

Ask Dr. Arwady

October 11, 2022

Our local risk based on CDC COVID-19 Community Levels is:

Low

	New cases per 100,000 population (last 7 days) <i>[Goal is <200]</i>	New admissions per 100,000 population (last 7 days) <i>[Goal is <10]</i>	Percent of staffed inpatient beds occupied by COVID-19 patients (last 7 days) <i>[Goal is <10%]</i>
City of Chicago	77	5.9	3.5%
Cook County (including City of Chicago)	91	7.9	3.1%

Chicago metrics are calculated based on Chicago-level data.

Cook County metrics are calculated by the CDC and posted on the [CDC Community Levels website](https://www.cdc.gov/covid19/community-levels/).

Data current as of 10/6/2022.

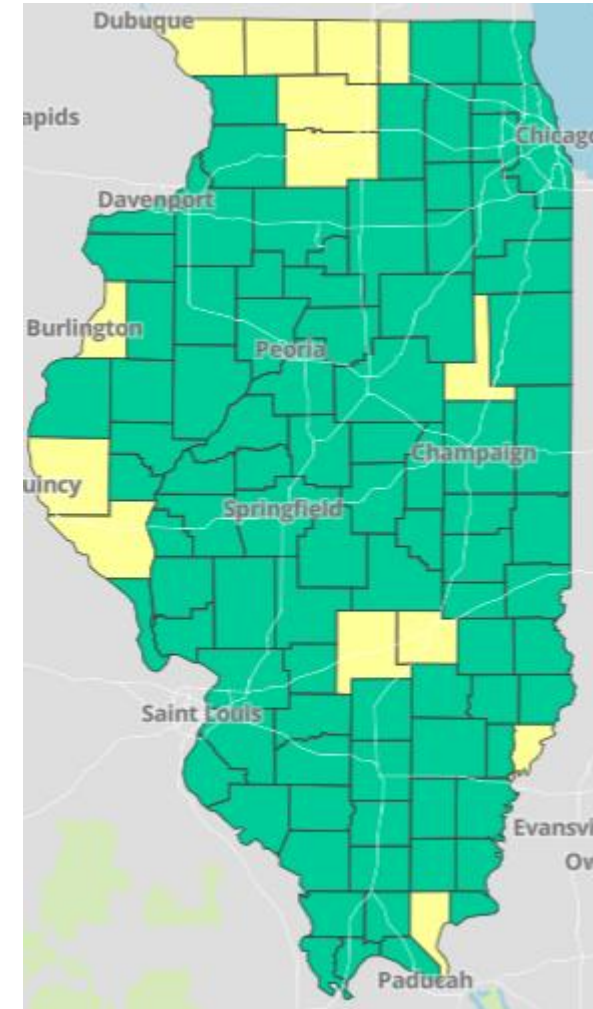

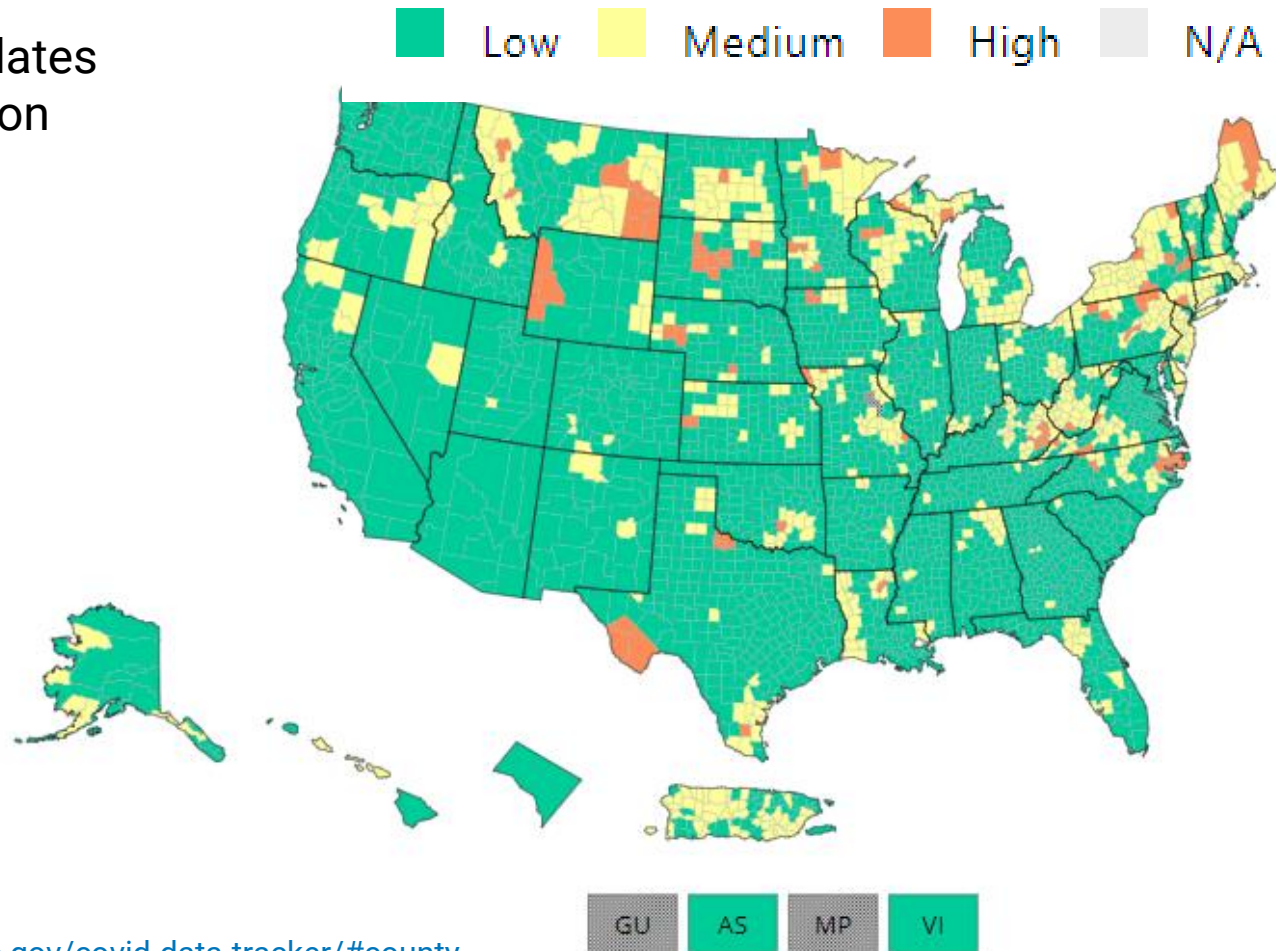

Additional COVID-19 Indicators for Chicago

Indicator	Thresholds			Chicago Current Values
	Low Concern	Medium Concern	High Concern	
Percent of Emergency Department encounters with COVID-19 diagnosis (7 day average)	<3.0%	3.0-5.9%	≥6.0%	1.2%
Average risk score among sample wastewater sites (determined by viral concentration and trend)	<2	2-3	>3	1.6
Local SARS-CoV-2 variant risk assessment (determined by variant classification/rate of replacement)	Risk assessed as low	Risk assessed as medium	Risk assessed as high	Low

COVID: In last week's CDC update, **23% of U.S. Counties** reported High or Medium COVID Community Level.

★ **3%** of counties in High and **20%** in Medium. ALL of Illinois now Low or Medium.

*CDC updates this map on Thursday evenings.

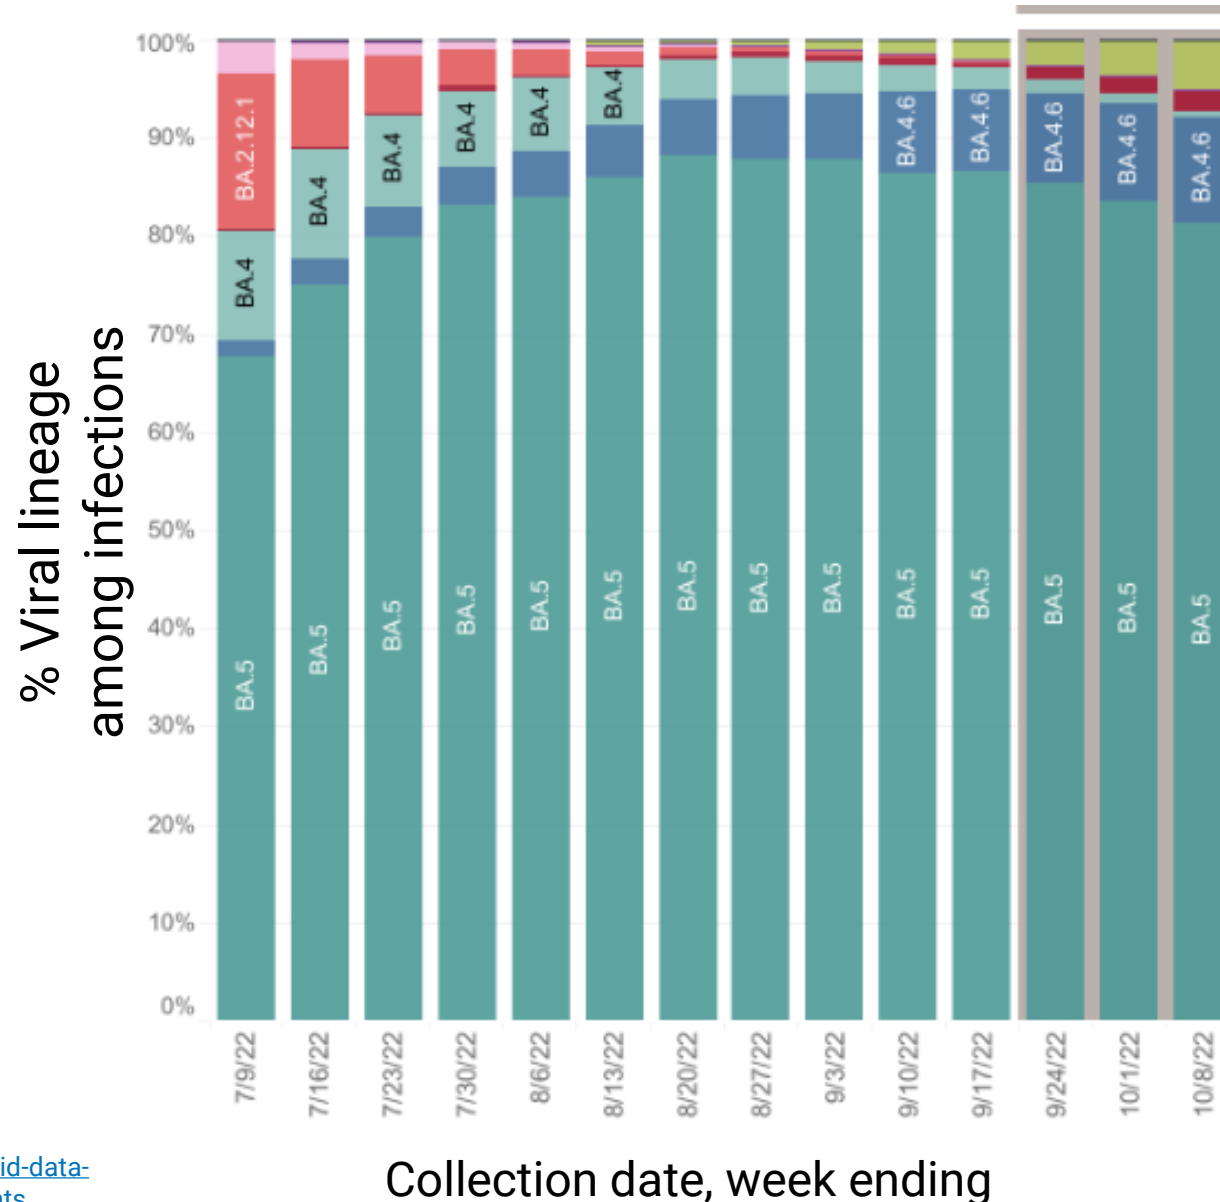

LOW

In “Low” risk, the Chicago Department of Public Health recommends individuals:

- Stay up to date* with [COVID-19 vaccines](#).
- Get [tested](#) if you have symptoms.
- If you test positive for COVID-19, follow all [isolation guidance](#), including wearing a face mask.
- If you are at high risk for severe illness, talk to your healthcare provider about whether you need to wear a mask and take other precautions.

Variant Surveillance, Midwest Region

Continued evolution of more infectious Omicron subvariants; increased BA4/5

Good News:

***It's STILL ALL OMICRON
(and nearly all BA4/5)***

***However, watching a few
subvariants closely.***

BF.7 (5.0%)

BA.2.75 (2.2%)

BA.4 (0.8%)

BA.4.6 (10.7%)

BA.5 (81.3%)

UPDATED COVID-19 VACCINES

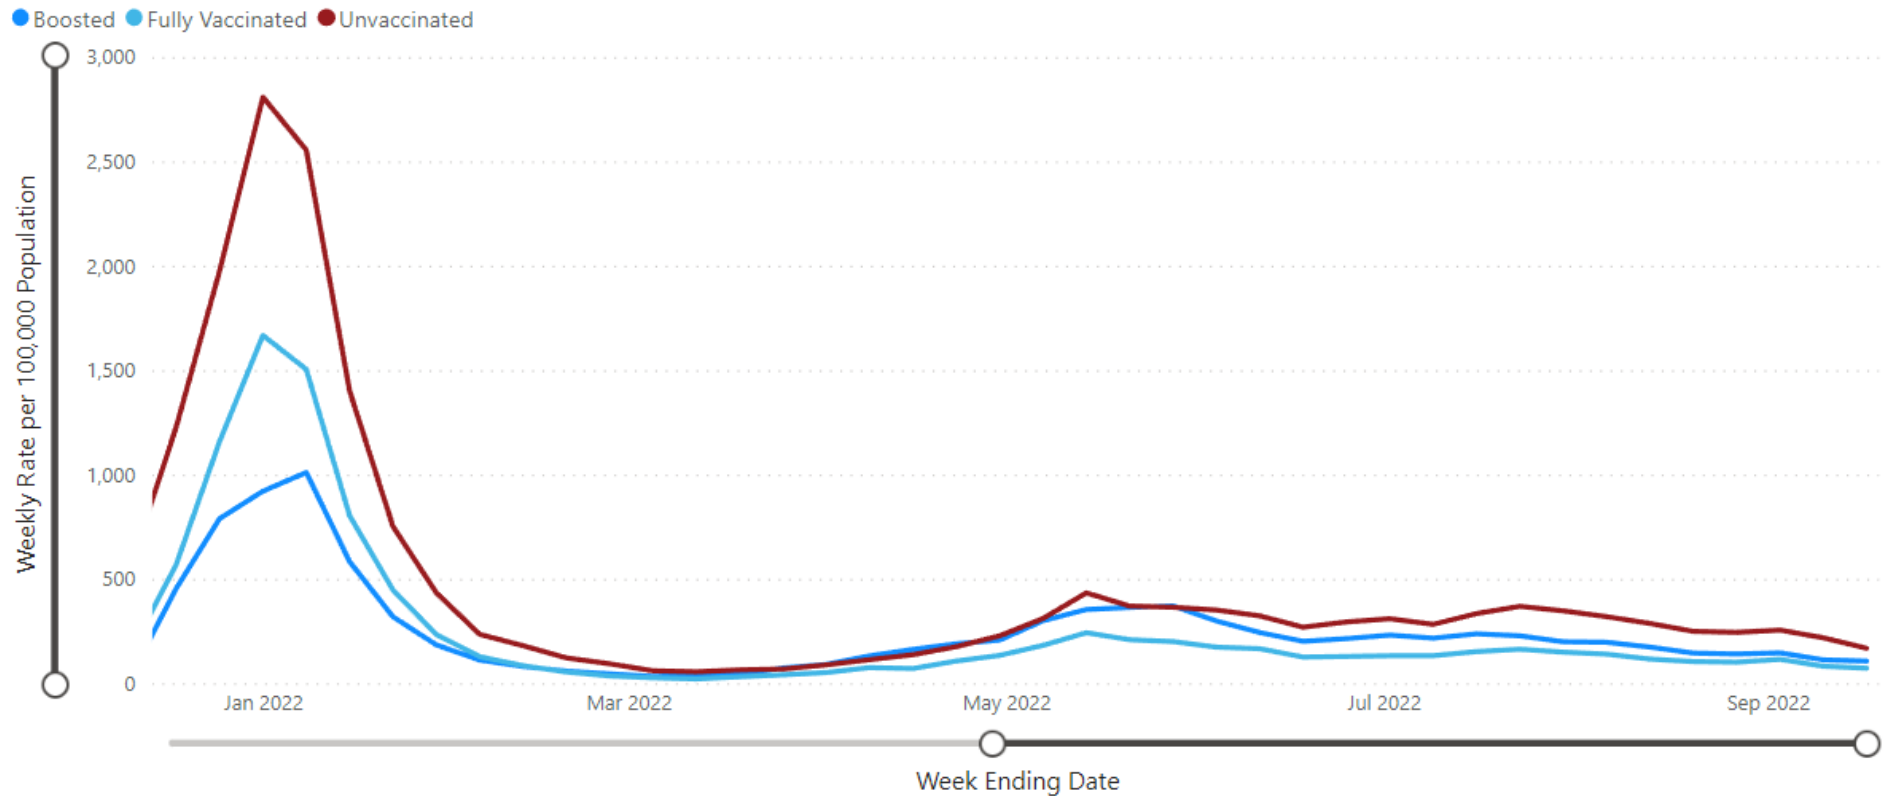

THESE NEW “BIVALENT BOOSTERS” ARE TARGETED
SPECIFICALLY TOWARD THE OMICRON SUB VARIANTS.

Since the Omicron variant became dominant in Chicago:

Infection rates have been **1.8X (80%) higher** in those **unvaccinated** compared to **boosted**

*Rates are adjusted for age

Since the Omicron variant became dominant in Chicago, unvaccinated people had a

1.5X

higher risk of testing positive for COVID-19 compared to fully vaccinated people

Since the Omicron variant became dominant in Chicago, unvaccinated people had a

1.8X

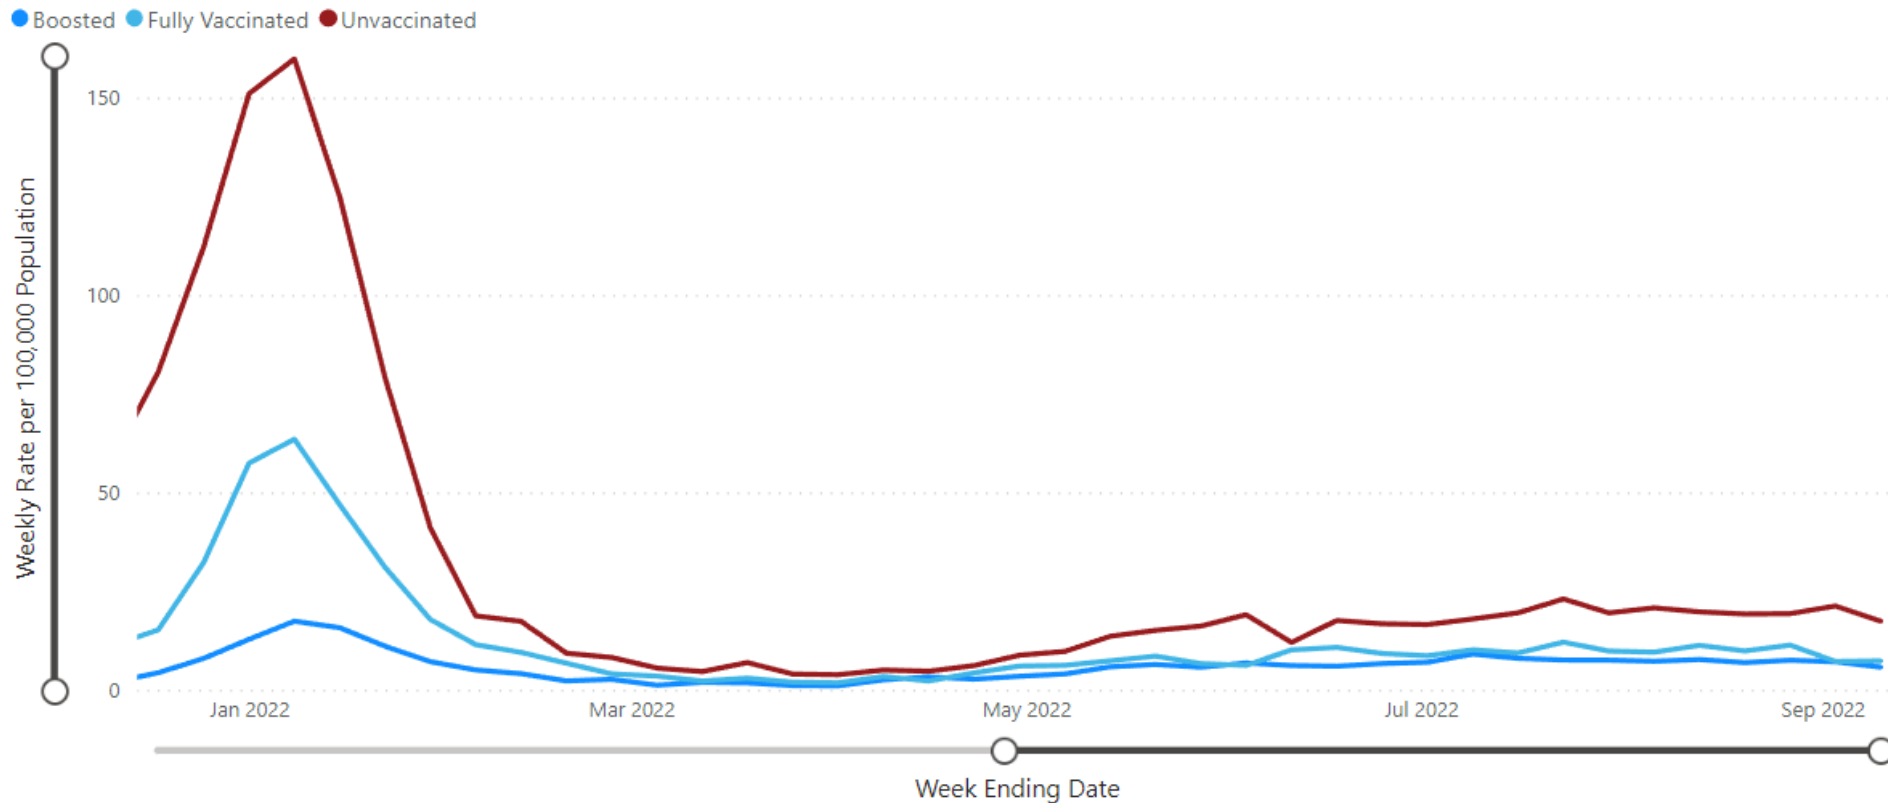

higher risk of testing positive for COVID-19 compared to people who were boosted

Sources:

Includes cases among Chicago residents reported into the Illinois Electronic Disease Surveillance System (I-NEDSS) with date of specimen collection 3/28/2021-9/17/2022, pulled 10/4/2022. Vaccination status obtained from the Illinois Comprehensive Automated Immunization Registry (I-CARE) registry.

Since the Omicron variant became dominant in Chicago:

Hospitalization rates have been **2.7X higher** in those **unvaccinated** compared to **boosted**

*Rates are adjusted for age

Since the Omicron variant became dominant in Chicago, unvaccinated people had a

2.1X

higher risk of being hospitalized with COVID-19 compared to fully vaccinated people

Since the Omicron variant became dominant in Chicago, unvaccinated people had a

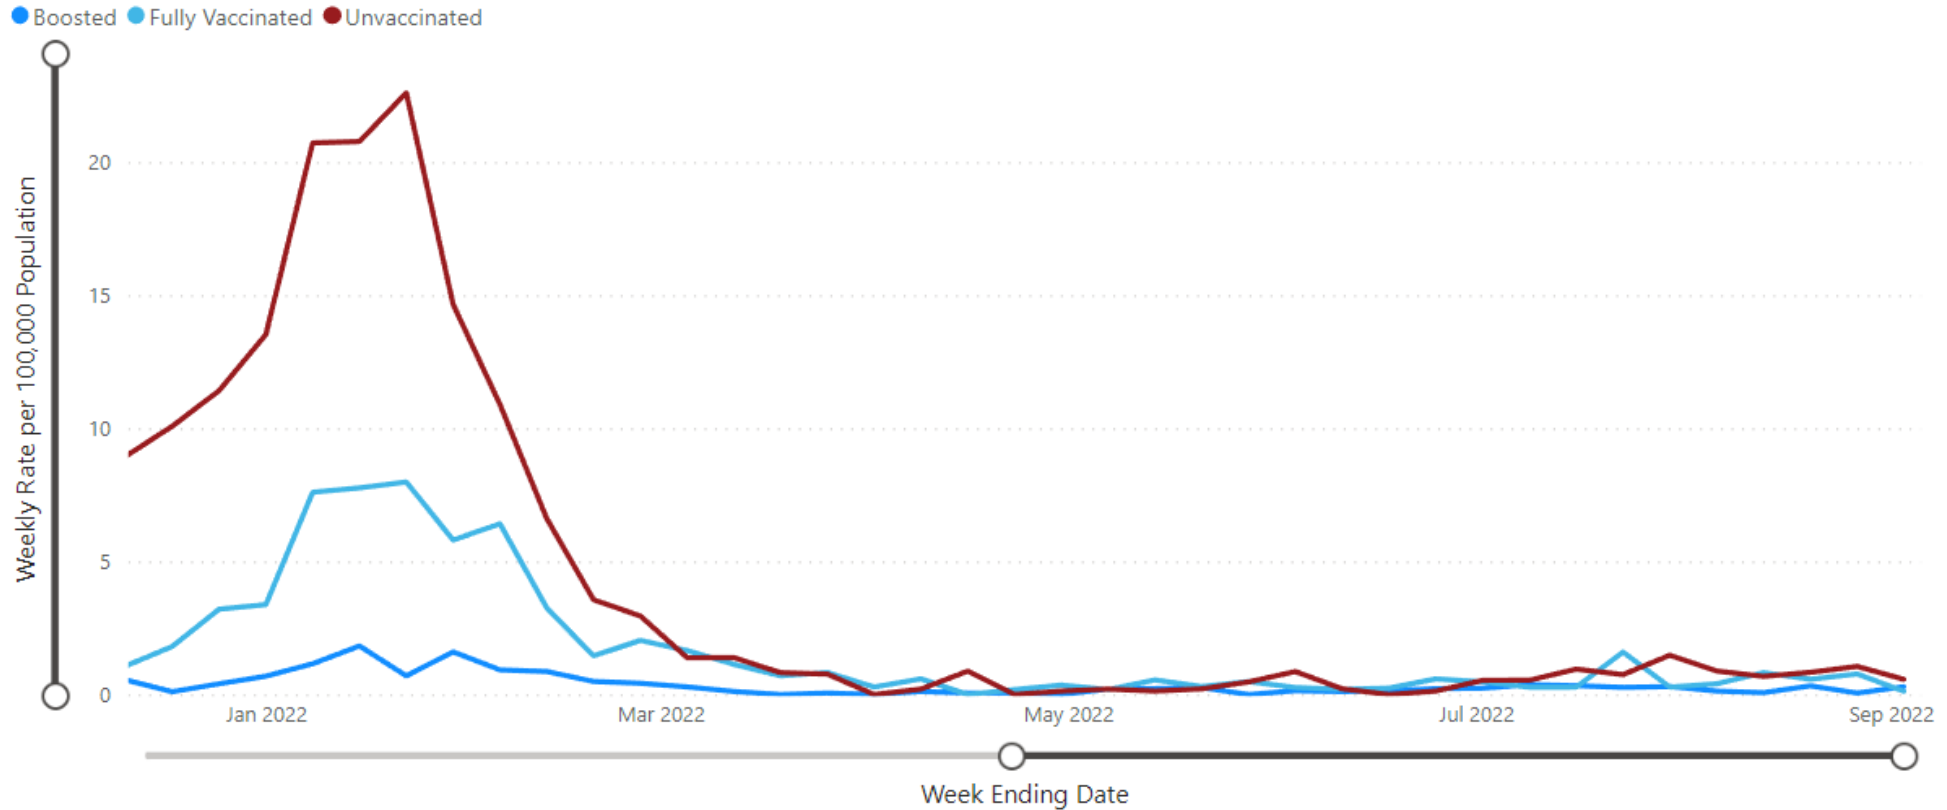

2.7X

higher risk of being hospitalized with COVID-19 compared to people who were boosted

Sources:

Includes cases among Chicago residents reported into the Illinois Electronic Disease Surveillance System (I-NEDSS) with date of specimen collection 3/28/2021-9/10/2022, pulled 10/4/2022. Vaccination status obtained from the Illinois Comprehensive Automated Immunization Registry (I-CARE) registry.

Since the Omicron variant became dominant in Chicago: **Mortality** rates have been **5.8X higher** in those **unvaccinated** compared to **boosted**

*Rates are adjusted for age

Since the Omicron variant became dominant in Chicago, unvaccinated people had a

2.6X

higher risk of dying from COVID-19 compared to fully vaccinated people

Since the Omicron variant became dominant in Chicago, unvaccinated people had a

5.8X

higher risk of dying from COVID-19 compared to people who were boosted

Sources:

Includes cases among Chicago residents reported into the Illinois Electronic Disease Surveillance System (I-NEDSS) with date of specimen collection 3/28/2021-9/3/2022, pulled 10/4/2022. Vaccination status obtained from the Illinois Comprehensive Automated Immunization Registry (I-CARE) registry.

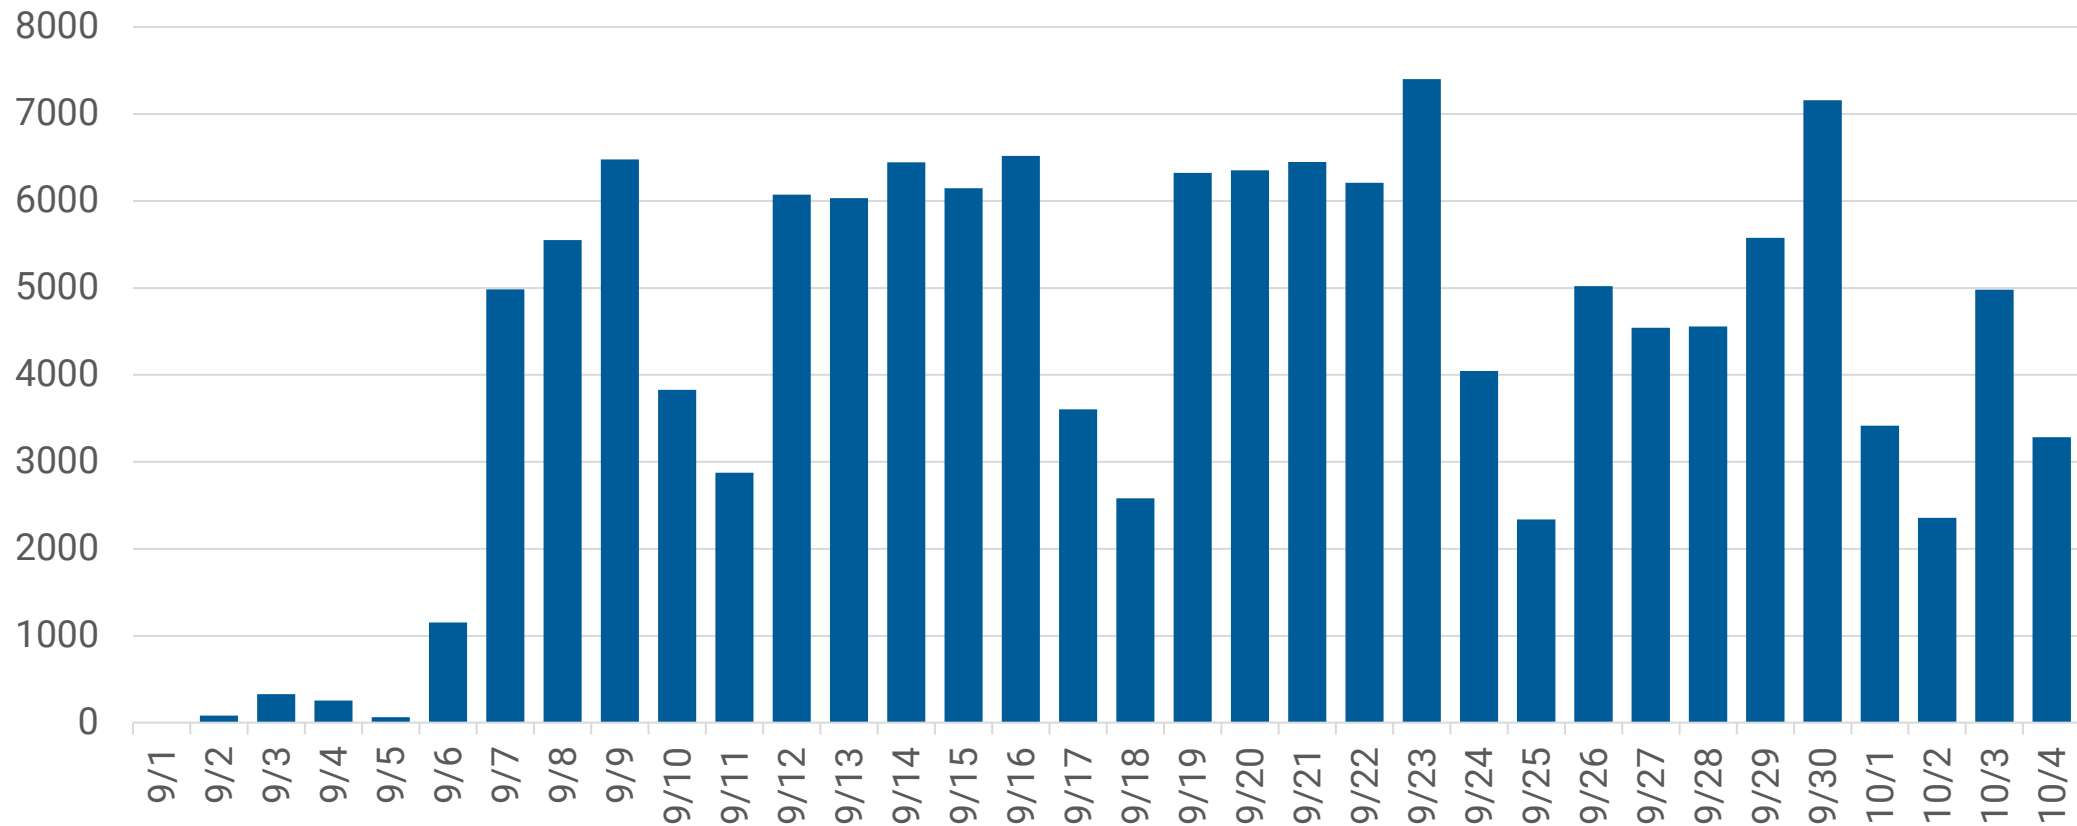

COVID-19 Bivalent Booster Update

All data are preliminary and subject to change.

10/6/2022

Over 144,000 doses of the updated boosters have been administered to Chicagoans since approval

Uptake of the updated vaccine has been uneven across demographic groups; highest uptake among seniors

	No. of Chicagoans eligible for updated vaccine (est.)*	No. of eligible who received updated vaccine	Percent eligible who have received updated vaccine
Race/Ethnicity			
Latinx	475,121	18,506	3.9%
Black, non-Latinx	405,451	21,879	5.4%
White, non-Latinx	608,854	86,791	14.3%
Asian, non-Latinx	134,315	11,681	8.7%
Age Group			
12-17 yrs	123,584	3,850	3.1%
18-29 yrs	354,151	14,368	4.1%
30-39 yrs	352,738	28,826	8.2%
40-49 yrs	274,535	21,891	8.0%
50-59 yrs	250,579	19,306	7.7%
60-69 yrs	210,415	25,182	12.0%
70-79 yrs	122,901	21,226	17.3%
80+ yrs	63,788	9,435	14.8%

Data reported to I-CARE through 10/5/2022. Number eligible includes Chicagoans aged 12 years or older who completed a primary series or received a monovalent booster dose at least 2 months prior to October 1, 2022.

Walk-In Immunization Clinics

CDPH immunization clinics are also open for Flu and COVID-19 vaccines to all Chicago residents eligible for the vaccine, including youth and adults, regardless of insurance status.

*Flu vaccines are available for all Chicago residents 6 months and older

Appointments are encouraged but not required. To make an appointment, go to getvaxchi.chicago.gov.

Greater Lawn Immunization Clinic

Address: 4150 W 55th St

Phone: 312.745.1477

Schedule:

- Monday - Friday, 9am - 3pm

Appointments: Walk-ins welcome, but registration is highly encouraged. Create an account and register for an appointment at <https://getvaxchi.chicago.gov> or by calling 312.745.1477. If assistance is needed, email getvaxchi@chicago.gov.

Register

Uptown WIC Clinic

Address: 945 W. Wilson Ave., 2nd level

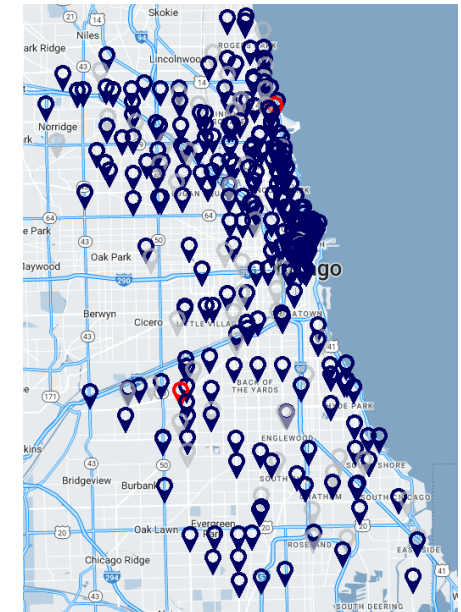

Phone: 312.742.3227

Schedule:

- Mon, Wed, Fri: 9am - 3pm
- Tues, Thurs: 9am - 4pm

Appointments: Walk-ins welcome, but registration is highly encouraged. Create an account and register for an appointment at <https://getvaxchi.chicago.gov> or by calling 312.742.3227. If assistance is needed, email getvaxchi@chicago.gov.

Register

Plenty of opportunities available

- **City Hall Clinics**
 - 10/13, 11/8, and 12/6
- **City Colleges of Chicago – Weekend Clinics**
 - 10/15: Harry S. Truman College
 - 10/16: Malcolm X College
 - 10/22: Richard J. Daley College and Wilbur Wright College
 - 10/29: Kennedy King College
- **Additional sites partnering with aldermanic and community organizations across the city, including DFSS locations serving seniors and other congregate settings**
- **[Chicago.gov/VaxCalendar](https://chicago.gov/VaxCalendar)** for the most up to date details and additional events

LIKELY COMING SOON: PEDIATRIC Bivalent Boosters (5-11 years old): Anticipate kid-sized doses of the updated vaccine!

- If authorized by FDA, CDC anticipates a recommendation for bivalent COVID-19 vaccine as a booster for pediatric age groups in **mid-October**
- Bivalent products expected to be under consideration:
 - **Bivalent Pfizer vaccine for children aged 5-11 years**
 - Separate label; smaller dose than for adults
 - *Reminder: Bivalent Pfizer already authorized for ages 12+*
 - **Bivalent Moderna vaccine for children aged 6-17 years**
 - Same label as for adults; smaller dose than for adults
 - *Reminder: Bivalent Moderna already authorized for ages 18+*
- Would likely replace monovalent boosters, just like what happened for adults

CDPH 2023 Budget

Fikirte Wagaw, First Deputy Commissioner, CDPH

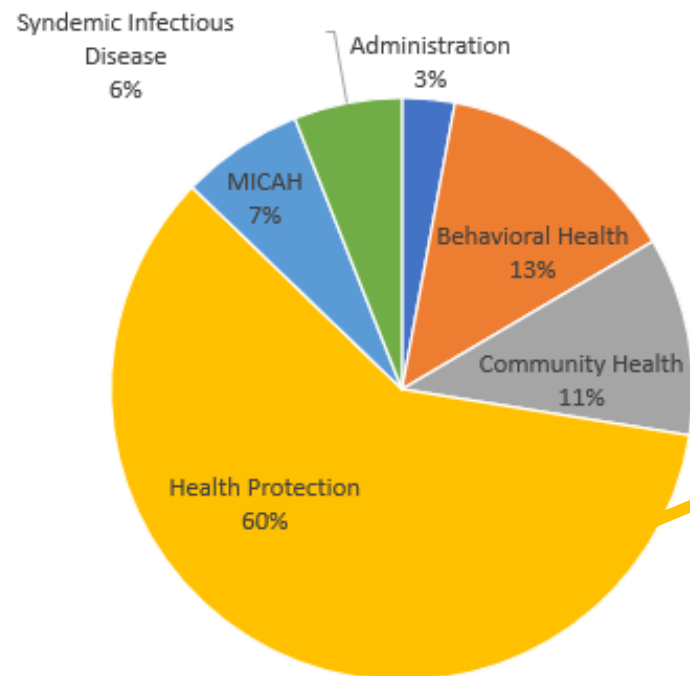

CDPH Budget Breakdown by Program/Bureau

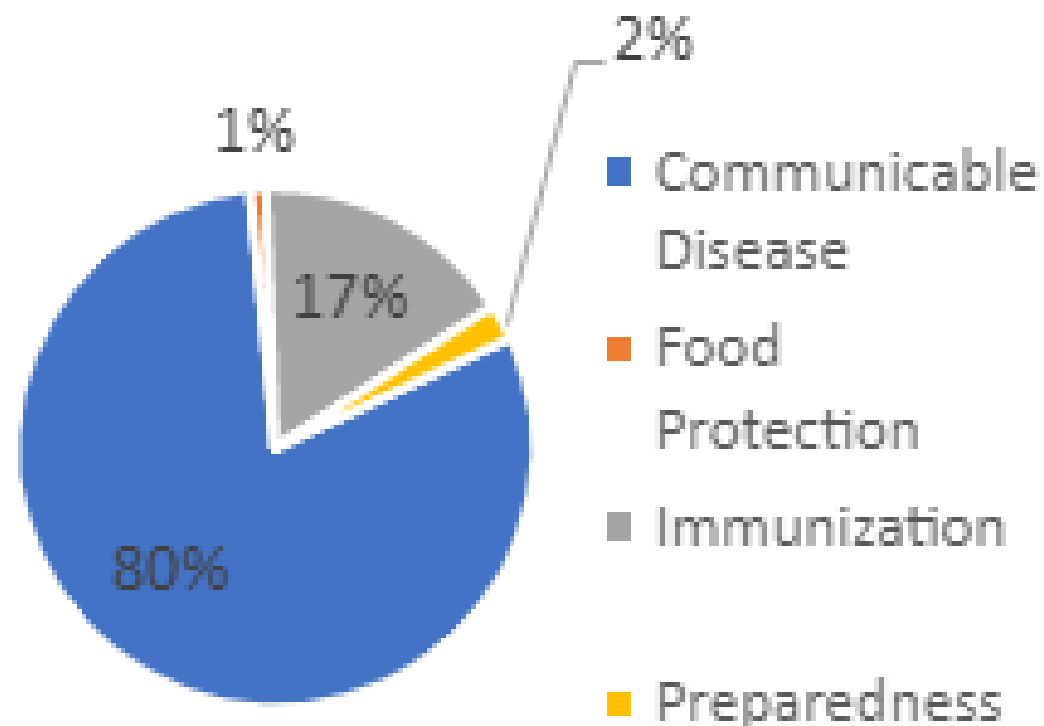

Numbers reflect preliminary estimates. Grant funds may be distributed across multiple categories.

CDPH Budget Breakdown by Program/Bureau

Health Protection

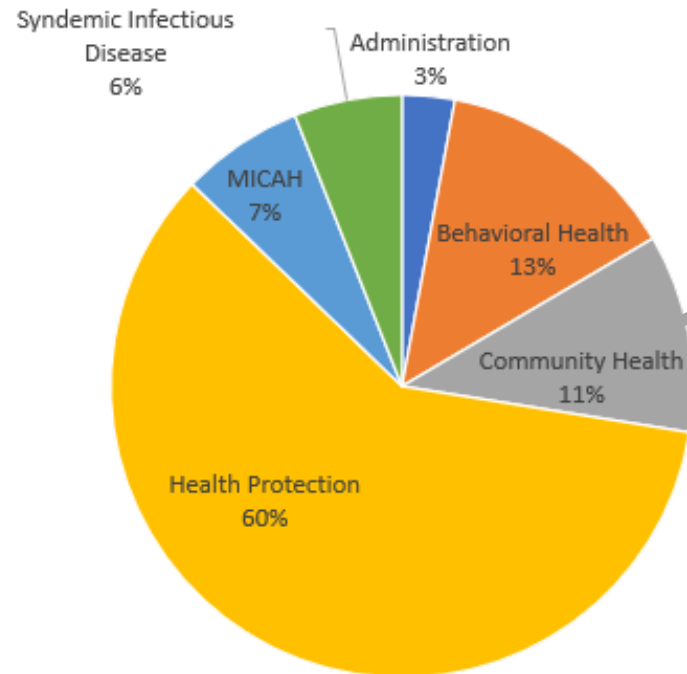

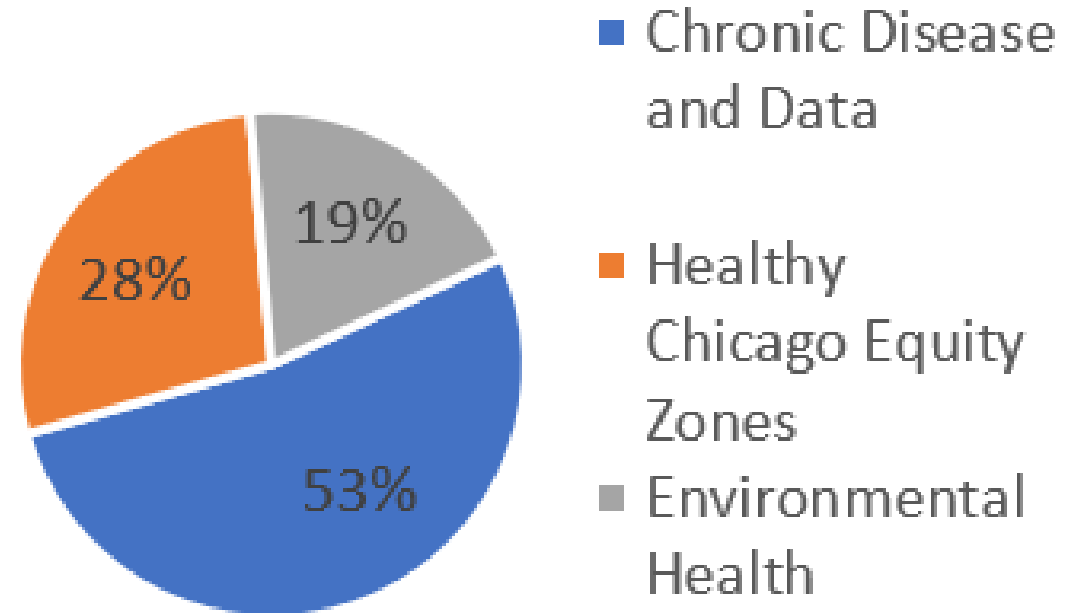

Investments in Emergency Preparedness

- **\$2.5m** to expand emergency preparedness storage capacity and inventory management systems
 - In 2022: our emergency preparedness/healthcare preparedness teams supported **city responses** to
 - COVID-19
 - Monkeypox
 - Ukraine and South/Central American migrant missions
 - Citywide Special Events: Pride Parade, Taste of Chicago, Lollapalooza, Air and Water Show, Chicago Marathon
 - Starting now: Ebola screening in Ugandan travelers/preparedness
 - **AND completed 5 large exercises:** CPD complex coordinated attack; Region 11 Hospital medical surge; Union Station/Amtrak joint reunification; HAZMAT function; planning for BioWatch (bioterrorism) national exercise
- Other plans for 2022:**
- Grow Chicago Medical Reserve Corps (434 medical volunteers and 467 non-medical volunteers supported our vaccination and other response efforts in 2022)—**GET INVOLVED!**
 - Ventilator upgrade project
 - Develop EMTrack (ability to track patients, clients, and event participants using barcoded identification and wristbands across multiple emergency departments, support reunification)
 - Continue to chair and support the Chicago Healthcare Coalition (500+ healthcare agencies operating in Chicago)

CDPH Budget Breakdown by Program/Bureau

Community Health

COMMUNITY HEALTH RESPONSE CORPS

Building on initial investments in the COVID-19 Contact Tracing Corps, local organizations hire and train navigators from priority neighborhoods as a public health outreach, education, and resource coordination workforce. The Response Corps links community members to health and social services through neighborhood events, canvassing, and a call center.

FUNDING SOURCES

\$15,000,000	CDC Immunizations grant
\$7,000,000	American Rescue Plan grant

MICAH

Maternal, Infant, Child, and Adolescent Health

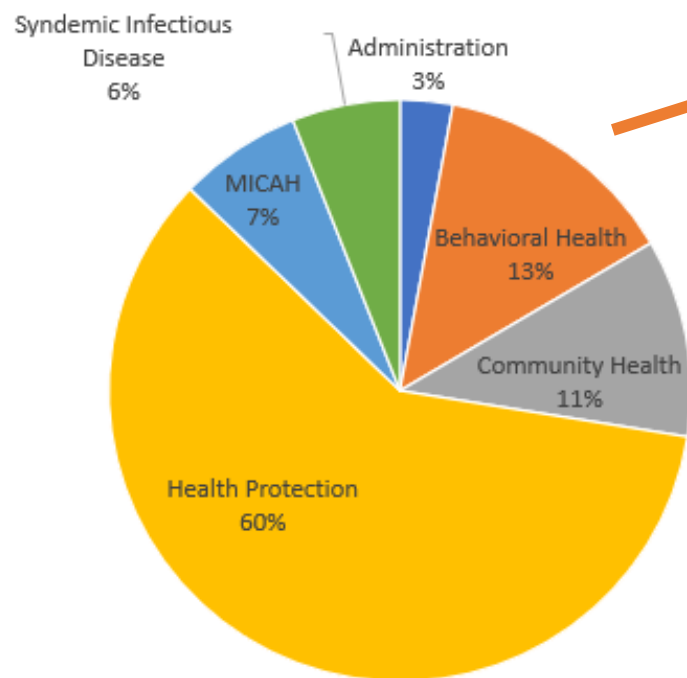

Proposed New Investments in Reproductive Health

- \$2m (additional \$1.5m this year): support access to comprehensive reproductive healthcare in Chicago
- ~\$545k: expand CHAT (Chicago Healthy Adolescents and Teens) program to more CPS high schools and fully fund Condoms4Schools program.
 - CHAT offers high-quality sexual health education and free, confidential sexually transmitted infection (STI) testing at CPS high schools.
 - As currently funded, can reach about 20% of CPS high schools. Investment would approximately double reach of program; eventual goal would be to provide STI education and testing in all CPS high schools.
 - According to the 2019 Youth Risk Behavior Survey, 31% of CPS high school students and 11% of CPS middle school students reported ever being sexually active. Among those currently sexually active, about 40% of both high school and middle school students reported not using a condom during last sexual intercourse.

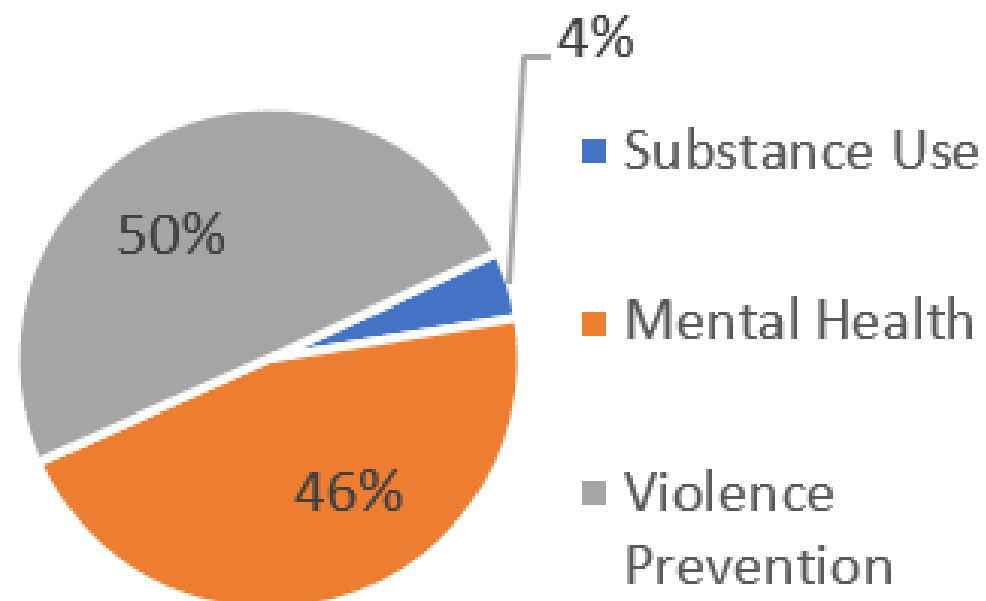

Did you know? CDPH already funds school-based vision program (optometrist or ophthalmologist eye exams, prescription glasses) and school-based oral health program (dental exam, cleaning, fluoride, sealants) free for all CPS students with parental consent. Unlike sexual education/STI CHAT program, these are funded to serve the entire district.

- ~ \$375k: expand CDPH's STI specialty clinic services in our Austin, Lakeview, and Roseland clinics.
 - Add staff and supplies needed to provide pregnancy options counselling and birth control prescriptions to address gaps for Chicagoans with unmet needs for contraception

MentalHealth.chicago.gov

CRISIS ASSISTANCE RESPONSE & ENGAGEMENT PROGRAM (**CARE**)

OVERVIEW

- ★ For the first time in City history, the C.A.R.E. program integrates behavioral healthcare professionals into the City's 911 response system by:
 - Adding mental health professionals staffed in the 911 Call Center to respond to mental health service calls
 - Creating healthcare-based co-responder and alternate responder teams dispatched to respond to 911 calls for service with a behavioral health component
 - Building crisis stabilization centers for individuals experiencing a behavioral health crisis to offer alternatives to emergency departments

GOALS

- ★ Improve outcomes for individuals experiencing a behavioral health crisis who require emergency response by:
 - Utilizing behavior healthcare responders during behavior health crisis
 - Conducting follow up and outreach to those individuals (families) who were experiencing a behavior health crisis for up to 30 days after the crisis
- ★ Expand the City's current strategies for responding to individuals in crisis by ensuring a coordinated and comprehensive crisis response system

To learn more about CARE or communicate with the program, contact: CAREProgram@cityofchicago.org

Fall 2022

Overdose Prevention & Harm Reduction Initiatives

THE FACTS

- ★ In 2020 1,302 people died of an opioid overdose in the City, the highest number ever recorded.
- ★ The majority of opioid-related overdose deaths in Chicago involve fentanyl.
- ★ Every community area in the city is impacted by opioid overdose.
- ★ CDPH is actively addressing this crisis through investment in data monitoring, harm reduction, treatment, and recovery services.

WAYS TO LEAD

- ★ Distribute Narcan and fentanyl test kits from your office and receive training on these resources.
- ★ Co-host a fentanyl test kit community build event with CDPH.
- ★ Get staff trained on connecting people to MAR NOW treatment
- ★ Learn about Chicago opioid data on the Health Atlas at chicagohealthatlas.org

NARCAN

Narcan is the brand name of the medication naloxone, which reverses an opioid overdose. Narcan is a nasal spray that is easy to administer and will not harm someone who is not overdosing.

FENTANYL

Fentanyl is a very powerful opioid that can quickly cause overdose. Much of the heroin in Chicago now likely contains fentanyl, as do an increasing number of other types of substances.

HARM REDUCTION

Harm reduction includes strategies and programs that reduce the negative health and social consequences of substance use. Harm reduction helps prevent overdose death and facilitates linkages to care.

★ NARCAN DISTRIBUTION & TRAINING

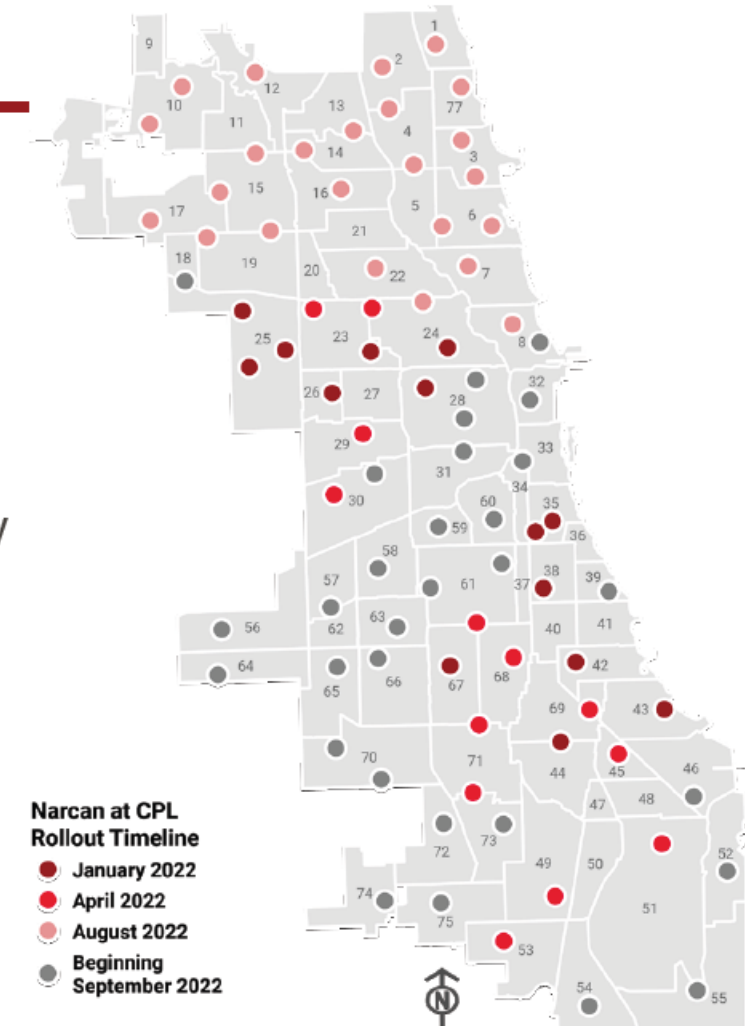

WHAT: CDPH distributes Narcan citywide makes the medication available for free at CDPH STI clinics, offices, and mental health centers, and CPL branches

SUCCESSIONS:

- Since January 2022, CDPH and CPL have distributed over 650 Narcan kits from 27 library branches in areas of the city most impacted by opioid overdose
- CDPH has trained over 280 library staff on opioid overdose

UP NEXT:

- CDPH is expanding Narcan availability from 27 to 51 libraries in August
- By the end of 2022, Narcan will be available in all libraries citywide
- Top distributing libraries: Avalon (66 kits), Humboldt Park (61 kits), Legler (59 kits), and West Pullman (52 kits).

★ MAR NOW TREATMENT PROGRAM

WHAT: In May 2022 CDPH launched an innovative opioid use disorder treatment program together with the Illinois Department of Human Services that connects people immediately through the 24/7 Illinois Helpline for Opioids (833-234-6343) to treatment. All Chicagoans can access treatment through the program, regardless of insurance status, income, ability to pay, or documentation.

SUCCESSIONS:

- MAR NOW has connected 82% of people who call seeking care to same or next-day treatment
- 93% of people connected to home initiation of buprenorphine start treatment, and 92% of those have been connected to long-term care in the community

UP NEXT:

- MAR NOW began as a Chicago pilot and is expanding statewide on September 1
- CDPH is launching a citywide campaign to promote MAR NOW in September
- CDPH continues to advocate for federal regulation changes that make medications to treat opioid use disorder accessible through programs like this.

MAR reduces the chance of fatal overdose and retains people in treatment.

- People receiving buprenorphine are 40-80% less likely to fatally overdose.
- 60-80% of people on buprenorphine or methadone remain in treatment at 12 months with lowered illicit drug use

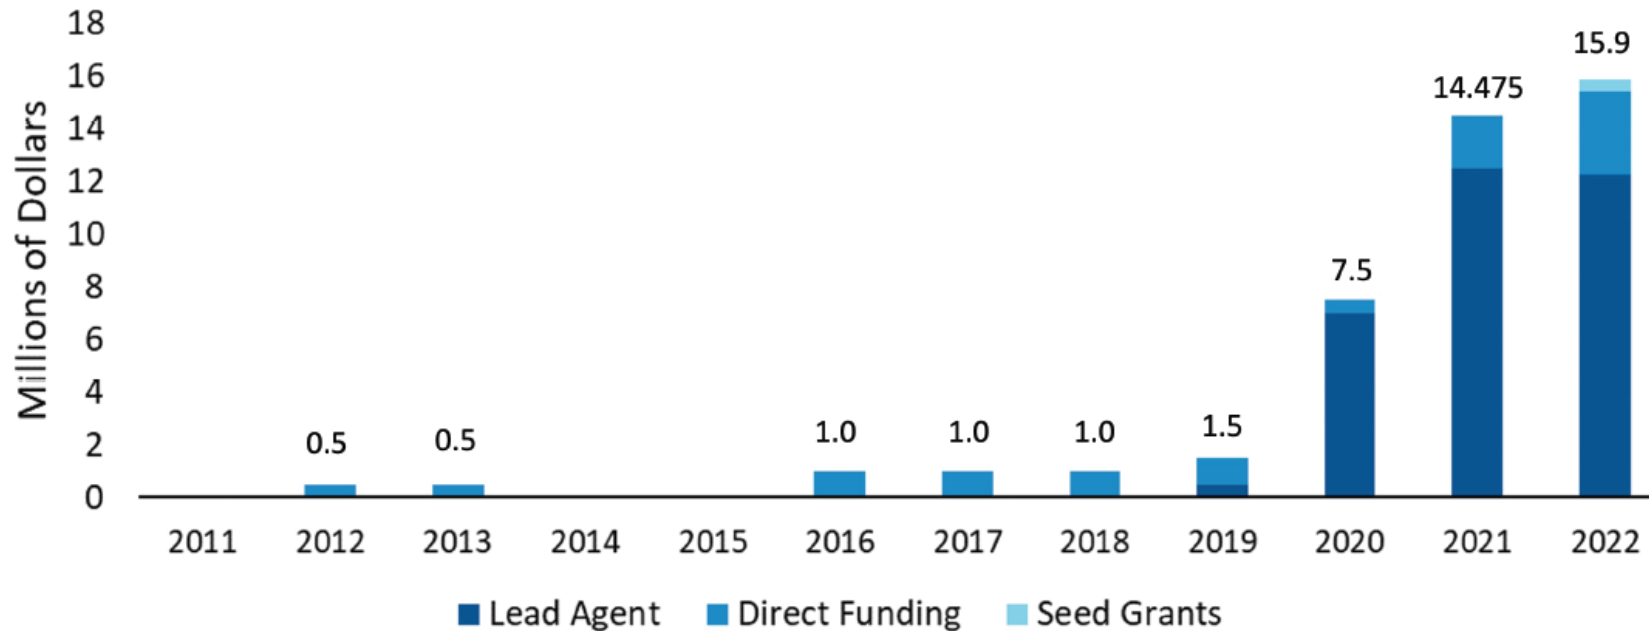

MAR can be very difficult to access, and most people nationwide with an opioid use disorder do not receive MAR. With Chicago's new MAR NOW Program, all patients need to do is call 833-234-6343 and ask for opioid treatment. The program will immediately link them to same or next-day treatment and take care of costs, transportation, and follow-up. Patients can even receive immediate buprenorphine at home and transportation to the pharmacy, without having to go in-person to a clinic first.
