UTILIZING JOC FOR CITY CONSTRUCTION PROJECTS

For all proposed projects please complete items 1 and 2 below. As appropriate, complete items 3, 4 and 5.

(Attach to the MOA)

1. Please describe the major features of the project:

The scope of the additional work to be performed under this sub-order is to install a drinking fountain with a concrete pad. This work also includes the installation of a 1 ½" Water Service Line (20LF), the installation of an 8" Storm Sewer (30LF), connection to an existing Catch Basin, and all removal work associated with the installation of the drinking fountain.

2. Please explain why this project could not be bid using the City's traditional bid process and the need to use the JOC procurement system:

This project has been coordinated with several community groups who expect this project to be completed as soon as possible. The drinking fountain was added after construction had already started at the request of the community. Additionally, the J.O.C. procurement system is advantageous due to the minimal scope of work for this project.

3. If this project is a one trade project, please provide additional explanation of why it would be in the City's best interest to do the project under JOC:

Not Applicable

4. If it is anticipated that over 25% of the project will be non-prepriced, please provide an explanation on why JOC should be used:

Not Applicable

5. If some elements of the proposed JOC project scope of work are covered by City Term Agreements, these elements should be removed from the JOC project scope of work. If it is not desirable to do so, please explain:

The Department of Procurement Services has determined Landscape Term Agreements can not be used for the purpose of construction.
