COVID-19 Response Bureau
Testing and Laboratory-Based Surveillance

December 5, 2020
Every week, we track the volume of tests performed across the City, as well as what type of laboratory is performing those tests.

City of Chicago Community-Based Testing Sites (CBTS) represent just some of over 5,000 providers performing COVID-19 testing in Chicago. CBTS aim to serve the people who need it most, especially those underrepresented in testing from other clinical providers and those from demographic groups and geographic areas hardest hit by COVID-19.

We closely monitor the demographics (e.g., age, race, ethnicity) of individuals using our community-based testing sites, and adjust our targeting as needed to reach the communities that need it most.
