#### Utilizing JOC For City Construction Projects

Project Number: 08-84-9-006.A

Department: TRANSPORTATION

Project Manager: O. Chaves

Telephone #: (312) 744-0647

For all Proposed JOC Projects, Please complete Items 1 and 2 below. As appropriate, Complete items 3,4 and 5. Attach to MOA (JOC Approval Letter)

**1. Please describe the major features of this project.**

The original scope of work included approximately 80 lin. ft. of river wall repairs to stabilize the existing failing wall in order to protect the adjacent single-family residence. The scope of work increased due to unforeseen sub soil conditions. The river wall stabilization required the installation of a caisson and tie rod anchoring system. The caisson construction required the installation of seven 36" diameter and 12' long permanent steel casings. High strength tie rods were used to connect the existing river wall to the caisson anchors. The City does not have equipment, expertise or manpower to perform this work in house.

**2. Please explain why this project could not be bid using the city's traditional bid process and the need to use JOC Procurement system.**

The purpose of this emergency repair is to protect the private property that is being undermined by the existing riverwall failure. Due to the emergency nature of this work, it would not be time or cost effective for us to perform the work through the City's traditional bid process

**3. If the project is a one trade project, please provide additional explanation of why it would be in the city's best interest to do the project under JOC:**

Not applicable -various trades will participate.

**4. If it is anticipated that over 25% of the project will consist of Non-prepriced items, please provide an explanation on why JOC should be used.**

N.A.

**5. If some elements of the proposed JOC project scope of work are covered by city term agreements, explain why they are included in this JOC project instead of being procured through the term agreements.**
