

# JACKSON VIADUCT AT UNION STATION

## RECONSTRUCTION PROJECT

### CANAL TO CHICAGO RIVER

The Chicago Department of Transportation (CDOT) is rebuilding the Jackson Boulevard viaduct between Canal Street and the Chicago River. The viaduct spans Union Station's south passenger platforms and 16 tracks.

The work will entail building new piers, superstructure, roadway and sidewalk, as well as repairing the Jackson bridge and sidewalk. New lighting and upgraded traffic signals at Jackson and Canal will also be included.

Most work will be done during evening hours to accommodate daytime train traffic at Union Station.

#### Traffic impacts

Jackson viaduct--closed from Canal to Wacker

**JACKSON DETOUR: Clinton (south) to Harrison (east) to Franklin (north), back to Jackson**

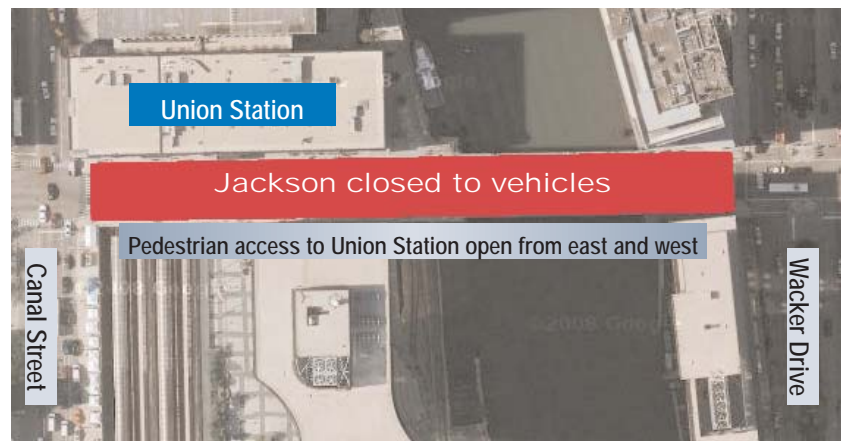

Canal intersection with Jackson--reduced to two lanes for two months in Fall 2009.

Canal Street will also see changes to lane configurations, CTA bus staging and parking meters. For CTA info, visit [www.transitchicago.com](http://www.transitchicago.com)

#### Pedestrian impacts

Pedestrian access to Union Station will be maintained from both the east and west. Pedestrians can cross the Jackson bridge to access the east side of Union Station.

PROJECT SCHEDULE  
JUNE 2009 THROUGH APRIL 2010

Richard M. Daley,  
Mayor
