

## LOLLAPALLOZA – TESTING PROTOCOLS

---

In accordance with City of Chicago requirements, full COVID-19 vaccination or negative COVID-19 test results will be required to attend Lollapalooza 2021. For patrons who are not fully vaccinated, a negative COVID-19 test result must be obtained within 72 hours of attending Lollapalooza.

### When to get tested

For patrons who are not fully vaccinated, you must get tested and have a negative result no more than 3 days prior to each day of attendance.

- For example:
  - A negative test 3 days prior the day 1 of Lollapalooza will allow you to attend on day 1, but not on day 2. To enter on day 2, you will need another negative test result, obtained within 3 days of entry.

### What type of test result do you need?

The test must be a COVID-19 viral test (nucleic acid amplification test [NAAT] or antigen test) with Emergency Use Authorization (EUA) from the U.S. Food and Drug Administration (FDA). Self-tests (sometimes referred to as home test) and rapid tests are acceptable as long as they are FDA-EUA approved viral tests and are accompanied by printed documentation of results.

Printed evidence of negative test result must include:

- Type of test
- Entity issuing the result (e.g. healthcare entity, laboratory, manufacturer)
- Specimen collection date.
- Information that identifies the person tested: full name and date of birth

**Test kits are not acceptable evidence of negative result.  
Negative test with the information above must be printed.**

### Where to get tested

COVID-19 testing is offered in many pharmacies and healthcare centers. Nearby testing locations are on the back of this flyer.

## Nearby COVID-19 testing locations:

**CDPH does not endorse any particular COVID-19 testing provider.** COVID-19 testing providers are located in all areas of the City. Go to [Chicago.gov/COVIDTest](https://www.chicago.gov/COVIDTest) for details and more providers.
