CLASS TITLE: WATER METER MACHINIST

CHARACTERISTICS OF THE CLASS

Under supervision, repairs and maintains residential and commercial cold water meters in the field and in a shop work environment, and performs related duties as required

ESSENTIAL DUTIES

- Drives to field sites and removes and replaces cold water meters identified as being defective or damaged
- Uses hand tools to remove and install smaller size meters and replace measuring elements and related parts from larger size meters
- Connects wiring from radio transmitters to meters to allow for automated meter reading
- Checks meter connections to ensure proper working condition of gauges measuring usage
- Tests radio signals for proper transmission of data from meters
- Works in the shop, using machine equipment and hand tools to dismantle, repair, and reassemble water meters
- Inspects meter parts for wear, cracks, and other defects and assesses general working condition
- Replaces meter parts including worn or broken gears and gaskets
- Uses testing devices to test parts and gears on re-assembled meters to ensure proper operation and accuracy in accordance with American Water Works Association standards
- Loads and unloads equipment and supplies on field service vehicle
- Cleans work sites after repairs
- Prepares work activity reports
- Performs routine repairs and maintenance of cold water meters in the field, as required

NOTE: The list of essential duties is not intended to be inclusive; there may be other duties that are essential to particular positions within the class.
