Procurement History

Under provision of the Safe Drinking Water Act of 1974, the Federal government through the EPA has established national standards of safe drinking water. The Illinois EPA mandates that municipal governments establish programs to contain records and data on inspections, tests, retests, installation, and repairs on all back flow devices. The XC2 system, designed by EngSoft Solutions has been in use by Water Management for three years and contains data on 16,000 back flow as well 29,000 records on service terminations. XC2 system is vital to Water Management as it allows the Department to store records, monitor compliance and retests as required by EPA standards. Presently, Water Management requires EngSoft to provide maintenance and service to their exclusive product.

Estimated Cost

$12695.00 includes updated software and technical support.  
$ 6595.00 includes three day training. Includes travel expenses for vendor.  
$19290 includes software and training

Scheduled Requirements

Installation of system on server and client workstations  
3 day training for users and Data Base Administrator

Exclusive or Unique Capabilities

There are no other authorized organizations or persons qualified to install or provide specific training for the proposed software. EngSoft Solutions is manufacturer and sole distributor of the XC2 Backflow Prevention Management Software which is currently being used by the Department of Water Management, and is to be updated to the current version. Should any party, person or organization manipulate any aspect of the application or provide training not authorized by the manufacturer, all warranties will be voided and EngSoft will not be liable for any failure to the system.

Subject:  MBE/WBE Compliance - Request for Waiver

Dear Mr. Griggs,

This letter is to request a waiver of the MBE/WBE Compliance regulations regarding our contract with the City of Chicago for products and services to be provided to the Department of Water/Office of Water Management.

Our office has conducted a search of the MBE/WBE website for the City of Chicago, Department of Procurement Services to locate possible MBE/WBE certified business that we could subcontract to provide direct products or services or indirect products or services in regards to our proposed contract with the City.

EngSoft Solutions is the sole source for all aspects of XC2® Backflow Prevention Management Software, which is currently being used by the City of Chicago Department of Water, and is to be upgraded to the current version, as well as training to be provided to the staff for the use of the software to administer the backflow prevention program which is actively in place at the Department of Water.  XC2® Software has been actively in use at the Department of Water since January 2000.

Our only office is located in the San Francisco, CA Bay Area and as such, we have no relationships with any organizations in the Chicago area except for the Department of Water.  Our office has searched the database for any possible vendors who might be familiar with any aspect of backflow prevention program management or who may be familiar with the use of XC2® Software.  No vendors of any relativity whatsoever were found.
Further, we have called and spoken with Ms. Gail Borenstein at the Department of Procurement Services in order to further assure if there is or might be any MBE/WBE organizations who could possibly provide these direct or indirect services. As of this writing, we have not been able to locate any MBE/WBE organizations who could provide any related services.

We have contacted the following Assist Agencies in Chicago:

Called: 02/24/04  
Chicago Minority Business Development Council  
1 E. Wacker Drive, Suite 1200  
Chicago, IL 60601  
Kevin Heard  
312-755-8880 Ext. 20  
kheard@cmbd.org

Disposition: Have not heard back from this organization

Called: 02/24/04  
Women's Business Development Center  
8 S. Michigan Ave., Suite 400

Phone: (773) 271-1364  
Fax: (773) 271-1364

Disposition: Received responses from:

Kevin C. Scates  
KCS Computer Consulting, Inc.  
773-903-5158

Andre Mitchell  
The Computer Doctor

Neither of these people had any experience whatsoever with XC2 Software or Backflow Prevention Management Software of any kind, nor had ever heard of Backflow Prevention.
Our proposed on-site services are for the installation of and training only of XC2® Software for the purpose of the management and administration of the City of Chicago's Backflow Prevention Program.

No other additional services or products will be provided by our company. The City of Chicago will be supplying all computer related hardware, operating system software, and network software required for the system to properly function. We will not be involved in any way to configure such hardware or software except to consult as to the requirements needed for our software to properly function. After thorough searching and consideration, we have found no MBE/WBE vendors who could supply any portion of this contract, either directly or indirectly.

As there are no other authorized organizations or persons qualified to install or provide specific training for XC2® Software, should any other party, person or organization modify any aspect of XC2® Software, its installation, setup or functions, or provide training that may be contrary to the correct use of the software as indicated by EngSoft Solutions, any and all warranties pertaining to our software or related services will be null and void. As well, EngSoft Solutions will not be liable for any failure, dysfunction or loss of data integrity, downtime or any other aspect pertaining to the software should any other party intervene.

In the future, in the event that other contracts between our company and the City of Chicago are necessary, we will persevere to use MBE/WBE vendors whenever and however possible in order to successfully complete the contract requirements.

Please contact me directly if you have any questions or concerns regarding the above.

Regards,

Randy Engle, President
EngSoft Solutions

Subject: Sole Source of XC2® Software

To Whom it May Concern,

This letter is to confirm that XC2® Software is a "sole source" software product, developed, sold and distributed exclusively by EngSoft Solutions, Fairfax, CA. No division of EngSoft Solutions nor any other company makes a similar or competing product. This product must be purchased directly by organizations from EngSoft Solutions at the address listed above. There are no agents or dealers authorized to represent this product.

XC2® Software is unique in the water utility/institution operations/maintenance industry in the scope of its functionality and feature set.

There are no other like items or products available for purchase that would serve the same purpose or scope of functions provided by XC2 Software and EngSoft Solutions and there is only one price for the above product because of exclusive distribution rights.

As well there exist no authorized organizations or persons outside of EngSoft Solutions who are capable of providing training for the use of, installation, maintenance, upgrades or setup of XC2® Software. In the event that any other person or organization not directly authorized by EngSoft Solutions provides any of the above stated services, any warrantees regarding XC2® Software will be null and void.

If you desire additional information, don't hesitate to contact me at 800.761.4999 or visit our website at www.engsoft.com. Thank you for your interest in our products. We are happy to be of service.

Sincerely,

[Signature]

April 19, 2004

Mr. Eric Griggs
Chief Procurement Officer
Department of Procurement Services
Room 403, City Hall
121 N. LaSalle Street
Chicago, Illinois 60602

Dear Mr. Griggs:

The Department of Water Management hereby concurs with and supports the 16/9% MBE and 4.5% WBE full waiver requested by EngSoft Solutions of Fairfax, California. EngSoft Solutions has highly trained technicians to administer their patented XC2 Backflow Prevention software and service.

The XC2 system has been in use by the Department of Water Management for three years and contains data on service terminations and backflow devices. The Illinois EPA mandates that municipal governments establish programs to contain records and data on inspections, tests, retests, installation and repairs on all backflow devices.

EngSoft Solutions has contacted several Assist Agencies as provided by the Department of Procurement Services. Although EngSoft did receive responses from several certified MBE/WBE firms, none of the respondents were able to participate directly or indirectly in the proposed contract with EngSoft.

Your consideration in this matter is greatly appreciated.

Very truly yours,
