

Code: 7610

Family: Construction, Maintenance, and Skilled Labor
Service: Operation and Construction
Group: Steam and Operation Engineering
Series: Hoisting and Conveying Operation

CLASS TITLE: CONSTRUCTION EQUIPMENT INSPECTOR

CHARACTERISTICS OF THE CLASS

Under supervision, inspects construction equipment for safe operating condition and compliance with applicable provisions of the Municipal Building Code and industry standards to ensure public safety, and perform related duties as required

ESSENTIAL DUTIES

- Inspects tower cranes, mobile cranes, derricks and other construction related lifting and hoisting equipment for the public's safety at construction work sites
- Verifies crane operators' license to ensure proper license and classification
- Inspects construction equipment such as cranes, derricks, material hoisting towers and other related equipment to ensure equipment is properly erected and secured according to approved plans, and complies with applicable provisions of the Municipal Building Code and industry standards
- Inspects computerized and mechanical components of construction equipment, including cables, brakes, operating devices and safety devices to ensure safe operating condition and compliance with safety standards
- Examines structural components of cranes and derricks for structural integrity
- Interprets and explains the provisions of the Municipal Building Code pertaining to construction equipment and code violations and industry standards relating to the erection, re-configuration, and safe operation of construction equipment to contractors and engineers
- Issues citations for code violations and issues stop work orders where excessive violations are found during inspections
- Conducts follow-up inspections to ensure code violations have been corrected
- Reads and interprets construction blueprints
- Testifies at Administrative Hearings or Court proceedings regarding crane operators operating cranes without the proper license or poor operating conditions of construction equipment, code violations found during inspections, and/or corresponding citations issued
- Investigates accidents involving construction equipment to determine cause and recommends prevention methods to avoid reoccurrence
- Prepares inspection reports documenting findings on related work activities

NOTE: *The list of essential duties is not intended to be inclusive; there may be other duties that are essential to particular positions within the class.*

MINIMUM QUALIFICATIONS

Education, Training, and Experience

- Successful completion of a US Department of Labor registered Operating Engineer apprenticeship training program and journeyman status, plus at least six years of work experience in the operation of hoisting equipment or an equivalent combination of education, training and experience
