Throop Street Bridge at Lincoln Yards
Throop Street and Bridge
Throop Street

Design Features:
- Emphasize the pedestrian and slower moving vehicles
- Special paving from Armitage to Cortland
- Integration with park
- Increased landscape with double row of trees along park edge
- Increased sidewalks
- Active ground floor uses
- Café zones – expanded setback zone recommended (+6’)
- Integrated drop-off zones
Throop Street Bridge

A steel truss arch signature bridge

- Links Lincoln Yards across the river
- Accommodates multiple users:
  - Vehicles
  - Pedestrians
  - Bikes
Throop Street Bridge Section
