

Are you up-to-date on your COVID-19 vaccinations?

You are up-to-date with your COVID-19 vaccines when you have received all doses in the primary series and one booster when eligible.

Do I need a booster?

For extra protection against severe outcomes from COVID-19, anyone 5 years and older should get boosted:

- 5 months after your initial Pfizer (5+) or Moderna (18+) series
- 2 months after your initial J&J (18+) vaccination

Should I get a second booster dose?

The following groups may choose to receive a second mRNA booster 4 months after their first booster dose:

- Individuals **12+ only** who are moderately or severely immunocompromised
- Any adult 50+
- People 18-49 who are not moderately or severely immunocompromised who received the Janssen vaccine for both primary and booster doses
