MINUTES

Meeting: February 6, 2025, 9:30-11 am

City Hall, Room 1103

Minutes taken and submitted by Jess Vogt, UFAB Vice President, based on a meeting recording made solely for the purposes of minutes keeping.

1. Call to Order – Jess Vogt/Vice President

Jess Vogt called the meeting to order at 9:35 am.

2. Roll Call

Present: Joe McCarthy, Jess Vogt, Angela Tovar, Cindy Schwab, Jim Semelka, Rolando Favela, Daniella Pereira, Sean Weidel (CDOT), Ron Daye (Planning), Cathy Breitenbach (Parks), Alder. Maria Hadden

Not present: Nuri Medina, Randy Conner Jr.

3. Public Comments –

No members of the public wished to make comment.

4. Approval of Previous Minutes

Daniella Pereira requests a few small corrections requested to verify names are spelled/identified correctly. Jess Vogt will make these.

Ron Daye moves to approve minutes with names corrections. Sean Weidel seconds. December 2024 Meeting Minutes were approved unanimously by the Board.

5. Consent Agenda

This is new for this calendar year. All items on the Consent Agenda are approved by a single vote with no discussion.

- Area tree trimming:

9,672 trees trimmed in calendar year as of 1/30/2025

3 grid sections of 915 grid sections* pruned this year.

121 grid sections of 915 grid sections* pruned since start of Area trimming program in April 2023

*Note that some grid sections do not have trees managed by the City (industrial, parks/forest preserves properties, airport).

- Tree planting numbers:

Bureau of Forestry: 0 trees planted this calendar year as of 1/30/2025

Department of Transportation: 0 trees planted this calendar year as of 1/30/2025

Chicago Parks District: 0 trees planted this calendar year as of 1/30/2025

- Tree removal numbers:

Bureau of Forestry: 181 trees removed this calendar year as of 1/30/2025

Chicago Parks District: n/a trees removed this calendar year as of n/a (date)

CDOT – n/a, does not remove trees

6. Standing Updates

• Update on Chicago Public Tree Inventories

- City Parkway Tree Inventory – Joe McCarthy/BoF
 - Moving forward with RFP as planned.
 - Joe McCarthy mentions that the recent Executive Order by President Trump pausing all Federal funding may or may not impact this project. The City of Chicago is in the process of developing a memo detailing all its grants and projecting the impact of a pause in Federal funding. Inventory project will be on that list but it's not a direct federal grant. The inventory/management plan grant for the City is a pass-through from the Federal government to the State of Illinois, to the Morton Arboretum, to the City of Chicago.
 - Assuming the pause does not impact the inventory/management plan adversely, the timeline of the grant is estimated as 6 months until a contract being signed.
- Parks District Tree Inventory – Cathy Breitenbach/Parks
 - RFP advertised in December and CPD has received proposals and the committee has evaluated. They are aiming for April recommendation of contract to the Parks Board of Commissioners, barring any challenges from the Federal government since the Parks inventory project is also funded through the same passthrough funding (Federal government > State government > Morton Arboretum) as the City's inventory.
 - Parks also has other grant funded work, for example an ecosystem restoration project federally funded, also impacted by the pause.
- Daniella Pereira reports on Federal funding impacts to Openlands: They received communication from the Federal government (Department of Interior) to modify the funding agreement impacting their Arborist Apprenticeship program to exclude EEO (Equal Employment Opportunity clauses) and anti-discrimination statements in their job descriptions.

• Other Chicago urban forest mgmt./activities updates – BoF, CDOT, Parks

- Daniella Pereira asks Joe McCarthy about the guidance given to crews on tree trimming and would like to know the standards to be able to better hold crews to account and to better communicate with residents.
 - Joe McCarthy says the only guidance they have is a draft pruning guidelines document that is 10-years old and has had discussions about updating these standards with the new Deputy Commissioner of Forestry but nothing has materialized yet due to lack of time.
 - Alder. Hadden says communications between grid pruning crews and ward offices has been good, letting Wards know what grid blocks are coming up next for services.
 - Jim Simelka offers his expertise for bringing these draft tree trimming standards up to date with the newest ANSI standards.
 - Daniella Pereira asks if Jim Semelka could provide an example of a good best practices pruning standard for municipalities. Perhaps an

ad-hoc working group of Jim Semelka and Joe McCarthy on standards and translating these into training and action would be helpful.

- Joe McCarthy notes that standards are fine but oversight is the limitation. The current work practices for the Bureau of Forestry are strained by lack of personnel. Jim Sheehan was a general superintendent and was promoted to Deputy Commissioner Forestry but is still also Acting General Superintendent so “span of control and management is kind of limited” especially due to the new training agents and new supervisors hired in the last few years.
- Jess Vogt asks “How could UFAB best support advocating for those training efforts...?” Joe McCarthy replies, “Keep inquiring. Hold us accountable.”
- Currently, BOF aspires to have 30 crews out on a daily basis, but maybe 25 actually go out (2-3 trimmers plus a driver per crew), this includes both pruning and removal crews.
- Jess Vogt asks if training is tracked in any way, number of people or hours? Joe McCarthy reports that there are 5 training agents, and not really a chief training agent right now. There used to be and Senior City Forester John Lough does training right now. And even the training agents are used often for non-training tasks to fill in gaps.
- Daniella Pereira requests that the number of trainings, kinds of trainings, number of people trained, whether they are trainings for Certified Arborists, and perhaps other things be added to Consent Agenda for each UFAB meeting.
- Alder. Hadden asks how Parks manages training and oversight. Cathy Breitenbach mentions that they are similar but smaller. Moving from 30 to 45 personnel (currently about halfway there: 39 people) and trying to get on a grid system. They have records of trainings, not required to be arborists, training done in house but occasionally bring in outside trainers.
- There is consensus among the board that long-term management would be benefitted by asking these kinds of questions.
- Sean Weidel provides an update for the Greencorps Chicago program through CDOT.
 - They have updated the tree trimmer job specification for CDOT in partnership with Streets and Sanitation and approval of the Union to be “6 months of experience” and this experience could include Greencorps graduation. Operation of a bucket truck is the barrier for many currently and is not part of the Greencorps program but is actively working on pilot getting Greencorps program enrollees into a bucket truck.
- Daniella Pereira provides an update on the Openlands Arborist Registered Apprenticeship program. The first graduate has a full-time position as a trainer. Currently they are hiring the next crew of 6 and have 90+

applications. The current pipeline is a year with Openlands and then Apprentices get full-time placement with a local arborist company. Figuring out the pipeline to get the Apprenticeships into BoF/City work.

- Joe McCarthy revisits the topic of the inventory and “what the inventory will actually mean” and HOW will this impact operations.
 - Joe McCarthy notes that if/when the inventory identifies several thousand trees that are “high risk” and need to be given some attention in terms of pruning or removal, he emphasizes that there needs to be a plan for what to do with these trees and how to put them into the workflow. He notes that there may be a slowdown temporarily in grid trimming when the hazardous tree reports come in.
 - Alder. Hadden notes that this has been discussed in past UFAB meetings. The overall vision of how the inventory could be used would be to help with more systematic management and transitioning from a grid *trimming* program to a grid *inspection* program.
 - Joe McCarthy notes that training will be key in making this transition successful because crews will now have tablets, which they are not used to. The inventory needs to be a “living inventory,” and technology is key for this.
 - Ron Daye suggests that it will be important to develop a workflow system of managing those trees that are public safety risks and pest and disease risks. He notes that there will still be a need for “reactive” crews who are able to respond to urgent safety needs as well as the more proactive crews who are engaging in the routine grid inspection.
 - Alder. Hadden suggests that perhaps as we get closer to this, it would be helpful to get a technology demonstration for UFAB and BOF staff.
 - Cindy Schwab also notes that BOF will need a “change management plan” for how you communicate this to crews.
 - Ron Daye notes that again the biggest challenge is “adequate personnel and resources.”
 - Jess Vogt will add a technology demonstration by UFAB Board Members and private sector urban foresters Cindy Schwab and Jim Semelka as a future agenda item for a UFAB meeting later this year.
- Jeff Brink, Forester for CDOT, initiates a discussion on the City’s tree planting goals for this calendar year. CDOTs goals are to plant 4,000 trees goal, already tagged. He assumes a 5% replacement rate (contractual obligation). They expect to do 154 new tree cut outs. The last few years they have done” lots of low hanging fruit,” so doing more difficult kinds of plantings (e.g., cutouts) is going to be important to keep planting numbers up moving forward.
 - For capital improvement projects, CDOT expects to plant up to 1,000 for this year, and another 1,000 will be added to this planted

directly by developers (the private sector, costs not born by the city).

- CDOT is also looking for tree infractions especially with respect to sidewalk cafes and sending these over to Business Affairs and Consumer Protection (BACP) permitting folks for pursuing violations.
 - Daniella Pereira asks for a better way to report these violations than just being a TreeKeeper and knowing Openlands or UFAB folks and then calling Jeff Brink to report.
 - A suggestion is made to ask someone from BACP to come to the meeting to discuss the process for pursuing tree-sidewalk café conflicts and resolutions.
 - A discussion occurs about holiday lighting and trees. Often lights are put up and never taken down and there is not a permitting process nor does the City have capacity for this permitting process. Jeff Brink advocates for a GOP grant of privilege process for lighting because it is an allowance within the public right of way and it often injures the public asset, trees. Alder. Hadden notes that there are Special Service Areas such as business districts that could be parties to any changes or education efforts here.
 - Daniella Perkins notes that t
- Joe McCarthy notes the goals for BoF for this calendar year are to plant 6,000 trees.

- **Our Roots Chicago Update – DOE**

- Angela Tovar notes that officially Our Roots is now managed by the Department of Environment (DOE) no longer CDPH Public Health. She introduces Jared Patton as the new official DOE leader of Our Roots/Tree Equity Working Group.
- Jared Patton reports that most recently he sent the TEWG members a survey on the Working Group's activities so far and desired future goals/activities and got a lot of good feedback. He will be presenting results at the next Our Roots meeting.
- The next Chicago Community Tree Equity Working Group monthly virtual meeting: Tues, Feb 11, 9 am – virtual Teams meetings email Jared Patton.
- Joe McCarthy says that as part of the same grant that funds the Our Roots tree planting, BOF is hiring a new City Forester (BOF also hiring a new Senior City Forester to replace a retirement, but that's outside the grant).
- The main role of the new City Forester will be working with DOE/TEWQ/Tree Ambassadors in target neighborhoods for Our Roots.

- **Working Groups**

- **Education Working Group – Rolando Favela**
 - Rolando Favela has three things to highlight – funding, engagement, leadership.

- Rolando Favela notes that originally the Education WG started off concerned with Aldermanic education but now would like to turn to doing more public education. But he questions how as UFAB do we print and disseminate physical materials like flyers, etc. given we have
- Rolando Favela notes that this working group has struggled with in-person engagement and has very little attendance at in-person meetings. He is unable to commit to leadership of in-person meetings for another year and would like to suggest transitioning the Education Working Group to virtual meetings as well as virtual engagement and social media.
- Alder. Hadden suggests that the Education Working Group virtual efforts could be more married to the Our Roots in-person efforts and could help supplement
- Rolando Favela asks what's stopping someone like Molly Roche (Openlands TreeKeepers program lead) from running the UFAB Education Working Group?
- Jess Vogt and Angela Tovar note that UFAB has no bylaws right now but they are working with the Law Department to develop these over the coming months.
- Discussion ensues about the need to distinguish the activities, roles, and responsibilities between UFAB Working Groups, Tree Equity Working Group meetings, and others. More firm responsibilities may emerge if UFAB-TEWG relationship is formalized.

○ Policy / Landscape Ordinance – Daniella Pereira

- Daniella Pereira reminds us that the LO WG submitted to the Board 14 recommendations for tweaks to the Landscape Ordinance last month (see December 2024 UFAB Minutes).
- In the months since last meeting, Daniella Pereira communicated with all the Policy Working Group departmental affiliates about the proposed changes and requested each of these people to go to their Commissioner/department and/or Alder to verify that the “four commonsense ordinance-level changes” are okay to move forward.
- Daniella Pereira noted that, “As a Policy Working Group, we need to do so much more” than just these 4 changes, and that meeting just 8-12 times per year is not enough time to change ordinance. So, it is the recommendation of the Policy WG is to hire a consultant to help (or to formally tasks a department with the updates).
- To this end, Alder. Hadden asks what role that LO WG/UFAB would be if a consultant would be hired or a department formally tasked.
 - Daniella Pereira says the LO WG would be operating in an advisory capacity.

- Rolando Favela asks what the big dream scenario for an updated Landscape Ordinance would be.
- Daniella Pereira would like to have a comprehensive vision for the ultimate purpose of the ordinance – heat, health, etc. - that then interfaces with the policies and inventory. Some of the things might be tweaks and others might be brand new policies.
- A specific issue of the height of native vegetation was discussed.
 - Ron Daye, Angela Tovar, and several other board members note that some of these issues overlap with the Native and Pollinator Garden Registry Advisory Board. However, the Landscape Ordinance revision is under the purview of UFAB. UFAB will defer to Pollinator Board on the issue of recommended vegetation height, but it will almost certainly be higher than the current 10” maximum.
- Ron Daye raises the issue of the planting depth requirements and clarifies that the current 6’ guideline is definitely in need of updating to something more realistic (both ecologically and feasibility-wise).
- Ron Daye notes that on the issue of bringing in a consultant to revise the ordinance guide, his department would defer to the Mayor’s Office on the advisability and possibility of doing this.
 - Jeff Brink (CDOT) notes that last time the landscape ordinance was revised and the guide created, it was done pro-bono by a consulting company. The question is raised of whether this could happen again – could be an opportunity for someone to capitalize on providing expertise and then growing their business on advertising these opportunities.
- Daniella Pereira notes that the Landscape Ordinance all falls under DPD administration. Daniella Pereira asks UFAB if it’s okay to write a letter from the Board to ask specifically for delegation of the LO updates to the Planning Department or to hire a consultant. Alder. Hadden notes that this should be a Recommendation Letter to the Mayor’s Office.
- Alder. Hadden notes that seeking affirmative support from participating individuals and departments about the proposed changes so that in the letter UFAB can mention that approval has been given.

7. Old Business

8. Discretionary Removal Letter update – Ald. Maria Hadden/Leslie Perkins
 - The Letter has been received by the Mayor’s Office. No update, we had gotten no reply.
9. 2025 Budget Status update – Leslie Perkins
 - No changes from December 2024 meeting.
10. Emerald Ash Borer (EAB) Update on 2024 Injection – John Lough/BoF

- The EAB numbers were provided in a formal memo/report sent by John Lough to the Board via email in advance of this meeting. John Lough is unable to be here in person because he was called away for another meeting. See Attachment 1: REPORT City of Chicago 2024 EAB Treatment Report–ABRIDGED. (The entire unabridged report is available here: <https://drive.google.com/file/d/1vALP5K4GcYMfo-NXIIKx8s7w3vgkKdAu/view?usp=sharing>)
- A question was raised about whether Aldermanic Menu money can be used for EAB treatments. It cannot; Alder. Hadden and Leslie Perkins clarify that Menu money must be used for capital improvements that would last at least 20 years, so EAB treatment would not qualify. Further, Ward offices don't have the authority to enter into contracts independently to spend money for something like EAB treatment.
- Discussion ensued about creative means of potentially funding EAB treatment in neighborhoods. Grants could be pursued by private groups, neighborhood or business associations, etc.
- Leslie Perkins raises the issue of developing a specific plan within the Bureau of Forestry for the ash trees. She states that this is something we would like to see incorporated as part of the Inventory and Management Plan. Joe McCarthy states that this will be something that could be raised during the community engagement portion of the Management Plan process – if the community is interested in ash treatment planning, then the contractor producing the plan will include this. Alder. Hadden says she would like to see from Forestry an “informed plan” for treatment versus removal from the Bureau.
- Cindy Schwab raises concerns about the timeliness of this. If trees were not treated in 2024, they are likely no longer treatable and will need to be removed in the very near future. Removal is hugely costly for a mature ash tree impacted by the disease. If a tree is past 50% decline, it is no longer climbable and removal is costly and “every season you wait, it will be more costly.”

11. UFAB Logistics and By-laws – Jess Vogt

- Jess Vogt and Angela Tovar have a meeting set up with Law department. UFAB By-laws to be presented at a future meeting.

12. New Business

- Current BoF and CDOT workflow and use of Salesforce/311 – Joe McCarthy
 - Joe McCarthy describes the current area pruning program. Crews go out on a grid basis – try to be in every ward, every week – but they also address urgent calls from Ward offices about individual trees in need. The 311 system for making requests for tree trimming has been shut down, and so people who had been calling to get their tree pruned are now calling Ward offices to request. The every-grid, every-week system is admittedly not super systematic because it has crews bouncing around day-to-day around the City, but it does mean the grid system is getting a positive perception.

Maria E. Hadden

Aldersperson – Environment
Comte.

- Alder. Hadden suggests that after a full circuit of the grid system where every tree has been pruned or looked at, BOF will be able to go to a more systematic grid system. Joe McCarthy agrees that the goal is to move to a “fully proactive” system, where crews can do trimming inspections, removal inspections, and planting location inspections at the same time, rather than doing piecemeal (only trimming, only removal, etc.), which is the current approach.
- A discussion again emerged about how do we update the 311 system to get tree removal off the list of options. Joe McCarthy suggests that a request from Alder. Hadden/Leslie Perkins with the desired changes to Jim Sheehan, Deputy Director of Forestry, could be helpful.

- **Board membership and activities:**

- Nominations and representatives on UFAB: Angela Tovar makes a clarification that the official point of contact for Forestry will be Joe McCarthy and the Commissioner of Streets and Sanitation has okayed that. This fits better with Jim Sheehan’s management style of being more out in neighborhoods and has field responsibilities.
- Officially, leadership for the Board (President and Vice President) is appointed by the Mayor.
- Rolando Favela will take on the role of Secretary (does not include responsibility for taking Minutes). He will coordinate with Molly Roche for Meeting Minutes in the immediate future.
- Daniella Pereira suggests that UFAB should write a report to the Mayor about our activities of the past calendar year. By the April 2025 meeting, Board members should send a paragraph or bullet points of what they have contributed to the Board’s activities and send to Rolando Favela who will compile as Secretary.

- **Remaining 2025 Full Board meetings:** April 3, June 5, Dec 4 (9:30-11 am, 1103 City Hall)

- Call for additional Agenda items for New Business at next meeting.
 - Enforcement procedures of BoF/CDOT, current and moving forward
 - 2026 Budget Year requests for BoF from UFAB (e.g., revenue-generating enforcement position)
 - Location of Bureau of Forestry

- **Next Working Group meetings:**

- Policy: March 6, 2025 – 1-3pm
- Education: March 6, 2025 – TBD time

The meeting is adjourned at 11:10 am.

Attachment 1: REPORT City of Chicago 2024 EAB Treatment Report–ABRIDGED

Provided to the Board via email in advance of the February 2025 meeting.

The unabridged report is available here: <https://drive.google.com/file/d/1vALP5K4GcYMfo-NXIIKx8s7w3vgkKdAu/view?usp=sharing>

City of Chicago 2024 EAB Treatment Report – page 1 of 260 (main text p. 1 of 3)

DEPARTMENT OF Streets & Sanitation

CITY OF CHICAGO

City of Chicago 2024 EAB Treatment Report
John Lough, DSS BOF Senior City Forester

Overview

The City of Chicago, DSS, Bureau of Forestry, received \$1,000,000 in funding for FY2024 for Emerald Ash Borer treatments, to manage the negative impact of Emerald Ash Borer (Beetle). By Contract # 244088 Emerald Ash Borer Treatment Services, the contractor Robert W. Hendrickson Company, treated 6,231 parkway ash trees throughout Chicago. Treatments were made with a systemic insecticidal application with the active ingredient formulation of Emamectin Benzoate with a minimum four percent (4%) active ingredient by volume, with a treatment dosage that will provide two (2) years of insect control per treatment.

EAB treatments began July 19, 2024, and concluded September 25, 2024, when the funding was depleted. The completed work is summarized as follows based upon the treatment data (appendix A):

Trees Surveyed: 12,214
Trees Treated: 6,231
Caliper Inches treated: 114,705
Grids Serviced: 108

Scope

Work was organized by city grid, which is an area ½ mile by ½ mile square (appendix B). Grids were selected based upon three general criteria:

1. Twenty-two (22) Tree Equity priority areas as determined by the Department of Public Health (DPH)

Chicago Urban Forestry Advisory Board

Community Area
West Lawn
West Garfield Park
Fuller Park
North Lawndale
East Garfield Park
Chicago Lawn
Riverdale
Englewood
Oakland
West Englewood
Armour Square
Austin
Washington Park
Auburn Gresham
Greater Grand Crossing
Archer Heights
Humboldt Park
West Elsdon
Gage Park
Brighton Park
New City
South Lawndale

2. Community/Aldermanic requests
3. By grid in additional wards not part of the Tree Equity areas, or where treatment requests were not made by Community/Aldermen.

The comprehensive treatment list by Grid including Tree Equity Areas, Community and Alderman requests, and additional Grids is listed as appendix C.

Condition Evaluation

Ash trees were evaluated prior to treatment to determine condition and viability for treatment. Trees with more than 30% canopy decline or exhibiting structural defects were not treated and were documented on the crew work activity sheet by address. Trees determined to be treatable were also documented on the work activity sheet and the treatment tag recorded.

Chicago Urban Forestry Advisory Board

City of Chicago 2024 EAB Treatment Report – page 3 of 260 (main text p. 3 of 3)

Jess Vogt

Vice President/Board Member

Rolando Favela

Secretary/Chair, Education
Working Group/Board Member

Based upon the contractor's evaluation and reporting for treatment grids, 6,186 of 12,214 inventory ash trees were treated or approximately 51% of the surveyed tree locations were treatable. It is important to note 4,376 trees were "not found" NF or listed as "removed" indicating no tree was onsite. With this in consideration the percentage of treatable trees of the trees still on the parkway was 6,186 trees of 7,838 actual tree evaluated or approximately 78.9%.

The Bureau of Forestry conducted an ash count in 2022 which yielded approximately 40,000 trees citywide.

Based upon 2022 ash count of 40,000 trees minus the 12,214 trees evaluated, at the end of 2024 there were 27,786 trees remaining to evaluate and potentially treat. Further applying the 78.9% viability rate on the 27,786 remaining trees, the estimated remaining trees potentially treatable would be approximately 21,950 trees. This figure does not take into account ash loss through natural mortality and construction work, which is generally between 600-800 trees per year, or EAB activity which is significantly higher in untreated trees.

With current budgetary challenges, there are no planned treatments for 2025, however a possibly avenue for treatments would be for Aldermen use a portion of their menu funding for ward projects to treat significant ash trees in their wards. This alternative funding would need to be approved by Finance, and depending upon the scale of critical services needed in the Ward, may not be possible.

The Bureau of Forestry will continue to issue permits for tree inoculations contracted by private residents and community groups interested in continuing with treatment of untreated trees, until such time as treatment funding might become available.
