The Neighborhood Design Guidelines provide specific recommendations to enhance the planning, review, and impact of development along the city's commercial corridors. As a complement to other City design resources and regulations, these urban design guidelines are adaptable to the unique context of individual neighborhoods, corridors, and blocks. The draft guidelines are intended to be used for all public and private projects located along Chicago's commercial corridors. Projects that require the City's review and oversight should substantially correspond to their parameters, especially Planned Developments, Lakefront Protection Ordinance projects, and projects that receive City grants, funding, or other incentives.

Dated at Chicago, Illinois, this the second (2nd) day of March 2022.
