Fleet Ops.	0100	2140	3214	0000	7160	FLEET SERVICES ASST	1	Based on our analysis, the elimination of 31 positions in the Fleet Operations Bureau will lead to a reduction of approximately 45,360-man hours of maintenance and repair production. This represents an overall decline in service capabilities of 13% and will negatively affect maintenance turnaround time and increase vehicle and equipment downtime. Pending vehicle class were estimating up to a day to four days returning vehicles to customers based on average days. To minimize the impact of this reduction of capabilities to mission critical categories of equipment, the Bureau plans to prioritizes the service of Public Safety equipment and vehicles that deliver essential City Services. We are also analyzing the staffing arrangement of key service delivery tradesmen to maximize their utility and efficiency and will utilize our network of contracted vendors to bolster our service capabilities where necessary.
