Re: JOC Project Number: PBC-11-025.A / tbd

Project Title: OEMC Chiller

Address: 1411 W. Madison

Estimated Cost: 420,000.00

Specification Number: 51701

Funding Source: .010-OC28-38-2005-2060-0540-80028151

Dear Ms. Rhee:

We request that the above referenced project be contracted under the Job Order Contracting (JOC) Method. Attachment A describes the scope of work and the appropriateness for using JOC for this project.

Please direct all technical inquiries to Project Manager Wendell Ewing at (312) 742-1494 and all other inquiries to Lori Edwards at 744-8525.

If you concur with our recommendation, please sign below and return a copy for our files.

Sincerely,

David J. Reynolds
Commissioner

APPROVED:

Jamie L. Rhee
Chief Procurement Officer

Approved: Thomas W. Vulovich Arthur Andros

* CONTRACTOR must meet or exceed MBE Goals for this project. Contractor presently has achieved only 10% MBE participation on this contract.*

Attachment A

Utilizing JOC For City Construction Projects
Office of Emergency Communications
1411 W. Madison

Project No: PBC-11-025.A

For all Proposed JOC Projects, Please complete Items 1 and 2 below. As appropriate, Complete items 3,4 and 5. Attach to MOA (JOC Approval Letter)

1. Please describe the major features of this project.

   Chiller Replacement

   OEMC Chiller Scope

   Project Description
   The Office of Emergency Management and Communications (OEMC) is located on 1411 W. Madison St. and is the city’s central location for coordinating delivery of police, fire and emergency medical service resources to 911 calls.
   Due to the nature of the building, cooling is needed throughout the facility 365 days a year. The current HVAC equipment consists of 2 functional, 300-ton, water-cooler Carrier chillers (models 19XR and 19XRV). There is also an abandoned absorption chiller located in the mechanical room that has been disconnected from the system. The estimated design load on the building is 325 tons, which causes both functioning chillers to be in service during peak load. The purpose of this project is to install another 300 ton chiller, giving the chilled water system an N+1 redundancy. The project will also include installing VFD’s on the 3 x 25HP cooling tower fans, as well as replacing the cooling tower fill. Equipment will need to be added to work in conjunction with existing Siemens controls. Shut down of existing chillers should be kept to a minimum during installation of new equipment.

   Work Scope
   The Department of General Services requires the contractor to remove the existing absorption chiller as well as any associated piping in preparation for installing the new water cooled chiller. VFDs are to be installed on the 3x25 HP cooling tower fan motors. This work will also require flush cleaning the condenser and chilled water lines prior to start up and replacing any necessary pipes, valves, etc needed to properly install the system. Controls need to be installed to work in conjunction with the existing Siemens supervisory system. Contractor is required to work in conjunction with chiller, cooling tower and VFD reps to ensure proper installation, balance and start up of the system. This scope also includes all electrical and control system installations as depicted on the drawings and as required for a complete and operating system. Any conflicts with the design should be addressed to the Department of General Services project manager. A material list is attached at the end of this request. A more detailed description of the work is specified as follows.

   Equipment Ordering
   a) A meeting will be held to review scope, equipment, and formalize a construction schedule.
   b) All equipment to be ordered must be approved by DGS project manager prior to placing the order
   c) Any questions or changes to the scope must be approved in writing by DGS project manager prior to commencement of work.
Demolition
   a) Disassemble and remove existing absorption chiller, associated pipes and electrical connections. Dispose of these items in an approved manner.
   b) Remove any electrical wires between absorption chiller and disconnect switches. Conduit may be reused if in good condition.
   c) Pipes and valves shall be removed where necessary. Headers and isolation valves should be reused.
   d) Remove existing gas line to current absorption chiller. Cap line at header. This may require gas for the building to be temporarily shut down.
   e) Remove existing absorption chiller exhaust stack.

Preparation
   a) Verify locations for installation of new chiller, VFDs and any other material necessary.
   b) Install support plates or concrete pads as needed for installing new chiller.
   c) Clean areas around pads to ensure safe and proper installation of chiller and other equipment.
   d) Existing absorption chiller exhaust should be capped and fire protected as necessary.
   e) All existing systems, equipment and utilities should be protected and if damaged should be repaired at the contractors expense.
   f) Existing chiller equipment should be shut down only as necessary, as cooling is needed throughout the building 365 days a year.

Installation
   a) Cap off existing absorption chiller exhaust stack per CITY OF CHICAGO code (3hr rating). Fireproof if necessary.
   b) Install new Carrier 19XRV chiller, as specified on drawings and per Carrier installation specifications.
   c) New chiller shall be installed as lead chiller. All three chillers shall be piped and wired for alternating, parallel flow per manufacturer’s instructions. Chillers shall alternate based on sequence of operation listed in drawings and specs.
   d) Install controls and electrical panels as necessary for units.
   e) All clearances, necessary components, and proper piping connections should follow chiller manufacturer’s instructions.
   f) Install new pipes, valves as shown on drawings. Headers and isolation valves should be reused.
   g) Pipes should be insulated as specified on drawings.
   h) Install new VFD on cooling towers per manufacturer’s specifications.
   i) Remove and install new cooling tower fill per manufacturer’s specifications.
   j) Ensure all electrical power and controls are connected properly and per manufacturer’s specification.
   k) Program sequence of operation per drawing and specs.
   l) The contactor shall review and adhere to all installations drawings, operation and maintenance manuals.
   m) The contractor should be prepared for scheduled field inspections at various stages of the construction phase.
   n) The contractor should provide comments and technical input to the CITY OF CHICAGO project manager throughout the construction phase.

Preparation for Startup
   a) Chilled water system (both condenser and chilled water lines) should be chemically flushed
and cleaned before start up.

b) Start up of chiller equipment must be performed in presence of chiller manufacturer trained personnel and Department of General Services project manager.

c) Start up of cooling tower equipment must be performed in presence of DGS project manager.

d) Successful start up of all equipment must be documented in the form of a written report signed off by DGS project manager.

e) Ensure all chillers, pipes and electrical connections are installed in accordance to manufacturer’s specifications and standards. All connections must be approved by manufacturer’s personnel.

f) Ensure all chillers, pipes, and electrical connections are installed in accordance to CITY OF CHICAGO codes and standards.

g) Chilled water system should be complete and operational per manufacturer’s specifications and DGS project manager.

h) Controls for chilled and condenser water system shall adhere to sequence of operation listed on drawings.

Documentation

a) Contractor is to obtain all required permits prior to commencing work.

b) All equipment required in this project should include a full 2 year warranty covering all parts and labor.

c) Five copies of all installations drawings, operation and maintenance manuals for newly installed equipment should be provided to the CITY OF CHICAGO.

Comments: Various components will also need to be purchased for proper installation of above listed parts, i.e. strainers, valves, pipe fittings, etc. All parts need to be confirmed with Department of General Services before being installed.

DRAWINGS

Drawings and specifications are forth coming.

2. Please explain why this project could not be bid using the city’s traditional bid process and the need to use JOC Procurement system.

The chiller needs to be installed as soon as possible and the use of JOC will allow us to complete the project in the least amount of time.

3. If the project is a one trade project, please provide an explanation of why it would not be in the city’s best interest to do the project using DGS trades or existing term agreements.

multi trade

4. If it is anticipated that over 25% of the project will consist of Non Pre-Priced items, please provide an explanation on why JOC should be used.

no
5. If some elements of the proposed JOC Project scope of work are covered by city term agreements, these elements should be removed from the JOC Project.

The Scope of Work for this project is not covered by a City Term Agreement.

Disclosure of Retained Parties

A. Definitions and Disclosure Requirements
1. As used herein, the term "Contractor" means a person or entity who has any contract lease with the City of Chicago.
2. Pursuant to Executive Order 97-1, every city contract and lease must be accompanied by a disclosure statement
   Providing certain information and attorneys, lobbyists, accountants, consultants, subcontractors, and other persons
   Whom the contractor has retained or expects to retain with respect to the contract or lease. In particular, the contractor
   must disclose the name of each such person, his or her business address, the nature of the relationship, and the
   amount of fees paid or estimated to be paid.
3. The Contractor is not required to disclose employees who are paid solely through the Contractor's regular payroll.
4. "Lobbyist" means any person (a) who for compensation or on behalf of any person other than himself undertakes to
   influence any legislative or administrative action, or (b) any part or whose duties as an employee of another
   includes undertaking to influence any legislative or administrative action.

B. Certification

Contractor hereby certifies as follows:

1. This Disclosure relates to the following transaction:

   Project name: PBC-11-026.A
   OEMC Chiller Replacement
   Specification, loan or other identifying number: 15035

2. Name of Contractor:
   Paul Borg Construction

3. EACH AND EVERY attorney, lobbyist, accountant, consultant, subcontractor, or other person retained or anticipated
   to be retained by the Contractor with respect to or in connection with the contract or lease is listed below
   (attach additional pages if necessary):

<table>
<thead>
<tr>
<th>Name</th>
<th>BUSINESS ADDRESS</th>
<th>MBE WBE or Non</th>
<th>Relationship (attorney, lobbyist, subcontractor, etc.)</th>
<th>FEE (Indicate whether paid or estimated)</th>

</tr>
</tbody>
</table>

ChecK HERE IF NO SUCH PERSONS HAVE BEEN RETAINED OR ARE ANTICIPATED TO BE RETAINED

4. The Contractor understands and agrees that the city may rely on the information provided herein and that providing
   any false incomplete or inaccurate information shall constitute default under the contract and may result in
   termination of the contract or lease.

5. The Contractor understands and agrees that in any case in which the Contractor is uncertain whether a disclosure is required under the Executive order, the Contractor must either
   ask the city whether disclosure is required or make the disclosure.

Under the Penalties of perjury, I certify that I am authorized to execute this Disclosure on behalf of the Contractor that the information disclosed herein is true and complete, and that no
relevant information has been withheld.
