# **Justification for Non-Competitive Procurement**

# <u>Justification</u>

CDPH is in need of a comprehensive emergency planning framework to leverage and ensure compliance with a growing number of federal programs, requirements and compliance mandates. As the number of these requirements and mandates increase from one funding year to the next, it is becoming increasingly difficult to ensure that all plans and procedures are consistent and integrated across the multiple federal compliance requirements and across the multiple federal preparedness programs through which CDPH receives funding. Additionally, the standard mechanism of plan development, testing, evaluation, review and modification is becoming increasingly difficult to maintain and ensure compliance.

Integrated Solutions Consulting (ISC) has prepared the nation's only know Comprehensive Public Health Emergency Plan (CPHEP). ISC uses its Integrated Planning Cycle<sup>TM</sup> model to develop a CPHEP on its patented Integrated Electronic Planning Platform<sup>TM</sup> (IEPP). The IEPP<sup>TM</sup> provides jurisdictions with an emergency management planning system that facilitates the integration of comprehensive and department-specific emergency planning doctrine in a consistent and operational format. The IEPP<sup>TM</sup> also improves the efficiency of incorporating lessons learned from After Action reports (AARs), as well as identifying and resolving operational gaps for all hazards.

# **Estimated Cost**

- 1. The total cost for the full project, including the electronic planning platform is \$300,000.
- 2. The breakdown of the costs is:
  - a. \$7,860 for Task 1 (week 1): Kick-off and orientation
  - b. \$48,530 for Task 2 (weeks 2-6): Review and organize resources
  - c. \$52,250 for Task 3 (weeks 4-12): Evaluate and identify operational strategies. Deliverable: basic plan
  - d. \$66,680 for Task 4 (weeks 12-18): Analyze capabilities and projected needs. Deliverable: Functional annexes
  - e. \$66,580 for Task 5 (weeks 18-24): Identify organizational profile, assets and vulnerabilities. Deliverable: Hazard specific annexes
  - f. \$28,440 for Task 6 (weeks 24-28): Review, validation and modification
  - g. \$29,660 for Task 7 (weeks 28-36): Finalize CPHEP and upload planning platform. Deliverable: Integrated Electronic Planning Platform

#### Schedule Requirements

Due to the condensed grant funding year, this project will need to be fast tracked in order to reach completion prior to the end of the funding year. Therefore the service period will be nine months, beginning at the initiation of the contract. The anticipated completion date will be set at August 9, 2008.

# **Exclusive of Unique Capability**

Integrated Solutions Consulting (ISC) has prepared the nation's only known Comprehensive Public Health Emergency Plan (CPHEP). We have been unable to identify any other similar program or similar services provided by other organizations. ISC has a patent pending for their IEPP™, a program that provides jurisdictions with an emergency management planning system in a consistent and operational format. ISC's staff is knowledgeable and experienced in big city planning, as well operational response to some of the nation's largest disasters.

#### Notice of Award

Issue Date: 12/06/2007

COOPERATIVE AGREEMENTS Department of Health and Human Services Centers for Disease Control

COORDINATING OFFICE FOR TERRORISM PREPAREDNESS AND EMERGENCY RESPONSE

Grant Number: 5U90TP517008-08 REVISED

Principal Investigator(s): CHRISTINE KOSMOS

Project Title: PUBLIC HEALTH PREPAREDNESS AND RESPONSE FOR BIOTERRORISM

333 SOUTH STATE STREET, ROOM 200

CHICAGO, IL 606043972

**Budget Period:** 08/31/2007 - 08/09/2008 Project Period: 08/31/2005 - 08/09/2010

Dear Business Official:

The Centers for Disease Control hereby revises this award (see "Award Calculation" in Section I and "Terms and Conditions" in Section III) to CHICAGO CITY DEPARTMENT OF PUBLIC HEALTH in support of the above referenced project. This award is pursuant to the authority of SEC391(A)317(K)OFPHS42U.S.C.SEC241A 247B and is subject to the requirements of this statute and regulation and of other referenced, incorporated or attached terms and conditions.

Acceptance of this award including the "Terms and Conditions" is acknowledged by the grantee when funds are drawn down or otherwise obtained from the grant payment system.

Award recipients are strongly encouraged to submit to PubMed Central (PMC), upon acceptance for publication, an electronic version of peer-reviewed, original research publications, resulting from research supported in whole or in part, with direct costs from Centers for Disease Control. The author's final manuscript is defined as the final version accepted for journal publication, and includes all modifications from the publishing peer review process. For additional information, please visit http://publicaccess.nih.gov/.

If you have any questions about this award, please contact the individual(s) referenced in Section IV.

Sincerely yours,

Sharon H Robertson

Grants Management Officer

parm II. Robert

# SECTION II - PAYMENT/HOTLINE INFORMATION - 5U90TP517008-08 REVISED

For payment information see Payment Information section in Additional Terms and Conditions.

INSPECTOR GENERAL: The HHS Office Inspector General (OIG) maintains a toll-free number (1-800-HHS-TIPS [1-800-447-8477]) for receiving information concerning fraud, waste or abuse under grants and cooperative agreements. Information also may be submitted by e-mail to hhstips@oig.hhs.gov or by mail to Office of the Inspector General, Department of Health and Human Services, Attn: HOTLINE, 330 Independence Ave., SW, Washington DC 20201. Such reports are treated as sensitive material and submitters may decline to give their names if they choose to remain anonymous. This note replaces the Inspector General contact information cited in previous notice of award.

#### SECTION III - TERMS AND CONDITIONS - 5U90TP517008-08 REVISED

This award is based on the application submitted to, and as approved by, CDC on the above-titled project and is subject to the terms and conditions incorporated either directly or by reference in the following:

- a. The grant program legislation and program regulation cited in this Notice of Award.
- b. The restrictions on the expenditure of federal funds in appropriations acts to the extent those restrictions are pertinent to the award.
- c. 45 CFR Part 74 or 45 CFR Part 92 as applicable.
- d. The HS Grants Policy Statement, including addenda in effect as of the beginning date of the budget period.
- This award notice, INCLUDING THE TERMS AND CONDITIONS CITED BELOW.

This award is funded by the following list of institutes. Any papers published under the auspices of this award must cite the funding support of all institutes.

Coordinating Office For Terrorism Preparedness And Emergency Response (CTPER)

# Treatment of Program Income:

**Additional Costs** 

#### SECTION IV - TP Special Terms and Conditions - 5U90TP517008-08 REVISED

# ADDITIONAL TERMS AND CONDITIONS

#### **AMENDMENT 3**

The purpose of this revised Notice of Award is to redirect the funds that were awarded on September 25, 2007 and placed in the "Other" budget category. The revised budget is based on the submission of your application dated October 24, 2007.

Award Restrictions: The 70% restriction is no longer in effect. However, \$264,231 of your award remains restricted as a result of the review of your application. Please submit your request to release restrictions via PERFORMS by January 7, 2008.

TARS/BERS: See attached. A response to the TARS/BERS must be submitted via PERFORMS by January 7, 2008.

## Reporting Requirements:

Progress Reports and Financial Status Reports:

A mid-year progress report representing the period August 31, 2007 through February 29, 2008, performance measures, and an estimated financial status report are due April 30, 2008.

An end-of-year report, performance measures and a final financial status report are due November 9, 2008.

NOTE: Activities to be addressed during the Budget Period 8 can be found in Appendix 1 of the continuation guidance that was issued September 21, 2007.

Project/Budget Period End Dates:

The continuation guidance stated that "as a result of the many changes and new requirements established in the Pandemic and All-Hazards Preparedness Act (PAHPA), CDC will conclude the Cooperative Agreements funded under Program Announcement AA154 at the close of Budget Period 8." This statement is rescinded and the project and budget period end dates have been changed back to August 09, 2010. As a result of this change, the 09 budget period will begin August 10, 2008.

All other Terms and Conditions remain in effect.

Ms. Christine Kosmos Chicago Department of Public Health DePaul Center 333 South State Street Chicago, Illinois 60604

Re: Electronic Comprehensive Health Emergency Planning

The CDPH has identified a critical need to enhance the operational capabilities of the department during incidents and disasters. In order for CDPH to reach a steady-state of high-level preparedness it need of an electronic system to provide a platform for proactive, detailed, and performance based planning doctrine. For this reason, CDPH is in pursuit of a vendor that has the unique capability to provide a public health incident management planning system that facilitates the integration of comprehensive and department-specific emergency planning doctrine in a consistent and operational format.

Integrated Solutions Consulting (ISC) has prepared the nation's only known Comprehensive Public Health Emergency Plan (CPHEP). ISC has used its Integrated Planning Cycle<sup>TM</sup> model to develop a CPHEP on ISC's patented Integrated Electronic Planning Platform<sup>TM</sup> (IEPP). The IEPP<sup>TM</sup> provides jurisdictions with an emergency management planning system that facilitates the integration of comprehensive and department-specific emergency planning doctrine in a consistent and operational format. Additionally, the IEPP<sup>TM</sup> improves the efficiency of incorporating lessons-learned and AARs, as well as identifying and resolving operational gaps for all hazards.

We are unaware of any other similar program or similar services provided by other organizations. IEPP<sup>TM</sup> is a patent-pending program that provides jurisdictions with an emergency management planning system in a consistent and operational format. ISC's staff is knowledgeable and experienced in big city planning, as well operational response to some of the nation's largest disasters. We rely on well-known experts in the development of their programs.

Sincerely,

**Integrated Solutions Consulting** 

Paul DeLuca Senior Associate

Pul De Luca

# CHICAGO DEPARTMENT OF PUBLIC HEALTH SCOPE OF SERVICES

The contractor (Integrated Solutions Consulting or ISC) will provide comprehensive public health emergency planning services, with full electronic integration for the public health Emergency Preparedness Division.

ISC has developed the Integrated Planning Cycle™ model to facilitate the creation of all-hazards, emergency management doctrine through an integrated cycle of planning, testing, evaluating and updating. This approach aligns the diverse and growing number of new federal directives and programs, providing a proven method of effectively managing the influx of federal requirements, and the increasing demands on State and local governments. ISC uses the Integrated Planning Cycle™ model to develop a Comprehensive Public Health Emergency Plan (CPHEP) on ISC's patented Integrated Electronic Planning Platform™ (IEPP).

CDPH seeks to contract with Integrated Solutions Consulting and to obtain a comprehensive emergency management plan on the IEPP™, a patent-pending program that provides jurisdictions with an emergency management planning system that facilitates the integration of comprehensive and department-specific emergency planning doctrine. The IEPP™ will provide CDPH with a webenabled system to view, update and maintain the CPHEP.

This integrated planning platform will enable CDPH to increase its level of preparedness in an all-hazards approach, while simultaneously incorporating a number of federal mandates including CDC Preparedness goals, Homeland Security Exercise Evaluation Program (HSEEP), the National Incident Management System (NIMS) and the Target Capability List (TCL).

# CHICAGO DEPARTMENT OF PUBLIC HEALTH SCHEDULE OF COMPENSATION

# Payment Schedule:

Integrated Solutions Consulting has proposed an estimated project schedule, which details phases of the project and expected completion timeframes for each phase. A proposed pricing form, which includes cost estimates for all phases and services therein, is attached. Invoices for payment will be submitted upon the completion of each phase of the project and should be paid upon approval of the program Deputy Commissioner and Finance Officer.

Date: 22-October-07

# Project Proposal For Chicago Department of Public Health Comprehensive Public Health Emergency Plan

### **Project Understanding**

The Center for Disease Control and Prevention (CDC) has issued the Public Health Emergency Preparedness (PHEP) Cooperative Agreement dated September 21, 2007. This document contains guidance which specifies compliance requirements for Budget Period 8 (31-Aug-07 to 09-Aug-08) and begins the process of directing the sixty two (62) grant recipients, including the Chicago Department of Public Health, to complete performance based reports validating their method of implementing funding received from the PHEP.

Based on the new version of the PHEP Cooperative Agreement and new legislation passed by Congress, CDC will require CDPH to increase the level of preparedness in an All-Hazard approach with more demanding planning requirements. Failure to meet predetermined CDC benchmarks and performance measures will result in withholding of grant funding. The PHEP Cooperative Agreement guidance requires:

- Development of a clear and comprehensive public health emergency plan that will delineate who will do what during all stages of the event;
- Identify specific competencies needed ensure comprehensive operational planning compliance;
- Employ a continual cycle of planning maintenance, exercise, evaluation, testing, training and updating all operational phases of a public health plan.

These preparedness activities are complex, based on operational implementation, and integrate multiple Federal programs, including: CDC Preparedness Goals, Homeland Security Exercise Evaluation Program (HSEEP), NIMS, and the Target Capability List (TCL). Given this complexity, as well as the growing interaction and improved coordination between the Federal, State, and Local partners, it is critical to the operational success of an organization to instill integrated and comprehensive public health emergency plans that include all hazards, incorporate lessons learned, and address the latest modifications to Federal and State public health preparedness programs. To be considered a success, planning doctrine must be developed in a consistent framework and be integrated with existing methods, strategies and doctrine.

In order to effectively meet CDC Performance Based programmatic requirements, the Chicago Department of Public Health (CDPH) intends to develop a Comprehensive Public Health Emergency Plan (CPHEP). The CDPH has realized that the standard hardcopy public health emergency planning and jurisdictional Emergency Operations Plan (EOP) have a difficult time providing the necessary combination of standardization, flexibility, and operational significance necessary for maintaining a high-level of continual or steady-state preparedness. The CPHEP planning process evolves existing concepts and doctrine into a detailed and operational focused planning and preparedness system designed to be continually reviewed, exercised, activated, modified, and maintained. The CEMP design is dual purpose: a dynamic learning instrument designed to increase situational and operational awareness; combined with operational components designated to provide guidance and procedures during exercises and actual incidents.

Technical Scope of Work

Comprehensive Public Health Emergency Planning Services

Date: 22-October-07

# General Approach

Integrated Solutions Consulting, Inc. (ISC) is a recognized leader in developing CPHEP, including development of CPHEP for some of the Nation's largest public health systems. The CPHEP is comprehensive in design, providing a common operational picture which is integrated with operational doctrine that provides guidance and direction during all phases of a public health emergency. The CPHEP is designed for the end user and agency leadership as it provides Command and Control guidance, time and phases of operations, and integrates operational functions with requisite Standard Operational Procedures (SOP) to focus on: what to do, when to do it, and the how to do it.

ISC has witnessed first-hand the need to develop a web-enabled system that will facilitate the development and maintenance of consistent, operational planning doctrine for all hazards. For this reason, ISC has invested significant resources in the development, update, maintenance and improvement of a unique operating system that will assist in the management and operational implementation of emergency planning doctrine.

The Integrated Electronic Planning Platform<sup>TM</sup> (IEPP), and its Integrated Planning Cycle<sup>TM</sup> model, provides jurisdictions with an emergency management planning system that facilitates the integration of comprehensive and department emergency planning doctrine in a consistent and operational format. Additionally, the IEPP<sup>TM</sup> improves the efficiency of incorporating lessons-learned and After-Action Reports, as well as identifying and resolving operational gaps for all hazards.

The Integrated Planning Cycle<sup>TM</sup> is a process that ISC has developed to facilitate the creation of all-hazard, emergency management doctrine through an integrated cycle of planning, testing, evaluating and updating. This approach aligns the diverse and growing number of new federal directives and programs, providing a proven method of effectively managing the influx of federal requirements, and the increasing demands on State and local governments.

Due to the schedule constraints of this project, ISC proposes to provide CDPH with periodic deliverables throughout the development of the Comprehensive Public Health Emergency Plan on the IEPP<sup>TM</sup> system. Completion of those tasks that follow will be contingent upon the timely receipt and comment by CDPH on each submittal. Therefore, ISC assumes a CDPH review period of three weeks for each of the Reporting deliverables.

Once initiated, the CPHEP should be completed under an intensive project timeline lasting nine (9) months. This nine month project timeline will have the CPHEP completed and presented on the IEPPTM system by 01-Aug-07. This will ensure completion in time for the anticipated CDC performance based grant requirements for the 2009 grant year.

# Task 1- Kickoff Meeting and Orientation

It is essential that a clear understanding of the goals and objectives are established prior to the initiation of the project. Integrated Solutions Consulting will structure a Kickoff meeting prior to the start of the project to fulfill this goal. During the Kickoff meeting ISC will meet with CDPH Management and other interested stakeholders to communicate goals, objectives and expectations regarding the execution and the development of the CPHEP in the IEPPTM system format. ISC will detail their work plan and expected dates of completion of materials. Strategies to involve key stakeholders from CDPH to participate in the

Technical Scope of Work

Comprehensive Public Health Emergency Planning Services

Date: 22-October-07

planning process will be communicated. The project management for ISC and CDPH will discuss and define administrative requirements for the project including correspondence, invoicing, and other related project issues. CDPH staff will have the opportunity to ask questions and convey expectations of the project.

Maintaining a collaborative approach and integrating planning with current business practices is essential to building operationally significant plans that satisfy Federal and State regulations. With this goal in mind, key personnel involved in emergency operations will be chosen to form a "Planning Workshop". The responsibilities of the Workshop will be to review documentation presented by ISC, provide feedback and come to a consensus on recommendations presented by ISC.

#### Duration: Week 1

# Task 2- Review and Organize Resources

Following the Kick-off Meeting, ISC will request information and documentation relevant to the development of the CPHEP. This information includes but is not exclusive to:

- Existing departmental practices and operational procedures
- Chicago demographic data and development trends
- CDPH planning documents (Emergency Operations Plan, Hazard Mitigation and Vulnerability Assessment, existing SOPs, etc)
- Any existing draft or completed CDPH operational doctrine
- Relevant Federal and State correspondence including CDC, DHHS, DHS, etc.
- Hazard identification and historical documents,
- Local resources (fire, police, regional planning, volunteer organizations, etc)

After Integrated Solutions Consulting is in receipt of the requested information and documentation, a thorough review of this data and operational doctrine will commence. The information will be evaluated and incorporated into the planning process to the extent possible to provide a CPHEP that integrates with planning partners.

#### Duration: Weeks 2-6

#### Task 3- Evaluate and Identify Operational Strategies

ISC will analyze current operational strategies and utilize its proven methodology to formulate a unified planning system that facilitates integration of planning doctrine, continuous maintenance, incorporation of lessons-learned, identification of operational gaps and periodic updates. By employing these proven techniques, ISC will develop an approach that aligns DHS, FEMA and State of Illinois strategies with prescribed federal directives. The result of this strategy will produce operationally significant doctrine that integrates with the pre-identified operational strategies.

A cohesive relationship between the CPHEP and existing City of Chicago and CDPH doctrine is especially imperative in the development and implementation of procedures and protocol of the CPHEP's basic plan, functional and hazard specific annexes. The underlying segments of the CPHEP will detail the critical functional or operational procedures that the primary and supporting agencies will perform in unified large-scale response and recovery operations.

Identifying and articulating a common operational strategy will form the basis for a coherent and integrated response within the department and amongst its emergency management partners.

Technical Scope of Work

Comprehensive Public Health Emergency Planning Services

Date: 22-October-07

Duration: Weeks 4-12 Deliverable: Basic Plan

### Task 4- Analyze Capabilities and Projected Needs

ISC will determine CDPH needs in relation to specific hazards, CDPH capabilities and existing operational plans. ISC will utilize its collective and complimentary experience of operationalizing ESFs for large-scale emergencies and disasters, as well as the various disciplines that support the operation, including:

- Emergency Management
- Homeland Security
- Public Works and Various Engineering Disciplines
- Law Enforcement & Fire
- Public Health
- Environmental/Hazardous Materials

An inventory of CDPH assets will be developed based on the five categories defined in DHS/FEMA protocol. This inventory of assets will assist in identifying areas that are subject to the various natural and technological hazards. These five categories consist of:

- Essential Facilities
- Transportation Systems
- Lifeline Utility Systems
- High Potential Loss Facilities (financial institutions, government buildings, etc.)
- Hazardous Waste Facilities

An initial inventory will use the baseline data provided by the CDPH and be supplemented by GIS data if available. The effort includes developing and mapping a general inventory of assets in the City. Using the base map developed in the previous task, ISC and CDPH staff will identify the assets inside areas for each identified hazard that has a defined operational boundary.

ISC will review the inventory to ensure that all personnel, facilities, and sectors critical to the continuity of operations, and services provided by the CDPH are included in the natural hazard planning process. To maintain an expedited schedule, ISC should receive appropriate data from CDPH within five (5) days of the notice-to-proceed. If data is insufficient or clarification is needed, a representative of ISC will schedule a meeting with the CDPH to ensure the necessary collaboration.

ISC will analyze the existing doctrine and assess its compliance with Part 302 of the Robert T. Stafford Act: Civil Defense-State and Local Emergency Management Assistance Program, the FEMA State and Local Emergency Planning Guidance and the 2008 CDC PHEP Cooperative Agreement. The analysis will identify deficiencies and recommended improvements including identifying organizational and content enhancements and identifying strategies, training, and exercises to increase the efficiency of preparedness, mitigation, response and recovery operations of CDPH.

Once the analysis is complete, deficient areas will be identified and compared against lesson learned and national best practices. This comparison will help identify gaps and improvements to be made for each Functional Annex.

Technical Scope of Work

Comprehensive Public Health Emergency Planning Services

Date: 22-October-07

Duration: Weeks 12-18

Deliverable: Functional Annexes

# Task 5- Identify Organizational Profile, Assets and Vulnerabilities

Utilizing the inventory of local hazards identified in the Chicago All Hazard Mitigation Plan, ISC will develop criteria to develop procedures and techniques to quantify the public health implications of hazard events depending on their location, duration, intensity, and severity. Each hazard type has unique characteristics that can impact the City of Chicago in different ways based on geography, development, population distribution, economic significance, systematic functions, etc. Special attention will be given to those incidents that are considered Catastrophic Incidences and have occurred in other communities similar to Chicago. The following factors will be addressed:

- Application mode acts or events that will cause hazard
- Duration length of time the hazard is present
- Dynamic/static characteristics expand, contract, confined, magnitude, and space that define the extent and/or severity of the hazard
- Mitigating and exacerbating conditions characteristics that reduce or enhance effects.

The information gathered for each of the hazards will be contingent on the characteristic of the event (i.e., flooding in particular areas, tornado in sporadic locations, reducing or exacerbating conditions of a chemical release, etc). ISC will use this information obtained to develop hazard specific planning considerations specific to mission and operational objectives of the City of Chicago and CDPH.

Duration: Weeks 18-24

Deliverable: Hazard Specific Appendices

#### Task 6- Review, Validation and Modification

Upon Completion of the CPHEP, CDPH will be presented the opportunity to provide feedback of the completed product. Final drafts copies will be presented to pre-designated stakeholders within the department for review.

CDPH will be allotted a 4 week period to identify any modifications or updates deemed necessary. Once this review has been completed a meeting will be schedule to communicate those concerns to ISC. During this meeting a consensus between CDPH and ISC staff will be reached about plan modification. ISC will then have 8 weeks to make the corresponding updates and present CDPH with a final product.

Duration: Weeks 24-28

# Task 7- Finalize CPHEP and Upload Planning Platform

Upon completion of the CPHEP, CDPH will have planning on an electronic format that will provide common access, develop a common operational picture and foster a "Steady State" of readiness throughout the organization. Final presentation of the CPHEP will be delivered to CDPH management in paper format, electronic copies and as part of the Integrated Electronic Planning Platform. The IEPP™ will provide CDPH with an emergency management planning system that facilitates the integration of comprehensive and department-specific emergency planning doctrine in a consistent and operational

Technical Scope of Work

Comprehensive Public Health Emergency Planning Services

Date: 22-October-07

format. Additionally, the IEPP<sup>TM</sup> improves the efficiency of incorporating lessons-learned and AARs, as well as identifying and resolving operational gaps for all hazards.

Upon completion of this project, Integrated Solutions Consulting will remain – to the extent possible - as a source of information, expertise and advice for CDPH emergency operations.

Duration: Weeks 28-36

Deliverable: Integrated Electronic Planning Platform

# **Estimated Project Budget**

A Project Pricing Form, included in Attachment A of this Proposed Project Scope of Services, presents the Lump Sum (Not to Exceed) fee estimate for each task of the work described in this Scope of Services. Notes associated with the Project Pricing Forms are an integral part of the Total Project Fee, and are presented below.

Project fees for this proposed project are based on other ISC projects unique to the development of comprehensive plans on the Integrated Emergency Planning Platform. ISC anticipates minimum of 3 employees dedicated full time to this project, with support from specialists on an as needed basis. Labor, rates, and titles are provided in Attachment A.

The IEPP<sup>TM</sup> will provide CDPH with a web-enabled system to view, update, and maintain the CPHEP. ISC through the IEPP<sup>TM</sup> will host the CPHEP for six months during which CDPH can evaluate, the IEPP<sup>TM</sup> system to determine its applicability and operability with CDPH. During this time ISC will provide guidance and make limited modifications to the structure of the IEPP<sup>TM</sup> and the CPHEP during the same 6 month time period.

# **Anticipated Project Schedule**

The estimated project schedule will be approximately (36 weeks). Each project deliverable will have its own project work schedule. The project timeline of each deliverable are as follows:

Basic plan- Week 12 Functional Annexes- Week 18 Hazard Specific Appendices- Week 24 Plan Review, Validation and Modification- Week 28 Integrated Electronic Planning Platform- Week 36

Completion of those tasks is contingent upon the timely delivery, receipt and correspondence with the CDPH. Therefore Integrated Solutions Consulting assumes a client review period of 20 days for each of the Reporting deliverables.

It is assumed that CDPH will effectively communicate the project status and the anticipated need of Integrated Solutions Consulting. Furthermore, it is assumed that CDPH will provide available information and documentation in a timely manner when requested by Integrated Solutions Consulting.

December 19, 2007

Ms. Christine Kosmos Chicago Department of Public Health DePaul Center 333 South State Street Chicago, Illinois 60604

Re: Commitment of MBE/WBE Participation

The Chicago Department of Public Health (CDPH) has identified a critical need to enhance its operational capabilities that would be employed during complex large-scale natural, technological, and political disasters. The CDPH has recognized that the capabilities needed for prevent, protect, respond, and recover operations are dependent on maintaining a high-level of determined preparedness.

Preparedness operations, in the context of emergencies, are a complex fusion of training, exercises, actual incidents, After Action Reports (AARs), and compliance with federal, state, and local guidance; the focus of these preparedness operations is capturing this knowledge and experience in planning doctrine, guidelines, and procedures. The operational planning doctrine required by CDPH and its federal grant requirements is immense and complex; for this reason CDPH has retained the unique services of Integrated Solutions Consulting (ISC). ISC is the only company that can provide the necessary public health planning experience combined with a webbased, secure, electronic platform to provide efficiency and connectivity to the planning design, development and maintenance process.

The web-based electronic planning platform is complete and operational. Public health and emergency management operational planning is extremely complex requiring years of experience. This combination will make it difficult for ISC to fulfill the City's MBE/WBE participation goals of 16.9% and 4.5%, respectively. However, ISC support's the City's MBE/WBE participation goals and will make every effort to comply with the goals by making a commitment to secure a minimum of 10% MBE/WBE participation on this project.

Sincerely,

**Integrated Solutions Consulting**
