- Recommended guidance -
Encourage social distancing >6ft in common areas (e.g., lobbies, hallways, rooms)

- Ensure at least 6 ft. of distancing between staff, faculty, and students throughout facilities (e.g., lobbies, rooms)
- Install protective barriers in between stations (e.g., computers) where social distancing is not possible
- Students living in the same dorm / apartment may be treated as a household to allow more than one occupant per room
- Ensure in-person classes promote at least 6 ft. social distancing throughout the space, including during ingress / egress

Limit classroom capacity

- CLICK HERE to view more specific Higher Education Phase IV capacity restrictions
- Limit classroom occupancy, as well as all other gatherings of individuals (e.g., employees, students, general public) in cafeterias, meetings rooms, and other gathering points
- Cafeterias may follow the Food Service guidelines
- Limit congregation of student and faculty in hallways
- Optimize elevator occupancy, utilize floor markings and/or signage, and minimize the size of gatherings in elevator lobbies and other public areas when practicable
Be Safe. Higher Education
Healthy interactions

Protective gear

Require face coverings for all individuals

- In any outdoor and indoor common spaces, face coverings must be worn by all individuals over nose and mouth (exceptions can be made for people with medical conditions or disabilities that prevent them from safely wearing a face covering)
- Do not require face coverings in any setting where it may cause a safety hazard (e.g., specialized laboratory); if face coverings are not possible, take extra precautions (e.g., social distancing)
- Staff, faculty, and students in individual office spaces or individual rooms can remove face coverings when alone but should wear them when leaving these spaces or if someone joins them

Hygiene req’s

Provide hand sanitizer at ingress and egress points, and throughout facilities

- Provide personal cleaning resources for employees and students at all key locations throughout the campus, including near high-touch items and common areas (e.g., entrances to buildings, outside restrooms and cafeterias)
- Encourage staff and students to wash hands upon entering facilities, and regularly throughout the day
- Limit use of shared items and equipment (e.g., keyboards)
- Encourage employees to complete health and safety training related to COVID-19 prior to returning to premises

Gradually Resume (Phase IV)

- Recommended guidance -
Be Safe. Higher Education
Safe spaces and working conditions

Evaluate ingress and egress points to maximize social distancing and limit physical contact

- Prior to leaving home, all individuals encouraged to self-identify symptoms and stay at home if symptomatic
- Prior to entering campus or buildings, or attending other school event, staff and students should self-screen (e.g., questionnaire - see appendix) to ensure no symptoms of COVID-19
- Deny access to any individuals attempting to enter building/campus who are ill or exhibit COVID-19 symptoms
- Allow visitor access to campus if following standard public health guidance (e.g., face coverings, social distancing, handwashing)
- Provide one-way entry/exit for every building, where feasible

- Recommended guidance -
Be Safe. Higher Education
Safe spaces and working conditions

Gradually Resume (Phase IV)

Clean daily and more frequently in/around high-traffic areas

- Follow cleaning guidelines outlined by CDC
- Ensure cleaning products are available in each classroom, cafeteria, or other gathering space, and instruct students to disinfect shared equipment or furniture before and after each use
- Clean and disinfect classrooms, labs, and conference rooms at the end of each day
- Disinfect shared workstations (e.g., security posts) between every shift
- Frequently wash/sanitize bathrooms, doorknobs, light-switches, offices, and other high touch areas
- For campus residences with shared bathrooms, ensure frequent cleaning and disinfecting of space; provide cleaning products in shared bathrooms for student use, where possible
- For campus residences with individual / suite-style bathrooms, provide signage to remind students of proper cleaning procedures and to encourage frequent cleaning and disinfecting

Display signage at entry/exit points and other high-traffic areas

- Maintain visual guidance on hygiene standards, distancing, and cleaning protocols
- Where practical, consider postage of visual markers 6 ft. apart to encourage social distancing
- If possible, use visual cues to modify traffic flow to minimize contact between individuals (e.g., assigning designated entrances and exits)
- Display maximum occupancy signage in all classrooms in use

- Recommended guidance -
Be Safe. Higher Education
Safe spaces and working conditions

Gradually Resume (Phase IV)

Identify all choke points (e.g., corridors, entrance), and ensure distancing norms are maintained

- Encourage individuals to use reusable water bottles, and provide disposable cups near drinking fountains, where possible; promote appropriate use of drinking fountains (e.g., do not place mouth on the spout and clean hands after touching surfaces)
- Where possible, move furniture in common areas to promote social distancing (e.g., lobbies and residence halls)
- Encourage use of stairways, and if feasible, reorganize traffic flow to be unidirectional
- Operate ancillary services (e.g., food service, retail, fitness centers) according to relevant industry guidelines

- Recommended guidance -
Adopt strategies to ensure on-campus housing reopens safely

- Create a move-in policy that minimizes interactions (e.g., control traffic flow, schedule move-in times)
- Provide reasonable and appropriate accommodations for isolation and quarantine of students living on campus
- Limit guests in campus resident halls; All guests should adhere to health guidelines (e.g., face coverings, hand hygiene, social distancing)
- Monitor gatherings of individuals in the residents halls with dedicated staff (e.g., RAs), where appropriate
- Reference the City of Chicago guidelines for Residential Buildings and/or Hotels and Accommodations for additional guidance on operating residence halls, where necessary (e.g., common spaces resident hall tours, mailrooms)
Be Safe. Higher Education
Operations and monitoring

**Gradually Resume (Phase IV)**

---

**Flexible models**
- Continue working remotely as much as possible
  - Provide reasonable and appropriate accommodations for remote work and learning for students, faculty, and staff who are at higher risk for severe illness
  - Encourage faculty to work remotely where practical
  - Faculty encouraged to host virtual office hours when distancing in individual offices is not possible

**Operation resiliency**
- Stagger shifts and develop cohorts
  - If possible, stagger shifts and group individuals into stable cohorts
  - Encourage adoption of phased workdays/workweeks to reduce space occupancy

**Travel guidelines**
- Limit school-sponsored travel; follow CDC guidance on returning from travel
  - Suspend domestic and international travel; exceptions for essential travel with prior approvals for critical purposes only
  - Develop procedures and communications for having students, faculty, and staff self-quarantine when returning from travel in accordance with CDC guidance
  - Any international employee or student returning to campus should self-quarantine according to CDC guidance (based on general travel guidance and country-specific guidance)

---

- Recommended guidance -
Follow CDPH and CDC guidance for testing and tracing protocols

- If employee or student contracts COVID-19, they must follow all CDC guidelines before returning to work / classes.
- If an employee or student is identified as being COVID-19 positive by testing, cleaning and disinfecting must be performed according to CDC guidelines.
- Any employee or student who has had close contact with any other person who is diagnosed with COVID-19, or has traveled in a high-risk area as designated by the CDC, should self quarantine according to CDC guidelines.
- If a building or facility becomes aware of 2 or more cases possibly associated with an establishment over a 14 day period, employers are required to report cases to CDPH.
- Follow all other CDPH guidance set forth and comply with CDPH recommendations in response to a workplace outbreak.
Glossary

Gathering: A group of individuals outside a single household who are part of a spontaneous or planned event convening for more than ten minutes.

Handwashing: The act of thoroughly cleaning one’s hands with soap and water for at least 20 seconds or using a disinfectant capable of eliminating the virus that causes COVID-19.

Social distancing: The physical spacing of at least six feet between individuals, or groups of individuals.

PPE: Personal protective equipment (e.g., face coverings, goggles, face shields); requirements vary based on industry and specific circumstances.

Self-screening: A protocol by which an employee answers questions at the start of a shift. Subject to the guidance of the Commissioner of Health, the questions may include:

- Have you had a body temperature over 100 degrees Fahrenheit or have you used a fever reducer in the previous 24 hours to treat a body temperature over 100 degrees Fahrenheit?
- Do you have a new cough that you cannot attribute to another health condition?
- Do you have a new or worsening sore throat that you cannot attribute to another health condition?
- Do you have new shortness of breath that you cannot attribute to another health condition?
- Have you recently developed a complete loss of smell or taste?
