. Hazards posed by contaminated soils that are excavated or exposed as a result of release confirmation, site investigation, abatement or corrective action activities have been remedied;
7. If the treatment remedies included treatment or disposal of soils, the owner/operator has complied with 35 Ill. Adm. Code Parts 722, 724, 725, and 807 through 815;
8. Measurement for the presence of a release has been conducted where contamination was most likely to be present at the UST site;
9. In selecting sample types, sample locations and measurement methods, the nature of the stored substance, type of backfill, depth to groundwater and other factors as appropriate for identifying the presence and source of the release have been considered;

10. The investigations to determine the possible presence of free product, and begin free product removal as soon as possible, if applicable, in accordance with 35 Ill. Adm. Code Section 731.164 or 732.203;

Dear Sir/Madam:

Enclosed are two (2) copies of the 45-Day Report for the Public Building Commission of Chicago (PBCC) Police District 10 Leaking Underground Storage Tank (LUST) site IEMA incident number H20031815 located at 3423 W. Ogden Avenue, Chicago, Illinois.

If you have any questions, please contact Ms. Hilary Janousek at 312 356-5400 ext. 125 or Ms. Patricia Feeley at 312-356-5400 ext. 136.

Respectfully,

Environmental Design International, inc.

The Agency is authorized to require this information under Section 4 and Title XVI of the Environmental Protection Act (415 ILCS 5/4, 5/57 - 57.17). Failure to disclose this information may result in a civil penalty of not to exceed \$50,000.00 for the violation and an additional civil penalty of not to exceed \$10,000.00 for each day during which the violation continues (415 ILCS 5/42). Any person who knowingly makes a false material statement or representation in any label, manifest, record, report, permit, or license, or other document filed, maintained or used for the purpose of compliance with Title XVI commits a Class 4 felony. Any second or subsequent offense after conviction hereunder is a Class 3 felony (415 ILCS 5/57.17). This form has been approved by the Forms Management Center.

**Illinois Environmental Protection Agency
Leaking Underground Storage Tank Program
45 Day Report**

A. Site Identification

IEMA Incident #: 20031815 IEPA LPC # (10 digit): 0312305199
Site Name: Public Building Commission of Chicago - Police District 10
Site Address (Not a P.O. Box): 3423 W. Ogden Avenue
City: Chicago County: Cook

B. Release Information

1. Identify the material(s) released: Heating Oil

2. The material(s) released was (check all that apply):

- a. Petroleum X
b. Non-petroleum

RECEIVED

FEB 10 2004

IEPA/BOL

C. Early Action

1. Is this report intended to serve as the Corrective Action Completion Report? Yes No X
2. What was the volume of backfill material excavated? 95 yds³
3. What was the volume of native soil excavated? 0 yds³
4. Was groundwater encountered at the site? Yes X No
5. Did the groundwater exhibit a sheen? Yes No X
6. Was free product encountered? Yes No X
If yes, the owner/operator must submit a free product removal report.
7. Were the appropriate number of samples collected to demonstrate that the remediation objectives have been achieved? Yes No **

**The excavation was surrounded on three sides by concrete walls and has a concrete floor. It is suspected that this tank may have been in a basement of a building. Corrective Action Completion confirmation soil samples will be collected when construction activities resume onsite in the area of the excavation. Samples will be collected from areas adjacent to the concrete walls to be representative of all four walls. No floor samples will be collected unless the concrete floor is removed.

D. Site Information

Provide the following:

1. Data on the nature and estimated quantity of the release;

During development activities for the new Police District 10 facility, the Public Building Commission of Chicago (PBCC) identified a 2,500 gallon heating oil UST. In moving forward with development of this site, PBCC contracted for the removal of the 2,500-gallon heating oil UST. The UST was removed by R.W. Collins Co. on December 9, 2003. A minor release was identified by Mr. Phillip Anselmini, the City of Chicago Department of Environment (CDOE) inspector onsite. The quantity of the release is unknown. After the cleaning activities were completed, the UST was inspected for integrity. The top portion of the tank had sunk in creating a slight crack in the tank. The cause of the release is most likely from corrosion. Soil samples were retrieved from the north and west walls of the excavation. Due to development plans to remove soil to a depth of five feet in the area surrounding the tank, the samples were not submitted for analysis. The remaining walls and floor consisted of concrete. The backfill material excavated to remove the UST was placed on plastic sheeting located north adjacent to the tank excavation.

All the material removed from site has been disposed as special waste.

2. Data from available sources or site investigations concerning the following factors:

a. Surrounding populations;

The area surrounding the site is a mixture of commercial and residential properties.

b. Water quality;

Potable water for area is supplied by City of Chicago's Lake Michigan fed distribution system.

c. Use and approximate locations of wells potentially affected by the release;

Well records (QuESToR: Custom Map) for a one-mile radius from the subject site were obtained from the Illinois State Geological Survey (ISGS) on April 28, 2003. The well records identified three wells within an approximate one-mile radius of the subject site. A fourth well was identified using the IEPA and USGS' Source Water Assessment Program website. A copy of these records is provided in **Appendix A**.

Well ID 26723 is owned by Farragut High School, was installed July 1, 1928 to a termination depth of 15 feet below grade surface, and its status is listed as engineering. Well ID 04024 is owned by Fleischmann Yeast, was installed to a recorded termination depth of 1872 feet below grade surface, and its status is water use. The installation date is unknown. Well ID 02846 is owned by Fleischmann Yeast, was installed to a recorded termination depth of 1982 feet below grade surface, and its status is water use. The installation date is unknown.

Well ID 26722 identified west of the subject property is owned by Mason School with a termination depth of 15 feet and a well status of ENG.

The City of Chicago has adopted an ordinance banning the use of groundwater for consumptive purposes and receives all of its potable water supply from Lake Michigan. Based on the distances from the subject site, well usage, and well depths, it is not expected that this LUST incident will impact these wells.

d. Subsurface soil conditions;

According to the *Summary of the Geology of the Chicago Area*, Circular 460, by H.B. Willman, dated 1971, the subject site is part of the Carmi Member of Equality Formation, which is described as largely quiet-water lake sediments; dominantly well bedded silt, locally laminated and containing thin beds of clay; local lenses of sand and sandy gravel along beaches.

The Illinois State Geological Survey (ISGS) prepared a map entitled *Potential for Contamination of Shallow Aquifers from Land Burial of Municipal Wastes*, Circular 532, by Richard Berg and John Kempton, dated 1984. This map identifies ratings for potential contamination to shallow aquifers based on geologic materials. The subject site appears to be located in region C1, which is permeable bedrock within 20 to 50 feet of surface, overlain by till or other fine-grained material.

e. Location of subsurface sewers;

No subsurface sewers were observed near the vicinity of the UST.

f. Climatological conditions;

The Chicago weather is predominantly continental, ranging from relatively warm summers and relatively cold winters. The weather changes frequently. The mean daily high is 58.7° F. and the mean daily low is 39.7° F. The region annually receives an average of 33.34 inches of precipitation. The majority of the precipitation occurs as rain between the months of April and September.

See **Appendix B** for a copy of the National Oceanic and Atmospheric Administration publication "1998 Local Climatological Data, Annual Summary with Comparative Data, Chicago O'Hare International Airport."

g. Land use;

The subject site is currently being developed as part of a larger site to eventually contain the PBCC Police District 10 station. The future use of the site is a parking lot for the Chicago Police District 10 Station.

3. A discussion of what was done to measure for the presence of a release where contamination was most likely to be present at the UST site;

Water with a slight sheen was observed in the UST excavation. North Branch Environmental removed the majority of the water. Rock debris and soil with a slight petroleum odor was observed on the north wall of the UST excavation. Two samples were collected from the north wall and one from the north end of the west wall. As remedial excavation was planned, the samples were not submitted for laboratory analysis. No sheen was observed on the water post remedial action.

4. The results of the free product investigations;

Free product was not observed during the excavation.

5. A discussion of the action taken to prevent further release of the regulated substance into the environment;

The UST was emptied and removed from its location. The UST was opened, cleaned, and hauled off-site for final destruction and disposal. The excavated soil was placed on plastic sheeting and removed from the site as special waste. The south, east and west walls of the excavation consisted of concrete slabs. The bottom of the excavation was also concrete. The concrete walls appeared to be intact limiting the release of substances into the environment to the north. Soil from the area surrounding the tank has been removed to a depth of five feet during site development activities. The concrete walls have been removed to a depth of two feet and the excavation partially filled in with CA-1 gravel. Currently no construction activity is occurring on site. When activity resumes, EDI intends to collect samples to confirm corrective action completion from the north wall of the excavation and from the areas adjacent to the concrete sidewalls of the excavation.

6. A discussion of the action taken to mitigate fire and safety hazards posed by vapors or free product that has migrated from the UST excavation zone and entered subsurface structures;

Free product was not observed during the excavation. One 2,500 gallon heating oil tank was removed. The excavation consisted of concrete walls to the south, east and west as well as a concrete bottom. Soils from around the UST are being disposed as special waste for the purposes of site development activities. No existing subsurface structures were observed on site.

7. Any other information collected while performing initial abatement measures pursuant to 35 Ill. Adm. Code Section 731.162, 732.202(b) or 415 ILCS 5/57-57.17.

No other information was gathered during the initial abatement measures.

E. Supporting Documentation

Provide the following:

1. Site map to scale and oriented north showing:

- a. UST(s) system(s) and excavation limits; Figure 3
- b. Product and dispenser lines; Not available
- c. Pumps and islands; Not available
- d. Underground utilities (sewer, gas, water, etc.); No utilities near UST
- e. Nearby structures (buildings, roads, etc.); Figures 1, 2(a/b) and 3
- f. Soil boring(s) (if present); None present
- g. Monitoring well(s) and/or sumps (if present); None present
- h. Property boundaries; and Figure 3
- i. Sample location points. Figure 4

2. An area map showing the site in relation to surrounding properties. This map should identify the facilities on the surrounding properties;

Please refer to Figures 2a (Zoning Map) and Figure 2b (Site Development Map).

3. A cross section, to scale, with dimensions showing the UST and the excavation;

Please refer to Figure 5

4. Analytical/screening results in tabular format including the results of soil samples required pursuant to 732.202(h) or 415 ILCS 5/57-57.17;

The UST was contained to the south, east, west and bottom by concrete. Two samples were collected from the north wall, however, because remedial excavation

was planned, the samples were not submitted for laboratory analysis. The UST location and the areas surrounding the UST location have been excavated to a depth of five feet for site development activities. All soil is being disposed as special waste.

5. UST(s) information in a tabular format and that at a minimum includes:

- a. The total number of UST(s) on site;
- b. The volume of the UST(s) (in gallons);
- c. The material stored in the UST(s);
- d. Identification of UST system(s) that had a release; and
- f. Identification of UST system(s) that were repaired, removed, or abandoned-in-place.

UST information in tabular format:

UST	Volume	Product	Release	Corrective Action
1	2,500-gallons	Heating Oil	Yes	UST Removal

6. A copy of the Office of the State Fire Marshal Permit for Removal, Abandonment-in-Place or other OSFM permits or notifications;

The City of Chicago Department of Environment (CDOE) UST removal permit is presented in **Appendix C**.

7. A narrative of tank removal and cleaning operations; describe how wastes generated during the tank removal were managed, treated, and disposed of;

On December 9, 2003, R.W. Collins removed the soil from above one 2,500-gallon heating oil UST at 3423 W. Ogden Avenue, Chicago, Illinois. After the UST was uncovered, North Branch Environmental, waste haulers, pumped out 3,000 gallons of liquid waste from the UST into a waste truck (Appendix E). Once the tank was empty, the LEL of the interior of the tank was measured. The LEL measure of 0.0 indicated the tank was ready for removal.

The Chicago Department of Environment (CDOE) inspector, Mr. Philip Anselmini, City of Chicago Fire inspector Mr. Robert Gloppe, and EDI Geologists Ms. Hilary Janousek and Mr. Brian Harper, were present on site to witness the removal activities and inspect the condition of the UST and its excavation.

A track-mounted excavator was used to remove the backfill material from around the UST. The backfill material from around the UST was removed and stockpiled on plastic sheeting north adjacent to the excavation. During excavation activities, a petroleum odor was present. After the UST was sufficiently uncovered, a braided cable was attached to the track-mounted excavator and the UST. The tank was lifted from the excavation and placed on plastic sheeting for cleaning activities.

Once the tank was removed, Mr. Philip Anselmini, CDOE, and Ms. Hilary Janousek, EDI, inspected the excavation walls and floor for signs of a petroleum release. Mr. Anselmini declared a minor petroleum release. The Illinois Emergency Management Agency (IEMA) was contacted and incident number H20031815 was issued to the site.

R.W. Collins used a hand-held electric metal cutter to cut the side of the UST for cleaning. The interior sides of the tank were scraped. The remaining waste was placed in a 55-gallon drum and removed by R.W. Collins. The tank was then hauled away for final destruction and disposal.

The excavated soil was left on plastic sheeting to be hauled offsite as special waste.

Based on the status of the site, closure is requested for this incident.

8. Photographs of UST removal activities and the excavation;

Photographs of the UST excavation can be found in **Appendix D**.

9. Copies of manifests for liquid waste transported off-site;

Liquid manifests are presented in **Appendix E**. Soil removed for development activities was handled as special waste. No soil waste manifests are included.

REFERENCE NOTES:

PAGE 1:
THE TEMPERATURE GRAPH SHOWS NORMAL MAXIMUM AND NORMAL MINIMUM DAILY TEMPERATURES (SOLID CURVES) AND THE ACTUAL DAILY HIGH AND LOW TEMPERATURES (VERTICAL BARS).

PAGE 2 AND 3:
H/C INDICATES HEATING AND COOLING DEGREE DAYS.
RH INDICATES RELATIVE HUMIDITY
W/O INDICATES WEATHER AND OBSTRUCTIONS
S INDICATES SUNSHINE.
PR INDICATES PRESSURE.
CLOUDINESS ON PAGE 3 IS THE SUM OF THE CEILOMETER AND SATELLITE DATA NOT TO EXCEED EIGHT EIGHTHS (OKTAS).

GENERAL:
T INDICATES TRACE PRECIPITATION, AN AMOUNT GREATER THAN ZERO BUT LESS THAN THE LOWEST REPORTABLE VALUE.
+ INDICATES THE VALUE ALSO OCCURS ON EARLIER DATES.
BLANK ENTRIES DENOTE MISSING OR UNREPORTED DATA.
NORMALS ARE 30-YEAR AVERAGES (1961 - 1990).
ASOS INDICATES AUTOMATED SURFACE OBSERVING SYSTEM.
PM INDICATES THE LAST DAY OF THE PREVIOUS MONTH.
POR (PERIOD OF RECORD) BEGINS WITH THE JANUARY DATA MONTH AND IS THE NUMBER OF YEARS USED TO COMPUTE THE MEAN. INDIVIDUAL MONTHS WITHIN THE POR MAY BE MISSING.
WHEN THE POR FOR A NORMAL IS LESS THAN 30 YEARS, THE NORMAL IS PROVISIONAL AND IS BASED ON THE NUMBER OF YEARS INDICATED.
0.* OR * INDICATES THE VALUE OR MEAN-DAYS-WITH IS BETWEEN 0.00 AND 0.05.
CLOUDINESS FOR ASOS STATIONS DIFFERS FROM THE NON-ASOS OBSERVATION TAKEN BY A HUMAN OBSERVER. ASOS STATION CLOUDINESS IS BASED ON TIME-AVERAGED CEILOMETER DATA FOR CLOUDS AT OR BELOW 12,000 FEET AND ON SATELLITE DATA FOR CLOUDS ABOVE 12,000 FEET.
THE NUMBER OF DAYS WITH CLEAR, PARTLY CLOUDY, AND CLOUDY CONDITIONS FOR ASOS STATIONS IS THE SUM OF THE CEILOMETER AND SATELLITE DATA FOR THE SUNRISE TO SUNSET PERIOD.

GENERAL CONTINUED:
CLEAR INDICATES 0 - 2 OKTAS, PARTLY CLOUDY INDICATES 3 - 6 OKTAS, AND CLOUDY INDICATES 7 OR 8 OKTAS.
WHEN AT LEAST ONE OF THE ELEMENTS (CEILOMETER OR SATELLITE) IS MISSING, THE DAILY CLOUDINESS IS NOT COMPUTED.
WIND DIRECTION IS RECORDED IN TENS OF DEGREES (2 DIGITS) CLOCKWISE FROM TRUE NORTH. "00" INDICATES CALM. "36" INDICATES TRUE NORTH.
RESULTANT WIND IS THE VECTOR AVERAGE OF THE SPEED AND DIRECTION.
AVERAGE TEMPERATURE IS THE SUM OF THE MEAN DAILY MAXIMUM AND MINIMUM TEMPERATURE DIVIDED BY 2.
SNOWFALL DATA COMPRISE ALL FORMS OF FROZEN PRECIPITATION, INCLUDING HAIL.
A HEATING (COOLING) DEGREE DAY IS THE DIFFERENCE BETWEEN THE AVERAGE DAILY TEMPERATURE AND 65° F.
DRY BULB IS THE TEMPERATURE OF THE AMBIENT AIR.
DEW POINT IS THE TEMPERATURE TO WHICH THE AIR MUST BE COOLED TO ACHIEVE 100 PERCENT RELATIVE HUMIDITY.
WET BULB IS THE TEMPERATURE THE AIR WOULD HAVE IF THE MOISTURE CONTENT WAS INCREASED TO 100 PERCENT RELATIVE HUMIDITY.
ON JULY 1, 1996, THE NATIONAL WEATHER SERVICE BEGAN USING THE "METAR" OBSERVATION CODE THAT WAS ALREADY EMPLOYED BY MOST OTHER NATIONS OF THE WORLD. THE MOST NOTICEABLE DIFFERENCE IN THIS ANNUAL PUBLICATION WILL BE THE CHANGE IN UNITS FROM TENTHS TO EIGHTHS (OKTAS) FOR REPORTING THE AMOUNT OF SKY COVER.

1998
CHICAGO, O'HARE INTERNATIONAL AIRPORT,
ILLINOIS (ORD)

Chicago is located along the southwest shore of Lake Michigan and occupies a plain which, for the most part, is only some tens of feet above the lake. Lake Michigan averages 579 feet above sea level. Natural water drainage over most of the city would be into Lake Michigan, and from areas west of the city is into the Mississippi River System. But actual drainage over most of the city is artificially channeled also into the Mississippi system. Topography does not significantly affect air flow in or near the city except that lesser frictional drag over Lake Michigan causes winds to be frequently stronger along the lakeshore, and often permits air masses moving from the north to reach shore areas an hour or more before affecting western parts of the city.

Chicago is in a region of frequently changeable weather. The climate is predominately continental, ranging from relatively warm in summer to relatively cold in winter. However, the continentality is partially modified by Lake Michigan, and to a lesser extent by other Great Lakes. In late autumn and winter, air masses that are initially very cold often reach the city only after being tempered by passage over one or more of the lakes. Similarly, in late spring and summer, air masses reaching the city from the north, northeast, or east are cooler because of movement over the Great Lakes. Very low winter temperatures most often occur in air that flows southward to the west of Lake Superior before reaching the Chicago area. In summer the higher temperatures are with south or southwest flow and are therefore not influenced by the lakes, the only modifying effect being a local lake breeze. Strong south or southwest flow may overcome the lake breeze and cause high temperatures to extend over the entire city.

During the warm season, when the lake is cold relative to land, there is frequently a lake breeze that reduces daytime temperature near the shore, sometimes by 10 degrees or more below temperatures farther inland. When the breeze off the lake is light this effect usually reaches inland only a mile or two, but with stronger on-shore winds the whole city is cooled. On the other hand, temperatures at night are warmer near the lake so that 24-hour averages on the whole are only slightly different in various parts of the city and suburbs.

At the O'Hare International Airport temperatures of 96 degrees or higher occur in about half the summers, while about half the winters have a minimum as low as -15 degrees. The average occurrence of the first temperature as low as 32 degrees in the fall is mid-October and the average occurrence of the last temperature as low as 32 degrees in the spring is late April.

Precipitation falls mostly from air that has passed over the Gulf of Mexico. But in winter there is sometimes snowfall, light inland but locally heavy near the lakeshore, with Lake Michigan as the principal moisture source. The heavy lakeshore snow occurs when initially colder air moves from the north with a long trajectory over Lake Michigan and impinges on the Chicago lakeshore. In this situation the air mass is warmed and its moisture content increased up to a height of several thousand feet. Snowfall is produced by upward currents that become stronger, because of frictional effects, when the air moves from the lake onto land. This type of snowfall therefore tends to be heavier and to extend farther inland in south-shore areas of the city and in Indiana suburbs, where the angle between wind-flow and shoreline is greatest. The effect of Lake Michigan, both on winter temperatures and lake-produced snowfall, is enhanced by non-freezing of much of the lake during the winter, even though areas and harbors are often ice-choked.

Summer thunderstorms are often locally heavy and variable, parts of the city may receive substantial rainfall and other parts none. Longer periods of continuous precipitation are mostly in autumn, winter, and spring. About one-half the precipitation in winter, and about 10 percent of the yearly total precipitation, falls as snow. Snowfall from month to month and year to year is greatly variable. There is a 50 percent likelihood that the first and last 1-inch snowfall of a season will occur by December 5 and March 20, respectively.

Channeling of winds between tall buildings often causes locally stronger gusts in the central business area. However, the nickname, windy city, is a misnomer as the average wind speed is not greater than in many other parts of the U.S.

APPENDIX C: REMOVAL PERMIT

UNDERGROUND STORAGE TANK PERMIT

Permit Number

107707

CITY OF CHICAGO DEPARTMENT OF ENVIRONMENT

ENFORCEMENT AND COMPLIANCE DIVISION

30 NORTH LASALLE, ROOM 2500, CHICAGO, IL 60602

UNDERGROUND STORAGE TANK UNIT

Contractor (Name & Address)

R.W. COLLINS CO
7225 W 66TH ST
CHICAGO, IL 60638
Registration No. IL-772

Facility (Name & Address)

CONSTRUCTION SITE
3315 W OGDEN
Chicago, IL 60623
Facility ID: 2041582

Type of Permit: REMOVE

Number of tanks: 1

Tank Size(s): 500

Effective Date: 11/24/2003

Expiration Date: 5/24/2004

Fee: \$0.00

Comments: 3RD PARTY HEATING OIL TANK REMOVAL

PURSUANT to the Illinois Revised Statutes, Chapter 127 1/2, Paragraph 9, and the City of Chicago-State of Illinois Delegation Agreement, PERMISSION is hereby granted to remove, install, abandon-in-place, repair (including upgrade), or temporarily close underground storage tank(s) or system(s). This permit may be revoked at any time. Permit is not transferrable, nor does it constitute a waiver of liability for responsibilities under Federal, State or Municipal laws or regulations. The DISPLAY COPY of this permit is required to be present at the site while any work is in progress.

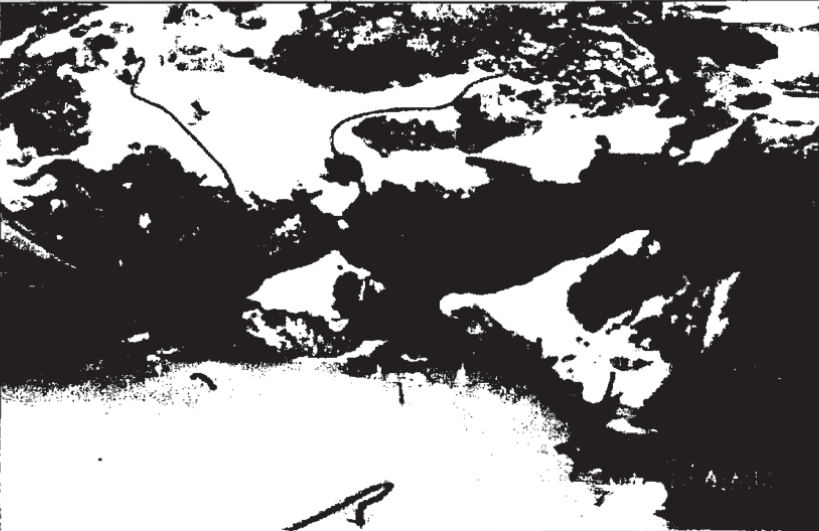

COMMISSIONER

Chicago/Public Building Commission of Chicago
3423 West Ogden
LUST Incident No. 20031815
LUST Technical File

RELEASABLE

MAR 08 2004

Dear Owner/Operator:

REVIEWER MIN

The Illinois Environmental Protection Agency (Illinois EPA) has received the 45-Day Report for the above-referenced release. The report was dated February 5, 2004 and was received by the Illinois EPA on February 10, 2004. Citations in this letter are from the Environmental Protection Act (Act), as amended by Public Act 92-0554 on June 24, 2002, and 35 Illinois Administrative Code (35 Ill. Adm. Code).

At a later time, the Illinois EPA will conduct a full technical review of the 45-Day Report and any other report submitted pursuant to Section 57.6 of the Act and 35 Ill. Adm. Code 732.Subpart B, in conjunction with any other plan or report selected for review (35 Ill. Adm. Code 732.504(a)(7)).

The Illinois EPA has determined that, pursuant to Sections 57.7(a) and 57.12(c) and (d) of the Act and 35 Ill. Adm. Code 732.100 and 732.105, a site investigation plan and budget must be submitted within sixty days of the date of this letter. Please note the Illinois EPA does not require the submission of a budget if the owner or operator does not intend to seek reimbursement from the Underground Storage Tank Fund (Fund).

In addition, an owner or operator may choose to remediate soil and groundwater in accordance with the remediation objectives at 35 Ill. Adm. Code 742 without conducting a site investigation. If the owner or operator chooses not to investigate the site in accordance with the procedures established in Section 57.7(a) of the Act, the owner or operator may not be entitled to full payment if a request for reimbursement from the Fund is submitted.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/15/2020 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

EPA ID:: ILR000032672

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 06/15/2020 has revealed that there is 1 RCRA-VSQG site within approximately 0.25 miles of the target property.

Local Lists of Registered Storage Tanks

TANKS: This dataset contains Aboveground Storage Tank (AST) and Underground Storage Tank (UST) information from the Department of Public Health's (CDPH) Tank Asset Database. The Tank Asset Database contains tank information from CDPH AST and UST permit applications as well as UST records imported from the historic Department of Environment (DOE) database. This dataset also includes AST records from the historic DOE and pre-1992 UST records from the Building Department.

A review of the TANKS list, as provided by EDR, and dated 06/10/2020 has revealed that there are 53 TANKS sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/15/2020 has revealed that there are 4 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

CHICAGO ENV: This dataset serves as a lookup table to determine if environmental records exist in a Chicago Department of Public Health (CDPH) environmental dataset for a given address. COMPLAINTS: A "Y" indicates that one or more records exist in the CDPH Environmental Complaints dataset. NESHAPS and DEMOLITON NOTICES: A "Y" indicates that one or more records exist in the CDPH Asbestos and Demolition Notification dataset. ENFORCEMENT: A "Y" indicates that one or more records exist in the CDPH Environmental Enforcement dataset. INSPECTIONS: A "Y" indicates that one or more records exist in the CDPH Environmental Inspections dataset. PERMITS: A "Y" indicates that one or more records exist in the CDPH Environmental Permits dataset. TANKS: A "Y" indicates that one or more records exist in the CDPH Storage Tanks dataset.

A review of the CHICAGO ENV list, as provided by EDR, and dated 06/10/2020 has revealed that there are 4 CHICAGO ENV sites within approximately 0.001 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR

EXECUTIVE SUMMARY

researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 7 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 6 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

EDR RECOVERED GOVERNMENT ARCHIVES

Exclusive Recovered Govt. Archives

EXECUTIVE SUMMARY

RGA LUST: The EDR Recovered Government Archive Leaking Underground Storage Tank database provides a list of LUST incidents derived from historical databases and includes many records that no longer appear in current government lists. Compiled from Records formerly available from the Illinois Environmental Protection Agency in Illinois.

A review of the RGA LUST list, as provided by EDR, has revealed that there is 1 RGA LUST site within approximately 0.001 miles of the target property.

Environmental Interest/Information System:

ACES (Illinois - Agency Compliance And Enforcement System) is the Illinois EPA Project to facilitate the permitting operations RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

ACES (Illinois - Agency Compliance And Enforcement System) is the Illinois EPA Project to facilitate the permitting operations RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 07/29/2020	Source: EPA
Date Data Arrived at EDR: 08/03/2020	Telephone: N/A
Date Made Active in Reports: 08/25/2020	Last EDR Contact: 10/01/2020
Number of Days to Update: 22	Next Scheduled EDR Contact: 01/11/2021
	Data Release Frequency: Quarterly

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 07/29/2020	Source: EPA
Date Data Arrived at EDR: 08/03/2020	Telephone: N/A
Date Made Active in Reports: 08/25/2020	Last EDR Contact: 10/02/2020
Number of Days to Update: 22	Next Scheduled EDR Contact: 01/11/2021
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 07/29/2020
Date Data Arrived at EDR: 08/03/2020

Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 07/29/2020

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 07/29/2020	Source: EPA
Date Data Arrived at EDR: 08/03/2020	Telephone: 800-424-9346

Federal RCRA CORRACTS facilities list

CORRACTS: Corrective Action Report

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Date of Government Version: 06/15/2020	Source: EPA
Date Data Arrived at EDR: 06/22/2020	Telephone: 800-424-9346
Date Made Active in Reports: 09/17/2020	Last EDR Contact: 09/22/2020
Number of Days to Update: 87	Next Scheduled EDR Contact: 01/04/2021
	Data Release Frequency: Quarterly

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 06/15/2020	Source: Environmental Protection Agency
Date Data Arrived at EDR: 06/22/2020	Telephone: 312-886-6186

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

LF SPECIAL WASTE: Special Waste Site List

These landfills, as of January 1, 1990, accept non-hazardous special waste pursuant to the Illinois EPA Non-Hazardous Special Waste Definition. List A includes landfills that may receive any non-hazardous waste, Non-Regional Pollution Control Facilities are so noted. List B includes landfills designed to receive specific non-hazardous wastes. List B landfills are designated as a Regional Pollution Control Facility by RPCF, or Non-Regional Pollution Control Facility by Non-RPCF.

Date of Government Version: 01/01/1990

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

HIST FTTS INSP: FIFRA/TSCA Tracking System Inspection & Enforcement Case Listing

A complete inspection and enforcement case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HWAR: Hazard Waste Annual Report

Each year, Illinois hazardous-waste generators tell the Illinois EPA the amounts and kinds of hazardous waste they produced during the previous year. Generators indicate by code the types of wastes produced and the steps they took to manage these wastes. If some or all of these wastes were sent to commercial treatment, storage, and disposal facilities (TSDFs), that information and the identity of each receiving facility also are submitted. Illinois TSDFs likewise report the types and quantities of wastes received from in-state and out-of-state generators; they also report the procedures they used to manage these wastes.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 08/10/2020	Source: Department of Energy & Environmental Protection
Date Data Arrived at EDR: 10/20/2020	Telephone: 860-424-3375

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

GEOCHECK® - PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

GRACE MANOR APARTMENTS
3401 W. OGDEN AVENUE
CHICAGO, IL 60623

TARGET PROPERTY COORDINATES

Latitude (North):	41.855845 - 41° 51' 21.04"
Longitude (West):	87.710409 - 87° 42' 37.47"
Universal Transverse Mercator:	Zone 16
UTM X (Meters):	441031.2
UTM Y (Meters):	4633801.5
Elevation:	596 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	5681448 ENGLEWOOD, IL
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
1700740070B	FEMA Q3 Flood data
<u>Additional Panels in search area:</u>	<u>FEMA Source Type</u>
1700740055B	FEMA Q3 Flood data

17031C0503J	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
ENGLEWOOD	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1 - 2 Miles NE
Site Name:	Pride Industries
Site EPA ID Number:	ILD077026656
Groundwater Flow Direction:	NOT AVAILABLE.
Inferred Depth to Water:	not available.
Hydraulic Connection:	Sand and gravel deposits of the glacial drift are situated above bedrock. The depth to bedrock is less than 50 feet. The glacial drift and bedrock have poor water yielding potential.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information is inferred in the CERCLIS investigation report(s)

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
---------------	-------------------------	---

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>

3G	1/2 - 1 Mile WSW	ESE

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Paleozoic
System:	Silurian
Series:	Middle Silurian (Niagoaran)
Code:	S2 (decoded above as Era, System & Series)

GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBANLAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Bedrock Max: > 0 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	60 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: silt loam
fine sandy loam
loam
fine sand

Surficial Soil Types: silt loam
fine sandy loam
loam
fine sand

Shallow Soil Types: sandy loam

Deeper Soil Types: silt loam
sand
loamy sand
loam

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

QUALIFICATIONS OF PROJECT PERSONNEL

K-Plus Engineering Services, LLC

JESSICA MADSEN

Title: *Department Head –
Environmental Division*

Education:

*BS, Environmental Health
Sciences, Illinois State
University, Normal, IL*

Licenses/Certifications:

*OSHA 40 Hour Hazardous
Materials Training*

AHERA Building Inspector, IL

*HM-126F Safe HazMat
Transportation Training*

IDPH Lead Inspector

*IDPH Asbestos Building
Inspector*

*Erosion and Sediment
Control Course 8 hour AIA
Registered*

Areas of Expertise:

- **Phase I ESA**
- **Due Diligence**
- **LUST**
- **SRP**
- **TACO**
- **Remediation**
- **Asbestos & Lead
Based Paint**

Ms. Madsen is an Environmental Professional with over 20 years of experience in environmental consulting. Ms. Madsen combines her scientific expertise and business management skills to meet the needs of a variety of clients, such as banks, real estate development companies, government and industrial companies. As the Department Head, her experience includes managing and conducting all phases of environmental investigation, from the initial due diligence/Phase I Environmental Site Investigations to remediation and site closure through both the IEPA's SRP and LUST programs.

During her time at K-Plus, Ms. Madsen has conducted more than a thousand due diligence projects, including Phase I Environmental Site Assessments (Phase I ESAs) and Transaction Screens (TS) on a broad range of properties from vacant/undeveloped land, industrial sites to multi-family residential properties, including HUD/IHDA financed properties.

Ms. Madsen has also managed and directed numerous soil and groundwater investigations, the majority of which are completed pursuant to the IEPA's TACO regulations to obtain No Further Remediation Letters to facilitate eventual redevelopment of these properties. She has also secured client reimbursement from the IEPA's LUST Fund at numerous LUST sites, demonstrating her ability to remediate properties to the satisfaction of the IEPA while being mindful of the client's financial situation.

Ms. Madsen also has expertise as an Environmental Compliance Manager, ensuring that all local, state and federal guidelines are followed for various construction management projects. In this capacity she has been responsible for implementing protection of endangered species habitat restrictions, including overseeing the installation of habitat protective barriers, as well as providing permit applications and other governmental support documents such as SWPPPs and Health and Safety Plans.

K-PLUS ENGINEERING, LLC

Title: *President*

DANIEL M. CAPLICE

Education:

*MM, Finance and
Managerial Economics,
J.L. Kellogg Graduate
School of Management,
Northwestern University*

*MPH, Industrial Hygiene
and Safety Engineering,
University of Illinois at
Chicago*

*BS, Civil Engineering,
University of Illinois,
Urbana, IL*

Licenses/Certifications:

*Professional Engineer:
IL, IN, IA, FL, KY, LA, MI,
MN, MO, NC, OH, PA, SC,
TX, and W,*

*AHERA Building Inspector:
IL and IN*

*LUST Site Assessor:
WI and IN*

*OSHA 40 Hour HazMat
Training*

*OSHA 8-hour On-site
Management &
Supervisor Training*

*HM-126F Safe HazMat
Transportation Training*

Radon Detection Services

*Corrective Actions for
Ground Water
Contamination*

Mr. Caplice is a licensed professional engineer in 16 states with 28 years of environmental engineering and consulting experience. He has an in-depth understanding of local, state and federal regulations and has performed projects in accordance with CERCLA, RCRA, CWA/Oil Pollution Act, CAA, TSCA, and FIFRA requirements. His specialized areas of expertise are evaluation of contaminated properties, assessment of risk and endangerment, regulatory compliance and permitting, hazardous waste management, industrial processes, Brownfield development, and site management including investigation, remediation, construction management, and monitoring.

Currently, Mr. Caplice is President of K-Plus Engineering, a 19 year-old, full service, engineering and consulting company with offices in Illinois, Indiana, Wisconsin, North Carolina, California, and Colorado. As President, Mr. Caplice is responsible for managing and directing the company in addition to his ongoing work as an expert in environmental matters.

For the past 23 years, he has served as a consulting environmental engineer for numerous private, public, and non-profit institutions. His responsibilities have included designing and directing various projects, particularly voluntary cleanups of contaminated soil and ground water sites, underground storage tank remediations, and NPL evaluations, investigations, and cleanups. Mr. Caplice has worked extensively on the investigation and cleanup of numerous active and abandoned industrial facilities, landfills, and other waste sites. He has also served as the project manager or senior technical advisor on hundreds of Phase I and Phase II Environmental Assessments at a multitude of sites, from small, undeveloped parcels of property to multi-location industrial facilities. Finally, Mr. Caplice has served as a technical expert on numerous State and Federal cases pertaining to the investigation and cleanup of contaminated properties as well as industrial hygiene and safety related issues pertaining to the investigation and remediation of contaminated property.

Mr. Caplice also has experience in the regulatory analysis of projects for compliance with federal and state environmental regulations, guidance, protocols, and procedures. His environmental regulatory experience includes evaluating compliance of private party actions, reviewing and preparing comments on proposed environmental laws and administrative rules, reviewing site documents and preparing detailed comments, and serving as a technical expert in various environmental cases. Mr. Caplice is also a regular speaker at environmental conferences and seminars.

Prior to joining K-Plus, Mr. Caplice served in several capacities for the USEPA, Region 5, including Manager of a Superfund unit responsible for sites in Illinois and Indiana, and Manager of the Pre-Remedial Unit that was responsible for the investigation and assessment of abandoned waste sites (CERCLIS sites) for possible inclusion on the Superfund National Priorities List. While at the USEPA, he also regularly represented the Agency at the International Joint Commission on Water Quality in the Great Lakes.
