Dear Mr. Malone:

We request that the above referenced project be contracted under the Job Order Contracting (JOC) Method. Attachment A describes the scope of work and the appropriateness for using JOC for this project.

Please direct all technical inquiries to Project Manager Gerald McGleam at 744-4749 and all other inquiries to Raffi Sarrafian at 742-1974.

If you concur with our recommendation, please sign below and return a copy for our files.

Sincerely,

F01a JOC MOA
Request for use of JOC Procurement System

Iron Street Operational Campus
Project Summary

The Department of General Services has been tasked to develop a City of Chicago Operational Campus at 39th and Iron Streets. This campus will be used by the Departments of Water Management, Transportation, Fleet Management and Streets and Sanitation. DGS has selected a number of contract vehicles to execute the work associated with this campus. We are in a joint venture with the Public Building Commission to construct the DOWM facility. We have prepared the Fleet Management Fueling Station for City Public Bid. We are anticipating another joint venture with the PBC for the Streets and Sanitation facility. For the small Department of Transportation facility and the site work we would like to use the DGS Target Market JOC Contract. The general scope of work for this project is as follows:

- Site excavation and underground utilities.
- Concrete and Masonry
- Windows and Doors
- Roofing
- Interior partitions and finishes
- Mechanical, Electrical and Plumbing.
- Pavement Sub Base
- Site Lighting
- Site Fencing
- Landscaping
- Site Preparation - By Streets and Sanitation
- Site Paving and Striping - By CDOT

The estimated Project Budget for this phase of the campus is $2,500,000.

The Department of General Services requests the use of the JOC Procurement System for this project. We feel that JOC would be beneficial for the following reasons:

- The JOC Unit Price Book and Technical Specifications adequately cover the scope of work for this project.

- The Departments of Streets and Sanitation and Transportation have agreed to perform substantial amounts of the work associated with this project. JOC will allow us to contract for the tasks that will not be done by these departments. JOC will also give us the ability to coordinate work between the City Departments and the JOC contractor.

- The use of JOC will allow DGS to bid the work to the JOC Contractor in phases. Instead of waiting for weeks for the JOC Contractor to develop a Progen proposal for the entire project scope of work DGS can separate the design package in a way that excavation and underground utilities can be bid, awarded and construction started while the JOC contractor is developing a Progen proposal for Concrete and Masonry.
- DGS has just recently been directed to divert all storm water from the campus buildings and site into the nearby Bubbly Creek. This change is drainage design has caused a 6 week delay in completing the drainage design. The JOC program will allow us to mitigate that delay.

- DGS has been tasked to complete the site paving no later that November 1, 2003. The only way that we can meet this requirement is the use of the JOC program.

If you should have any questions or require any additional information please contact Jerry McGleam of my staff at 744-4749.
