Utilizing JOC For City Construction Projects

Project Number: 09-84-9-044.A Department: Transportation
Project Manager: Omar Alsharbini Telephone #: (312) 744-4686

For all Proposed JOC Projects, Please complete Items 1 and 2 below. As appropriate, Complete items 3, 4 and 5. Attach to MOA (JOC Approval Letter)

1. Please describe the major features of this project.
   As part of the ongoing concrete repair at south and north abutments of the Central Park Viaduct over Garfield Lagoon, we have identified additional areas of surface spalls with exposed reinforcement and delaminated concrete that need to be repaired to insure the safety of the public and the integrity of the structure. We must undertake all this work in order to restore the bridge to a structurally acceptable condition. None of the additional concrete spalling were part of the original scope and could not be anticipated from the previous inspections.

2. Please explain why this project could not be bid using the city's traditional bid process and the need to use JOC Procurement system.
   The additional work is part of the ongoing project, and the contractor must continue working to complete the concrete repair at south and north abutments of the bridge. The additional concrete repairs require specialized personnel and equipment which could not be performed by City Forces and is not covered by an existing term agreement. It would not be time or cost effective for us to perform the work through the City's traditional bid process. It makes sense to repair these items at this time and avoid a costly separate mobilization in the near future.

3. If the project is a one trade project, please provide additional explanation of why it would be in the city's best interest to do the project under JOC:
   Not applicable -various trades will participate.

4. If it is anticipated that over 25% of the project will consist of Non-prepriced items, please provide an explanation on why JOC should be used.
   Not applicable

5. If some elements of the proposed JOC project scope of work are covered by city term agreements, explain why they are included in this JOC project instead of being procured through the term agreements.
