Project Description	Enhanced data collection and analysis: Enhanced Data Collection and Analysis will allow CDPH to understand the distribution of pollutants and relative vulnerability of different Chicago neighborhoods, thus creating the evidence needed to better target communities for permitting and inspections. Specifically, this project will include expansion of the local air monitoring network with additional community-based sensors to better capture local air quality conditions not being monitored in real-time by federal monitors. In addition, CDPH will utilize advanced software to better understand the distribution of pollutants at a hyper-local level. CDPH in collaboration with the Mayor's Office for Sustainability will also conduct a cumulative impact assessment (CIA) to assess the cumulative impacts of pollution in each neighborhood (e.g. community area, zip code, etc.) including health and social indicators that affect vulnerability, so zoning and permitting decisions can be made with full awareness of how residents are being affected by pollution.

Project Description	Community Wealth Building (CWB) is an approach to economic development that promotes the local, democratic, and shared ownership and control of community assets. CWB exclusively focuses on shared-equity models, giving historically disinvested communities more accessible and sustainable pathways to building wealth by sharing in the purchase and ownership of businesses, housing, and land. Examples of CWB models include worker cooperatives, limited-equity housing cooperatives, community land trusts, and community investment vehicles in commercial real estate. The project has two major components: (1) Ecosystem Development Program – providing multi-year contracts with technical assistance organizations to provide free, highly specialized services (e.g. legal, financial, business development, community education) to CWB
