Project Description

The Westgate Partners development team is proposing to build a trio of mixed-use buildings that includes a 13,800-square-foot grocery store and cafe. The nine-story eastern building would contain 72 affordable apartments and a ground-level restaurant with 10,000 square feet of public space for outdoor dining or public uses. The four-story western building would contain 16 affordable townhomes. The two-story central building would include a roof deck, play space, workspaces, and a plaza. Forty-five parking spaces at the rear of the complex would be available to residential tenants, with an additional 21 spaces available to shoppers.
