Chicago ZIP Code Area Profiles Victim Callers

2006

(May 2, 2006-December 31, 2006)

Prepared by:

Ebony M. Dill, Ph.D.
Coordinator of Research and Evaluation,
City of Chicago Mayor's Office on Domestic Violence

This project was supported by Grant # 2005-VA-GX-0039, awarded by the Office for Victims of Crime, Office of Justice Programs, U.S. Department of Justice, through the Illinois Criminal Justice Information Authority. Points of view or opinions contained within this document are those of the author and do not necessarily represent the official position or policies of the U.S. Department of Justice, or the Illinois Criminal Justice Information Authority.

INTRODUCTION

CITY OF CHICAGO DOMESTIC VIOLENCE HELP LINE

The City of Chicago Domestic Violence Help Line is a toll-free, telephone service that functions as a clearinghouse to domestic violence services in the metropolitan Chicago area. The Help Line operates 24-hours a day, 7 days a week. The service is confidential and multi-lingual. Established in 1998, the City of Chicago, Mayor's Office on Domestic Violence contracts with the Chicago Metropolitan Battered Women's Network to staff the Help Line. Callers to the Help Line are provided with general domestic violence information, referrals to appropriate domestic violence services, and a three-way phone linkage between the caller and the domestic violence provider agency. Trained domestic violence advocates called VIRAs (Victim Information and Referral Advocates) provide victims with immediate information about their options, information on safety planning, and referrals to community based providers including shelters, counseling services, legal advocacy services, and civil legal services. Diverse language needs are met by English and bi-lingual, bi-cultural Spanish speaking VIRAs. VIRAs can access translators via a Language Line to respond to over 140 other language needs. A TTY is available for speech and hearing impaired callers. The Help Line operates on two centralized databases. The first database allows VIRAs to record case specific information about a victim (not victim identifying information) that includes demographic information and service need information. The caller is provided with a unique call ID number to refer to during subsequent calls to the Help Line. The second is a searchable database of domestic violence service provider programs in the Chicago metropolitan area. Callers are matched to services based on the ZIP code provided by the caller and their identified service need.

HELP LINE SERVICE ENHANCEMENTS

In efforts to better serve callers to the City of Chicago Domestic Violence Help Line, several enhancements are being made to the Help Line information databases. Following these planned enhancements, VIRAs will be able to record information and service needs for multiple victims in the same household, to record county designations for each caller, and to connect victim callers with service providers across the city and statewide. These enhancements are occurring in multiple phases between 2006 and 2008. Specific and notable changes will be highlighted when changes to standard reporting items occur or new items are introduced. This report covers the period May 2, 2006 to December 31, 2006 and follows the first set of enhancements to the Help Line information databases.

CHICAGO ZIP CODE AREA PROFILES

Chicago ZIP Code Area Profiles 2006 (2nd installment¹) is the fifth annual profile report of the characteristics and service needs of victim callers to the City of Chicago's Domestic Violence Help Line. Data for this report were obtained from the City of Chicago Domestic Violence Help Line databases for May 2, 2006 through December 31, 2006. During this period, the Help Line answered approximately 13,578 calls from persons in and around the Chicago area. Calls are classified as domestic violence related, non-domestic violence related, or administrative calls (e.g., hang-ups, wrong numbers). Domestic violence related calls represented about 75% of all calls to the helpline. The remaining calls were categorized as non-DV or "bad calls." Victims of domestic violence – who received full support - represented 45% (4512) of all domestic violence callers to the Help Line between May 2, 2006 and December 31, 1969.

Descriptive information about the victim caller and their abuser are detailed in this report. Counts, percentages, and/or indicators of central tendency [mean or median] were used to describe the victim caller's age, gender, race, parenthood, number of children, call language, service need, referral source, relationship to abuser, and same gender relationship. Population data, obtained from the 2000 Census, and the number of domestic violence service providers were also included in relevant sections. Victim callers requested information and/or referrals for services that included shelter, counseling, legal services, etc. ZIP codes were used to describe victim home location and to connect them with appropriate service locations. This report provides information for 3,318 domestic violence victim callers, who provided a Chicago area ZIP code.

Summaries of victim characteristics and service needs are organized at 3 levels: citywide, by sector (North, South, Central), and by individual Chicago ZIP codes within sector. It is hoped that this report will increase awareness of victim's characteristics and service needs and will be used to support decision-making within communities and across the city. It is easily reproducible – in whole or in part – and should be shared. However, take note, data in this report reflect domestic violence victim's use of the City of Chicago Domestic Violence Help Line and is not an indicator of the prevalence or incidence of domestic violence in Chicago. The numbers reported in this report will be significantly lower than the actual number of victims of domestic violence in Chicago because many victims do not contact other persons about their situations

A variety of reports are produced from the City of Chicago Domestic Violence Help Line data.
We invite you to peruse these reports on our website: <http://www.cityofchicago.org/domesticviolence>.

¹ The 1st installment captured characteristics and needs prior to modifications of the help line information databases and covered January 1, 2006 to May 2, 2006.

GLOSSARY/DEFINITIONS

Abuser Victim callers to the Help Line provide demographic information (age, sex, race) about their abusive partner.

Age The VIRA records the actual age of the victim and their abuser from which the median ages are calculated. The median represents the middle point in the range of ages. This method is chosen to be consistent with the Census Bureau reporting of age. For presentation purposes, age groups were created for the Citywide and the Sector profiles.

Census 2000 Demographics To provide context for the victim callers in the area, demographic information for the city of Chicago and each ZIP code area was obtained from the U.S. Census Bureau, Census 2000. Data was extracted using American Fact Finder on the Census Bureau website: <http://www.census.gov>.

Children Victims are asked to provide the age and sex of all children living with them. Calculated for this report are the total number of victims that reported having children "Have Kids" and the total number of victims who did not report that children lived with them "No Kids." Information about children may not have been obtained or recorded therefore the number of victims without children may be slightly higher than actual. Of the victims who have children, "Total Kids" represents the total number of children of all victims in that area. The Range shows the fewest and the greatest number of children of victims in the area. The Mean N represents the average number of children per victim in this area, excluding victims without children. Finally, Kids 0-5 yrs represents the total number of children who were between the ages of 0 and 5 when the victim called the Help Line.

DV Providers Many domestic violence service providers or agencies offer a variety of services to domestic violence victims. For presentation the services are grouped into broad categories based on their program's primary service provision focus. The number of programs within each geographic area is presented for the city, the three sectors, and each ZIP code (excluding shelters). Any program that was in operation for at least one month during 2006 is included. For confidentiality, shelters are only presented citywide.

Language Most of the calls received by the Help Line are conducted in English, Spanish or Polish. When callers speak a language other than English or Spanish, the Language Line is utilized.

Loop Included in the Loop area are all ZIP codes that are assigned by the Post Office to the area of the Loop. Also included are Post Office Boxes and ZIP codes assigned to particular buildings/businesses.

N Represents the total. For each ZIP code area the total number of victim callers received within the ZIP code area is reported.

Race VIRAs ask victims to select the racial category that they most identify with: Black/African American, White, Latino/Hispanic, Middle Eastern, Asian, Multi-racial, Native American or Other. Percentages for each category are reported in the Citywide and Sector profiles but because of the small numbers are grouped Black, White, Latino and Other within specific ZIP code areas.

Referral By Callers are asked who referred them to the Help Line or how they learned about the Help Line. Up to two sources of referral are recorded for each victim and the first source is reported in the profiles. For presentation, the sources of referral are grouped into seven broad categories.

Relationship Callers are asked to identify the relationship of the abuser to the victim. Callers are asked to further identify the family relationship (parent, child, uncle etc.) for relationships described as a non-intimate partner family or blood relation.

Sectors Three geographical divisions of the city based on ZIP code area were created for reporting. The North sector approximately represents the North side of the city. The central sector approximately represents the middle portion of the city. The South sector approximately represents the South side of the city. ZIP codes in this sector are 60617, 60619, 60620, 60621, 60628, 60629, 60633, 60636, 60637, 60638, 60643, 60649, 60652 and 60655.

Service Need VIRAs work with victims to identify the type of service needed. For presentation purposes, these services are grouped into four broad categories. Up to two services are recorded for each victim, the Primary service need is presented in this report.

Victim Any person who called the Domestic Violence Help Line as the result of experiencing domestic violence is considered a domestic violence victim caller. Domestic violence includes all forms of abuse including physical, emotional, mental, psychological and sexual violence. The focus of the Help Line is primarily toward intimate partner violence (current and former) however; calls are also accepted from non-intimate partner domestic violence victims (sibling, roommate etc.).

ZIP Code Callers are asked for the ZIP code of the neighborhood for services. Calls are placed into ZIP code area based on the US Postal Service listing and are geographically mapped using ARC View software. Profiles are created for each ZIP code area that received any victim calls. Below are the Chicago Area ZIP codes by sector.
