

# MEETING MINUTES

## PERMIT REVIEW COMMITTEE COMMISSION ON CHICAGO LANDMARKS May 13, 2015

The Permit Review Committee (PRC) met on April 9, 2015, at 1:40 p.m. The meeting was held at 121 N. LaSalle St., in City Council Chambers

Present: Ernest Wong, Chair  
James M. Houlihan  
Tony Hu  
Mary Ann Smith  
Reverend Richard Tolliver

Staff: Eleanor Gorski, Director of Historic Preservation  
Dijana Cuvalo  
Kandalyn Hahn  
Lawrence Shure

The following projects were reviewed by the PRC:

**1. 1401 S. Michigan** **3<sup>rd</sup> Ward**  
**Engine Company 104, Truck 31 Firehouse**

Proposed rehabilitation due to fire damage and rear addition to existing 2-story masonry firehouse.

**Action:** Approved unanimously with the following conditions:

1. New windows shall match the existing windows in size, glass size, operation, muntin arrangement and muntin size. Existing and proposed window details shall be submitted with the permit application;
2. The fire-damaged large main doors on the north elevation shall be repaired and maintained if possible. If they cannot be repaired new doors shall be proposed to match the size, configuration and appearance of the existing doors with details to be submitted with the permit plans;
3. Details of the proposed new north door and awning shall be reviewed for approval by Historic Preservation with the permit plans; and,
4. As proposed, the new storefronts shall have a dark, factory-applied finish. Propose details and sections shall be submitted with the permit plans.

**2. 2430 N. Kedzie** **32<sup>nd</sup> Ward**  
**Logan Square Boulevards District**

Proposed new 2-story rear addition, raised side deck, awning, and alterations to detached garage.

**Action:** Approved unanimously with the following conditions:

1. As proposed, brick cladding of the rear addition and side deck shall match existing. A brick sample shall be reviewed for approval by Historic Preservation staff prior to order and installation; and,
2. South elevation awning wood brackets and side deck wood stairs and decking be stained or painted.

**3. 430 S. Michigan** **42<sup>nd</sup> Ward**  
**Auditorium Building**

Proposed replacement of the existing illuminated sign letters and logo with new illuminated letters and logo for Roosevelt University.

**Action:** The Committee voted to disapprove the staff recommendation and asked the applicant to restudy the proposal (vote was 4-0-1 with Commissioner Hu recused). A follow-up motion was passed unanimously by the Committee to authorize Commissioner Wong to act on behalf of the Commission and to meet with the applicant and Historic Preservation staff to come to a compromise solution at an informal conference meeting.

**4. 210 S. Canal** **42<sup>nd</sup> Ward**  
**Union Station**

Proposed replacement of two interior stone staircases leading from Canal Street entrances to the Great Hall.

**Action:** Approved unanimously with the following conditions:

1. The deteriorated and worn stone treads may be replaced with new stone treads to match the original dimensions and profiles. Or if necessary to meet code, Option 1, with a new 3"-tall stone tread to match the original tread thickness and a modified bullnose profile, is approved. The existing stone stair risers shall be salvaged and reinstalled;
2. Shop drawings of the stone stair and metal railing alterations shall be reviewed for approval by Historic Preservation staff prior to order and installation; and,
3. Proposed replacement stone will match historic stone in color, texture, and finish. Samples of the replacement Roman travertine, Tennessee marble, and the metal railing shall be reviewed for approval by Historic Preservation staff prior to order and installation.

**5. 832 W. Fulton** **27<sup>th</sup> Ward**  
**Proposed Fulton-Randolph Market District**

Proposed changes to the project as previously conditionally approved, specifically regarding dismantlement and reconstruction of the primary east and north elevations of 310 N. Green building and revisions to the design of the new construction as part of the adoptive reuse.

**Action:** Approved unanimously with the following conditions:

310 N. Green:

1. Given the distressed and deteriorated conditions and structural deficiencies of the east and north elevations of 310 N. Green building the proposed dismantlement, demolition, repair and reconstruction of these street elevations conforms with the Commission's standards and criteria, including the criterion that "the work will replace the significant historical or architectural feature where the original feature is deteriorated beyond reasonable methods of repair, and the replacement feature is in kind";
2. As proposed, the reconstructed masonry façades shall match the removed façades in location, size, brick coursing and detailing and any missing elements shall be replicated to match historic based on physical and photographic documentation. The existing historic brick, historic cast iron column covers and angle returns will be removed, salvaged, repaired and reinstalled. Complete photographic documentation as well as dimensioned enlarged elevations, brick details of each unique condition (such as corbeling, etc.) on the façade shall be included with the permit plans. Any replacement brick and new mortar should match the historic in size, texture, color, finish, and profiles and material samples shall be submitted with the permit application;
3. The new sidewalk elevations shall match the existing sidewalk elevations. Existing and proposed details of the sidewalks shall be included in the permit plans as well as proposed railing details;
4. As proposed, the 2<sup>nd</sup> floor window openings will match their historic size and new fixed windows to mimic double-hung windows will be installed. The exterior profiles and the upper sash and lower sash offset of the fixed windows shall match those of a double-hung window and window details shall be submitted with the permit plans;
5. Enlarged dimensioned details of the new storefronts and projecting canopies shall be included with the permit plans. The storefront frames and mullions shall have a dark color/finish and the glazing shall be clear glass;

856 W. Fulton Market:

6. Given the structural deficiencies and the deteriorated conditions of the easternmost bay of the Fulton Market façade of 856 W. Fulton building, the proposed dismantlement, demolition, repair and rebuilding of the sections of the 2<sup>nd</sup> and 3<sup>rd</sup> floor spandrels, masonry piers and parapet wall as show on plans dated April 7, 2015 is approved. The reconstruction of this portion of the façade must occur pursuant to a repair permit and prior to any bracing, demolition or other construction occurring. As proposed, all existing terra cotta as well as the terra cotta sign band, face brick and limestone shall be salvaged, repaired and reinstalled. Any replacement masonry and new mortar should match the historic in size, texture, color, finish, and profiles and material samples shall be submitted with the permit application;

New Construction:

7. The rooftop addition atop 856 W. Fulton, setback approximately 36'-10" from Fulton Market and 6'-6" taller than the historic facade is approved as proposed;

8. The new canopy at the third floor of the new structure at the northwest corner of Fulton and Green set back 20'-11" from Fulton and 10'-9" from Green, is approved as shown on drawings dated March 27, 2015. Enlarged dimensioned details shall be submitted with the permit plans; and,
9. Compliance with the remaining conditions of approval for the project, other than specifically listed above, as outlined in the Permit Review Committee's decision letter, dated September 12, 2014.

The project is not subject to the provisions of Section 2-120-825 of the Municipal Code of Chicago governing review of permits for the demolition of 40% or more of any building or structure either designated as a "Chicago Landmark" or located in any district designated as a "Chicago Landmark".

**6. 39 S. LaSalle**

**42<sup>nd</sup> Ward**

**New York Life Building**

Proposed replacement of storefronts, a new canopy, rooftop alterations, and interior alterations to historic interior lobby spaces for new hotel.

**Action:** Approved unanimously with the following conditions:

1. The proposed storefront replacement, with butt-glazed vertical mullions, black spandrel glass base, and stile-and-rail retail doors, are approved as proposed. In the future, when the remaining 7 existing storefronts are to be replaced, they will need to match this replacement storefront design to provide a cohesive appearance;
2. The Option 1 canopy is approved as proposed, as it does not obscure or damage any original features and is a simple contemporary design. If Option 2 can be revised to not alter the stone spandrel, staff recommends this option could be approved as well with attachment details submitted to be reviewed for approval by Historic Preservation staff;
3. The proposed fixed shed-style awnings, located in front of the stone spandrels to match the locations shown on the historic photos, are approved with attachments to the end piers and underside of the lintel, and if structurally necessary with two-three minor attachments at the stone spandrel. All attachments plates shall be painted to match the color of the stone;
4. The proposed new 6 hotel sign plaques, located at each side of the entries and at the corner pier, are approved in concept. Attachment details and detailed drawings shall be reviewed for approval by Historic Preservation staff as part of the permit application;
5. The 2<sup>nd</sup>-floor interior clear glass windows at the LaSalle Street lobby may have opaque mirrored film applied to them as proposed, however additional and compatible illumination, such as linear fixtures at ledges or standing fixtures at the stair piers, for this main lobby space shall be provided to ensure that the illumination levels will not be adversely impacted;
6. Sprinkler layout and installation details shall have as little impact to the historic marble and ornamental detailing as possible and shall be submitted to be reviewed by Historic Preservation staff for approval; and;
7. Given the limitations in size and configuration of the historic vestibule, a new clear glass full-height vestibule partition may be installed in the historic corridor as shown in "slider door option" drawing dated 3/31/15. Enlarged

details shall be included in the permit plans and shop drawings shall be submitted to Historic Preservation staff to be reviewed for approval prior to order and installation.

**7. 2112 N. Sedgwick  
Mid-North District**

**43<sup>rd</sup> Ward**

Proposed exterior and interior rehabilitation including new 4-story rear addition to existing 3-story building, new front porch, stair and canopy, window replacement, attached garage and other alterations.

**Action:** Approved unanimously with the following conditions:

1. To bring the project into conformance with the adopted standards, Commission's guidelines, and avoid an adverse effect, the applicant may either retain the existing windows or replace them with new double-hung wood or clad-wood windows to match the historic configuration. Window and brick mold details shall be submitted;
2. The materials and design of the front porch and stair, proposed to be steel with glass railings, treads and risers shall be restudied to be more consistent with the architectural and historic character of the property and the district. The materials may be wood, metal and possible stone stairs with closed risers and metal railings with newel posts. The approximately 5 foot width of the single stair should be increased to be more compatible. Alternatively, since the proposal does not include the construction of the second stair for the adjacent row house, the width of the stair could be enlarged to match the width of the porch landing forming a shared stair, which also would be historically appropriate. Porch and stair details with dimensions shall be submitted;
3. The proposed steel and glass canopy is approved as proposed. Dimensioned details shall be submitted;
4. The arrangement of a single door with a side lite and a transom for two entries (one at grade and one at 2<sup>nd</sup> floor main entry) is approved. The new entry doors shall incorporate recessed panels and dimensioned details of the door and side lite shall be submitted;
5. A fixed glass infill replicating the entry door pattern in the arrangement of the mullions, but without a door, at the two remaining (one at grade and one at 2<sup>nd</sup> floor) entry masonry openings are approved. Dimensioned details shall be submitted;
6. The size and location of the proposed fourth floor addition is approved as submitted. The ground-face block side walls of the fourth floor addition should be changed to a material more compatible to the historic district, such as brick, dark non-reflective metal panels or Oko Skin planks. Material sample of the proposed cladding material shall be submitted;
7. The ground-face block walls of the rear addition (beyond the historic common brick walls to remain) should be integral colored to be consistent with the color of the existing common brick. Material sample of the proposed cladding material shall be submitted;
8. A report and drawings by a licensed structural engineer addressing how the historic facades should be supported, braced and protected, in-situ, during the demolition of the exterior portions of the building and the interior structure and the excavation and construction of the new addition as well as during the

foundation work, shall be included on the permit plans. The report should include recommended measures and sequencing plan;

9. Masonry cleaning specifications and cut sheet shall be submitted; and,
10. The project requires a zoning variation and/or adjustment, and the Commission takes no position regarding any requested variance/adjustment relative to the zoning code requirements.

In addition, the Committee found that the amount of demolition involved with the project, based upon the submitted information, does not trigger the requirements of Section 2-120-825 governing the demolition of 40% or more of landmark buildings.
