

DEPARTMENT OF WATER MANAGEMENT
CITY OF CHICAGO

April 01, 2015

Dear Neighbor,

I am writing with an update on the construction project involving the installation of new water mains on Berteau Street between Laramie and Milwaukee, Leamington between Berteau and Irving Park Road, Leclaire between Berteau and Irving Park Road, and Lawler between Leclaire and Irving Park Road.

To date, we have installed new water main on Dickinson Avenue from Berteau to Irving Park Road. We have nearly 4,324 feet of water main left to install, as well as make the final connections, in order to complete the infrastructure improvement project.

The construction work, which has been on hold for several months due to unforeseen circumstances, will resume in April. We anticipate the construction to be completed by the end of May, with the resurfacing of the street to follow.

We ask your patience as we continue our work. If you have any questions or concerns, please feel free to call me directly at 312-744-8822.

Sincerely,

Pete Scales
Director of Public Affairs
