The International Federation of Environmental Health has declared September 26: World Environmental Health Day

Visit www.ifeh.org/WEHD/ to learn more!
September 15-October 15 is National Hispanic Heritage Month

October 1\textsuperscript{st} is National Latino/a Physician Day

6\% is not enough.

Did you know that only 6\% of physicians are Latino or Latina in the United States, despite the country being made up of 19\% Latino? California has an even higher Latino population reaching 39\% with further increases projected to 50\% by the year 2050. There are significant health care barriers, inequalities, and poorer outcomes in the Latino/Hispanic population. Having Latinos better represented in medicine is necessary for our communities and for the future of medicine in the United States.
Monkeypox Update

September 27, 2022
2022 MPV global outbreak: 65,933 Total Confirmed Cases identified in 106 countries

Source: CDC, Data as of 9/26/2022
In the U.S., **25,162** Total Confirmed MPV Cases identified

Source: CDC
Chicago Data: Chicago.gov/MPV

As of 9/26
Illinois: **1,284**
Chicago: **1,022**
MPV is across Chicago: Residents of 69 of Chicago’s 77 community areas have been diagnosed with MPV to date

As of 9/26/2022
U.S. Monkeypox Case Trends Reported to CDC – 9/22/2022

Daily Monkeypox Cases Reported* and 7 Day Daily Average

Source: CDC
MPV cases diagnosed in Chicago residents

Mixed news: Notable decrease in new cases from August peak, but no ongoing decrease in the last three weeks.

Data as of 9/26/2022

<td>25,885</td>
<td>9,375</td>
</tr>
</tbody>
</table>

**Doses of MPV (Monkeypox) Vaccine Administered to Chicagoans, by Week**

- **Dose Number**: 1, 2

Data last updated: 9/19/2022. Counts include doses administered through 9/17/2022.

Data are updated on Monday at 2:00 p.m., except for City holidays when data will be updated on Tuesday. All data are provisional and subject to change.

Data presented do not include doses of vaccine given in Chicago to non-Chicago residents.
Get vaccinated for MPV in Chicago, if you either:

1

Regardless of your demographics, including sexual orientation

• Had close physical contact with someone or an intimate partner who was diagnosed with MPV

• Live with HIV

• Exchange goods or services for sex

2

OR

Are a sexually active bisexual, gay or other same gender-loving man or are a sexually active transgender person

Especially recommended for vaccination if you also:

• Met recent partners through online apps or at social or sexual venue or

• Were diagnosed with sexually transmitted infection(s) in the past 6 months or

• Are eligible for or currently taking PrEP (pre-exposure prophylaxis) to help prevent infection with HIV

We are still learning about how well the vaccine can protect you. Even after getting vaccinated, you should still take precautions, especially if you are at high risk for severe illness from monkeypox.
COVID: In last week’s CDC update, 38% of U.S. Counties reported High or Medium COVID Community Level.

*CDC updates this map on Thursday evenings.

*City metrics are calculated based on Chicago-level data.*

*Cook County metrics are calculated by the CDC and posted on the CDC Community Levels website.*

*Data current as of 9/22/2022.*

In “Low” risk, the Chicago Department of Public Health recommends individuals:

- Stay up to date* with COVID-19 vaccines.
- Get tested if you have symptoms.
- If you test positive for COVID-19, follow all isolation guidance, including wearing a face mask.
- If you are at high risk for severe illness, talk to your healthcare provider about whether you need to wear a mask and take other precautions.
Masks Optional

While this establishment no longer requires masks to enter, please be kind to those who choose to wear a mask.

Thank you for helping to protect Chicago.
REGARDLESS OF YOUR COVID-19 COMMUNITY LEVEL, YOU SHOULD MASK IF YOU HAVE:

- Symptoms of COVID-19
- Positive COVID-19 test
- Exposure to someone with COVID-19

Find your vaccine at chicago.gov/covidvax
Good News:
It’s STILL ALL OMICRON (and nearly all BA4/5)
However, watching a few subvariants closely.

BF.7 (2.3%)

Looking for a COVID-19 Test?

You have options!

- At Home Kits
- Your Healthcare Provider
- Community Health Centers
- Pharmacies
- Pediatric COVID-19 Testing Sites
- Community-Based Testing

Find a test at chi.gov/covidtest
COVID-19 testing remains accessible and available across Chicago, including at no cost for uninsured Chicagoans

- **Laboratory Tests**
  - $0 out-of-pocket diagnostic testing required on all insurance plans, including Medicaid
  - Additional investments to support $0 out-of-pocket testing with focus on underserved communities and uninsured
  - CDPH has worked closely with the federally supported ICATT (Increasing Community Access to Testing) program:
    - More than 80 CVS and Walgreens on-site testing facilities continue to operate across Chicago through this program, offering no-cost COVID lab tests
    - Quest Diagnostics also supports free COVID diagnostic tests for those who are uninsured (brief online screening questionnaire)
    - These sites have performed over 300,000 COVID-19 tests in Chicago
  - Federally Qualified HCs across the city offer no-cost COVID-19 testing for their patients for free
  - The City of Chicago continues to offer free COVID-19 testing to all at its Little Village "Connect Chicago" site

- **At Home Tests**
  - Private insurance companies are now required to reimburse up to 8 at-home over-the-counter tests per month per individual on an insurance plan.
  - Medicaid covers at-home COVID tests at no cost
  - Medicare provides options to pick up free at-home test kits
  - The City of Chicago continues to offer free at-home tests to community organizations in high CCVI neighborhoods
REMEMBER: IF YOU CATCH COVID-19

Regardless of vaccination status, stay home for 5 days. If your symptoms are resolving or gone by Day 5, you can leave your house but you must continue to mask while around others for Days 6-10.

DAY 1-5
STAY AT HOME

DAY 6-10
MASK IN PUBLIC SPACES

DAY 5
ISOLATION ENDS (IF NO/RESOLVING SYMPTOMS)

FIND YOUR VACCINE AT chicago.gov/covidvax
Chicago: COVID-19 Vaccine Coverage
13.2% (roughly 21,400) of Chicagoans under 5 have received one dose of COVID vaccine. Compares to about 5% nationally.

UPDATED COVID-19 VACCINES

THESE NEW “BIVALENT BOOSTERS” ARE TARGETED SPECIFICALLY TOWARD THE OMICRON SUB VARIANTS.

Chicago.gov/boost
LIKELY COMING SOON: PEDIATRIC Bivalent Boosters (5-11 years old): Anticipate kid-sized doses of the updated vaccine!

- If authorized by FDA, CDC anticipates a recommendation for bivalent COVID-19 vaccine as a booster for pediatric age groups in **early to mid-October**

- Bivalent products expected to be under consideration:
  - Bivalent Pfizer vaccine for children aged 5-11 years
    - Separate label; smaller dose than for adults
    - *Reminder: Bivalent Pfizer already authorized for ages 12+*
  - Bivalent Moderna vaccine for children aged 6-17 years
    - Same label as for adults; smaller dose than for adults
    - *Reminder: Bivalent Moderna already authorized for ages 18+*

- Would likely replace monovalent boosters, just like happened for adults

- **Chicago Preorder (placing order by 10/5):** Pfizer Pediatrics: 38,100 doses
- **NO pre-order needed for Moderna bivalent vaccine for children aged 6-11 since product is already in the field** (draw smaller dose from same vial)
Collaboration between CDPH and IL Chapter of American Academy of Pediatrics to send Pediatric COVID-19 Vaccine Report Cards to pediatricians/providers in Chicago

Share local data to encourage vaccinators to keep recommending the COVID-19 vaccine at every appointment

Updated report cards every month

COVID-19 Vaccine Bootcamps
  - designed to give providers foundational knowledge and skills related to COVID-19 vaccine administration and distribution
  - Develop process for identifying unvaccinated patients, reminders for vaccines, create strategies for overcoming vaccine hesitancy through culturally and linguistically appropriate methods

NEW: Pediatric Bivalent Boosters (5-11 years old) Training/Communication

- Vaccine at every opportunity, prioritize vaccination over waste.
- Order bivalent vaccines.
- COVID-19 VACCINE BOOTCAMP, Friday, September 23rd, 8AM-12:15PM, Register here.
Since the Omicron variant became dominant in Chicago:
Infection rates have been **1.8X higher** in those **unvaccinated** compared to **boosted**.

*Rates are adjusted for age*

Sources:
Includes cases among Chicago residents reported into the Illinois Electronic Disease Surveillance System (I-NEDSS) with date of specimen collection 3/28/2021-9/10/2022, pulled 9/20/2022. Vaccination status obtained from the Illinois Comprehensive Automated Immunization Registry (I-CARE) registry.
Since the Omicron variant became dominant in Chicago:
Hospitalization rates have been **2.8X higher** in those **unvaccinated** compared to **boosted**

*Rates are adjusted for age

Out Now: Booster Campaign featuring Long Term Care Facility Staff

Goal: Improve COVID-19 booster uptake for staff and residents at long-term care facilities

Process: CDPH Healthcare Settings Team partnered with Ogilvy to hold a series of focus groups with unboosted staff and one-on-one interviews with unboosted residents, as well as vaccination leaders.

The findings from these sessions were used to develop a campaign highlighting the contributions of six boosted staff members, representing staff from five Chicago-based skilled nursing facilities.

Thanks, Rose.

Thank you for keeping the dinner bell ringing during the pandemic.
For keeping us healthy and well fed.
Thank you for your passion for cooking.
The one you’ve had since childhood.
Thank you for feeding everyone at Villa at Windsor Park nursing home like family.

Thanks for choosing to get boosted.

Protect yourself and those you care for.
Chicago.gov/boost
ATTN: Chicagoans!
Help us understand why some people recover differently from COVID-19.

Join a study and get paid to help us learn about Long COVID.
Who can join the study?

YOU CAN JOIN IF:
• You currently have COVID
• You tested positive for COVID in the last 30 days
• You’ve never had COVID

We need adults and children from all races, ethnicities, and backgrounds to join.

What will happen if I join?

YOU’LL GET PAID FOR YOUR TIME, AND WE MAY ASK YOU TO:
• Answer survey questions
• Have checkups and tests
• Take part for up to 4 years

The study will not give anyone treatment or medicine for COVID. If you join, you can still take treatments and medicines your doctor gives you.

Scan the QR code to find a study near you.

Learn more about RECOVER and Long COVID at RECOVERcovid.org

Illinois is one of 30 study centers nationwide that will develop best practices for people with difficulty recovering from COVID. Visit illinet.org to learn more about ILLInet RECOVER.
