The Chicago Department of Transportation (CDOT) is conducting a corridor improvement project in South Chicago along Commercial Avenue between 83rd Street and 93rd Street and along 92nd Street between Anthony Avenue and South Harbor Avenue.

As an initiative of INVEST South/West, the project will provide a safe, walkable, and attractive street that will foster community and economic growth to support re-activation of neighborhood cores that have historically served as focal points for: Pedestrian activity, Shopping, Services, Transportation, Public spaces and Quality-of-Life amenities for local residents.

At this meeting, the project team will present different design alternatives based on previous input collected. Meeting attendees will have an opportunity to provide their feedback on the alternatives.

This will be the second public meeting for this project. If you missed the first public meeting and would like more background on the project please visit the project website to view a recording of the previous meeting.

The meeting with have ASL and Spanish interpretation. If you require additional accommodations, please contact Bienvenida Alvarez for further assistance at balvarez@morrealecomm.com.
