The City of Chicago is investing $188,000,000 in meaningful, substantive, and justice-oriented climate projects that will provide the City's underserved communities with resilient infrastructure and green workforce development opportunities. This represents the largest one-time climate investment in the City’s history.

Chicago, like cities worldwide, must confront the realities of a changing climate and the impacts those changes will have on society's most vulnerable communities. The City is proud to announce a suite of environmental justice and climate investments that will set us on a course toward a just, resilient, and sustainable future.

The City of Chicago is investing $188,000,000 in a variety of climate and environmental projects that advance Mayor Lightfoot’s Green Recovery Agenda. The investments will accelerate neighborhood-level resilience and climate mitigation while driving equitable co-benefits for the communities that need them most.
