Dear Ms. Lumpkin:

This project will provide an integrated network system that will automate the method for issuing, approving and assigning visitor access cards and approvals. New security cameras will provide coverage that will enable vehicle identification, license plate recognition and driver/passenger identification.

Estimated duration of this Project is (120) one hundred twenty Days.

Enclosed is the preliminary estimate of cost for the work involved and a project description. Funding for this work is in place.

If you concur with this request, please notify this office as soon as possible and forward a copy of the approved memorandum of authorization. For any further information concerning this matter, contact Richard Patrick, Bureau of Water Engineering at 744-5067.

Yours Truly,

JOC Approval Letter
Utilizing JOC For City Construction Projects

Project No: M-05-003.A-2
Visitor Identification System

For all Proposed JOC Projects, Please complete Items 1 and 2 below. As appropriate, Complete items 3, 4 and 5. Attach to MOA (JOC Approval Letter)

1. Please describe the major features of this project.
   The scope of work for the JWPP visitor identification system will provide a network system that will automate and facilitate the assignment of visitor access cards. In addition, the project will provide new cameras that will be capable of identifying license plates, drivers and passengers.

2. Please explain why this project could not be bid using the city's traditional bid process and the need to use JOC Procurement system.
   This project will provide new security cameras and a network for issuing, approving and assigning visitor access cards. The use of traditional public bid system may compromise security for the Department of Water Management. For this reason, JOC represents the most efficient, practical and secure procurement system.

3. If the project is a one trade project, please provide additional explanation of why it would not be in the city's best interest to do the project under JOC.
   This is a multiple trade project that includes electrical and system process programming.

4. If it is anticipated that over 25% of the project will consist of Non-prepriced items, please provide an explanation on why JOC should be used.
   It is anticipated that less than 25% of the project cost will be Non-prepriced.

5. If some elements of the proposed JOC Project scope of work are covered by city term agreements, these elements should be removed from the JOC Project.
