

INFANTS UNDER 5 YEARS OLD

VACCINATION CAMPAIGN TOOLKIT

INTRODUCTION

The City of Chicago Department of Public Health has created this toolkit to facilitate communications and outreach to Parents of infants aged 6 months and older about the COVID-19 vaccine.

This toolkit of assets is intended to help parents overcome their hesitation to get their infants (aged 6 months to 4 years) vaccinated. After listening to parents from some of Chicago's lowest-vaccinated communities, our research found that key reasons for hesitation around getting their children vaccinated were:

- Living among many other non-vaccinated people
- Not seeing their child, or themselves, clearly represented in the research or rollout
- Thinking the vaccine is “not enough” to trust or safely use on their extra tiny human
- Feeling unarmed as their child's ultimate protector

We have developed content that is simple and straightforward, yet trustworthy and relatable. We are not dictating, but rather creating an opportunity to engage parents and encourage them to learn more. Ultimately, they will be the ones to make the decision to vaccinate their child.

This toolkit includes video (for digital/social use), audio (radio), and static assets such as digital banners/content, out-of-home, flyers, and posters. These assets can help support current "infant" outreach efforts as well as be leveraged across earned and owned channels. Materials are available in English and Spanish.

You have full permission to copy or adapt messaging and content for your communications, no credit is needed. We hope these resources can help support your efforts and be a valuable addition to your outreach.

TABLE OF CONTENTS

This toolkit includes content featuring Chicago parents with their infants (children aged 6 months to 4 years old) as well as healthcare providers alongside their young children talking personally and/or sharing relevant facts about the COVID-19 vaccine. The assets included were developed Q2 2022, and this toolkit was issued 07/15/2022. Therefore, it is important to confirm key data points are still accurate when using this content.

ACCESSING ASSETS

All of the assets featured on pages 10-22 can be accessed by clicking the link listed at the bottom of the page. This link will automatically download a folder that includes all assets featured on the page (including all available sizes).

If there is anything specific you are looking for/in need of, don't hesitate to reach out to CDPH with inquiries. We want to ensure everyone has easy access to any content that can help get all children across the city vaccinated.

If you require something specific that's not here or have any questions, please reach out to:

PRIORITY MESSAGE:

Protect your little ones from COVID-19. Get your children 6 months and older vaccinated today.

URL: [Chicago.gov/Under5Vax](https://chicago.gov/Under5Vax)

CALL TO ACTION (URL AND CALL TO VACCINATE ARE PRIORITY):

Talk to your healthcare provider today.

To learn more visit [Chicago.gov/Under5Vax](https://chicago.gov/Under5Vax) or call 312.746.4835

COPY POINTS

KEY FACTS (MOST RELEVANT TO PARENTS OF CHILDREN UNDER 5):

This COVID-19 vaccine is designed for children.

The COVID-19 vaccine has been specifically designed for little ones ages 6 months through 4 years.

OR The vaccine has been specifically designed for this youngest age group, so we know they are getting the protection they need.

This COVID-19 vaccine was developed with pediatricians.

Pediatricians have been involved in the development of the vaccine every step of the way.

OR From research to developing the COVID-19 vaccine for children, pediatricians led the way.

New vaccine. Established technology.

The COVID-19 vaccine is new, the science is not.

OR The vaccine is new but the technology is well established, having been studied for more than 20 years.

The vaccine is like a teacher.

The vaccine comes in to teach our bodies how to fight the COVID-19 virus.

OR The vaccine teaches our bodies how to fight the virus. Once the vaccine has done its job, your child is protected. Just like they did with chicken pox, mumps and measles, your little one can fight off the virus and get on with their lives.

COPY POINTS

HEALTHCARE PROVIDER QUOTES:

Dr. Felicia Scott-Wellington, Pediatrician, Mother of two --

"We know that kids actually do get sick, so it's important to **this layer of protection.**"

"Parenting in a pandemic is new. But the science behind the COVID-19 vaccine is over 20 years old."

"My kids are 1 & 3. I'm definitely getting them vaccinated."

"Talk to a healthcare provider about getting your kids vaccinated."

Dr. David Trotter, Emergency Medicine, Father of three --

"As parents, our duty is to protect our children."

"I always tell my nervous patients: the vaccine for children 6 months and older is specially formulated for them. It's safe."

"It's such a relief getting my one-year-old vaccinated because it's the safest way to protect her against COVID-19."

"The vaccine is the safest way to protect your youngest against COVID-19."

Vianess Santiago, Registered Nurse, mother of two --

"Pediatricians helped with the development of the COVID-19 vaccine for infants every step of the way."

"The vaccine for kids under 5 is specially designed for them. It's safe."

"La vacuna contra el COVID-19 ha sido diseñada específicamente para los pequeños de 6 meses a 4 años."

Elizabeth Bolaños, Registered Nurse, mother of two --

"Pediatricians helped with the development of the COVID-19 vaccine for infants every step of the way."

"Pediatricians helped design the vaccine for children under 5."

"Pediatras han sido parte del desarrollo de la vacuna en cada paso del camino."

Dr. Carl Lambert --

"I highly recommend the COVID-19 vaccine as a safe way to protect kids 6 months and older."

Alejandra Guevara, RN --

"La vacuna contra el COVID-19 es segura para los niños pequeños y ayuda a proteger a todos."

LOGOS & QR CODE

The Chicago Mayor Lori Lightfoot logo is the preferred logo and should be used across. You are also free to pair this content with your own logos instead of, or in addition to, these logos to add relevancy.

The below QR code is available for inclusion within any materials and drives the user to [Chicago.gov/Under5Vax](https://www.chicago.gov/Under5Vax).

PHOTOGRAPHY (HEALTHCARE PROVIDERS)

We captured portraits of healthcare providers and photographs of them with their young children, all of which can be leveraged across all communications (except paid TV) to help support vaccination messaging.

Portraits of the healthcare providers by themselves are best leveraged to announce availability and convey more factual information (e.g. "the vaccine is available for children under 5," "the mRNA technology behind the COVID-19 vaccine has been studied for more than 20 years").

Images featuring the healthcare provider with their young child add an extra layer of credibility and personal nature, making them more relatable and infusing humanity from an expert we can trust.

Dr. Felicia Scott-Wellington, Pediatrician, mother of two

Dr. David Trotter, Emergency Medicine, father

Dr. Carl Lambert

Alejandra Guevara, RN

Elizabeth Bolaños, RN, mother of two

Vianess Santiago, RN madre de dos hijos

PHOTOGRAPHY (CHICAGO FAMILIES)

In addition to healthcare providers, we also captured lifestyle imagery of Chicago families which can be leveraged across all communications (except paid TV) to help support vaccination messaging.

These images feature real Chicago families with young children, managing through the daily grind of parenthood, which was particularly challenging during the pandemic. These images can help convey an authenticity, showing parents that their job is hard and personal, and their choice to vaccinate their child is theirs to make, because no matter how hard parenting is, everyone is doing their best to keep their child safe and healthy.

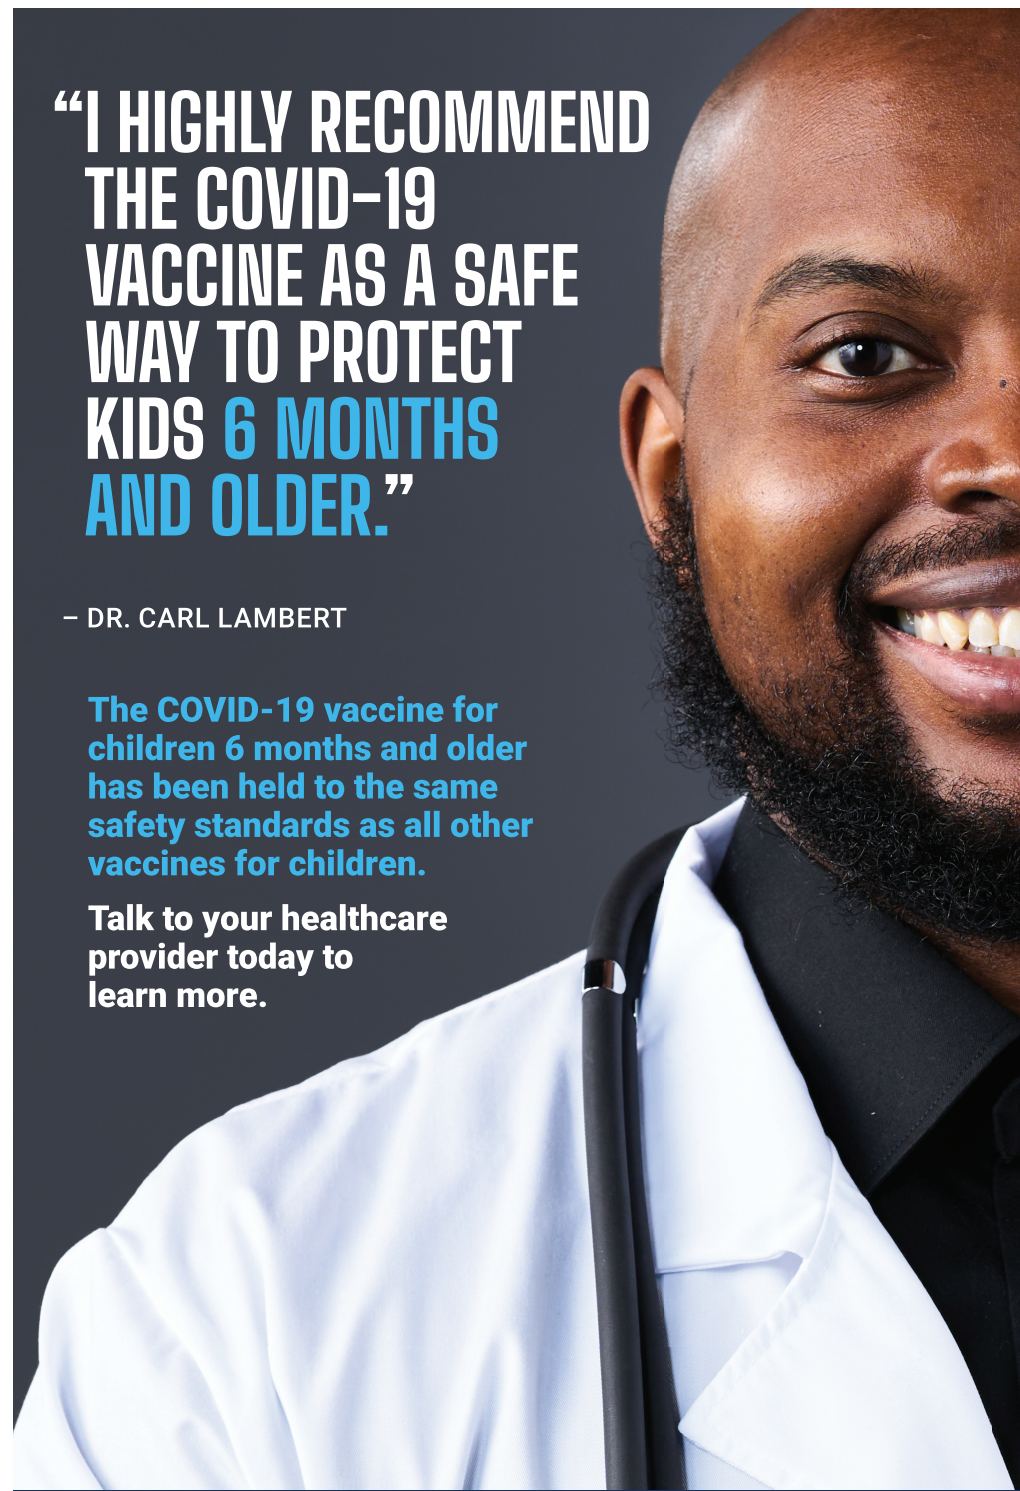

POSTERS

The below poster (11" x 17") is available in English and Spanish. These can be posted organically, as part of a media buy, or leveraged as physical/digital handouts.

FLYERS / POSTERS

The below were created as flyers/handouts (8.5" x 11") and posters (11" x 17") to help support the announcement of the COVID-19 vaccine for children 6 months and older.

"I HIGHLY RECOMMEND THE COVID-19 VACCINE AS A SAFE WAY TO PROTECT KIDS 6 MONTHS AND OLDER."

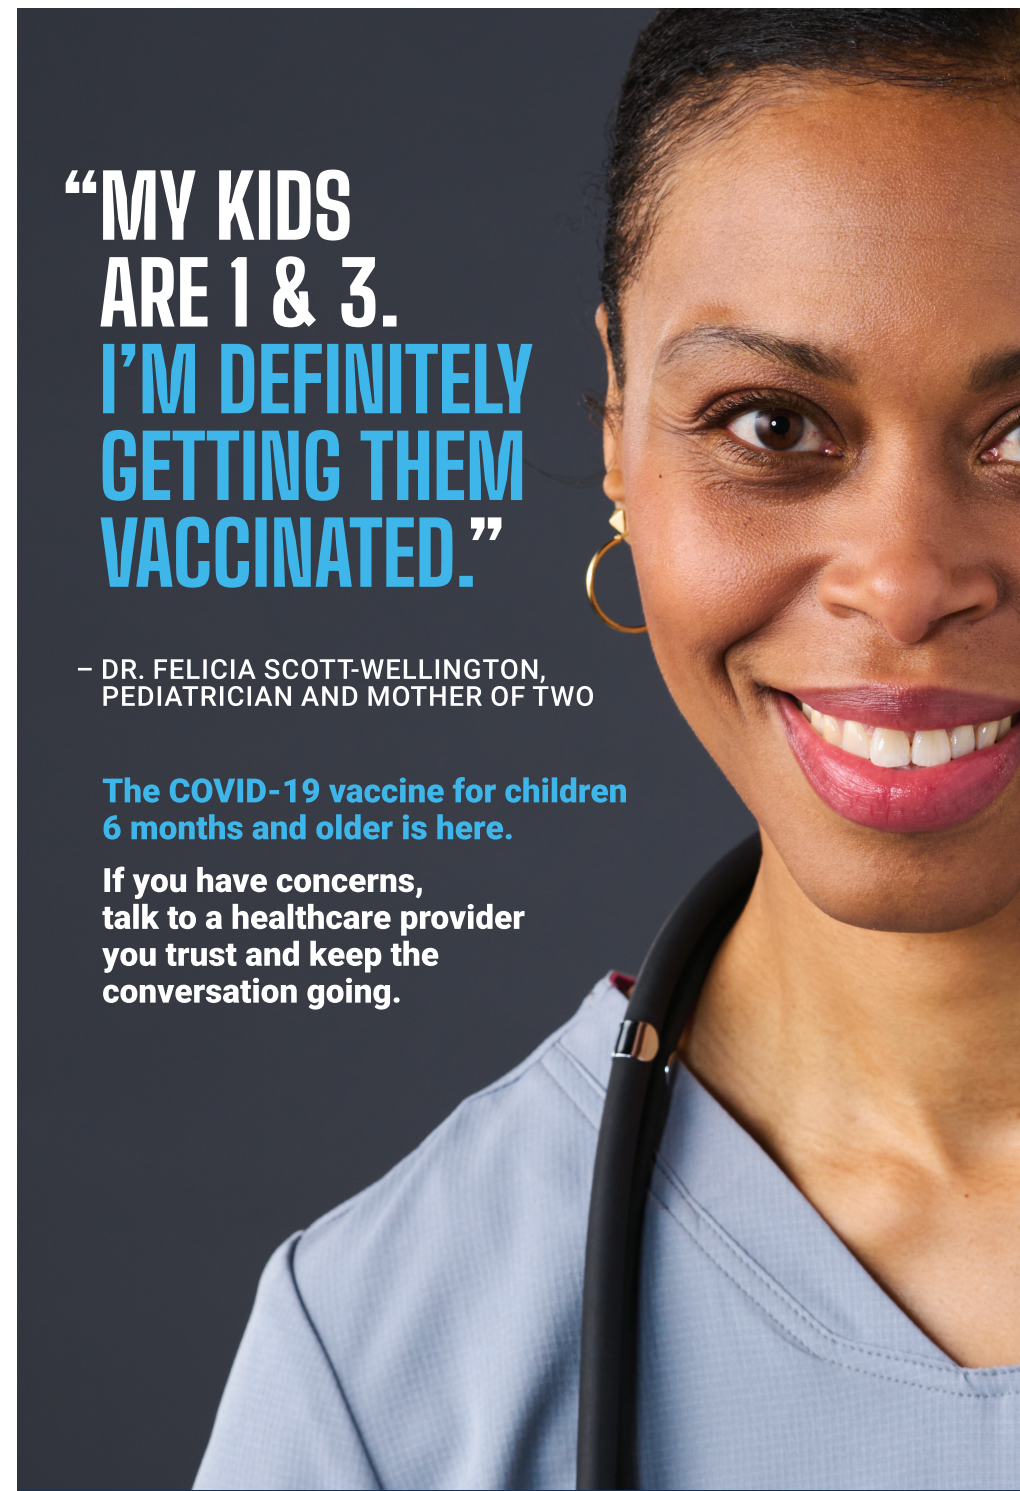

— DR. CARL LAMBERT

The COVID-19 vaccine for children 6 months and older has been held to the same safety standards as all other vaccines for children.

Talk to your healthcare provider today to learn more.
