CDPH CBT = Laboratory serving City of Chicago Community-Based Testing Sites

City of Chicago Community-Based Testing Sites (CBTS) represent just some of over 5,000 providers performing COVID-19 testing in Chicago. CBTS aim to serve the people who need it most, especially those underrepresented in testing from other clinical providers and those from demographic groups and geographic areas hardest hit by COVID-19.

We closely monitor the demographics (e.g., age, race, ethnicity) of individuals using our community-based testing sites, and adjust our targeting as needed to reach the communities that need it most.
